Digitalize your installation

OSRAM Digital Systems has produced electronic lighting components for over 30 years. As with many growing businesses, our portfolio has evolved to offer a wide range of reliable lighting electronics and control systems. We enable our customers to deliver high-quality lighting solutions, and help our partners successfully transition from the traditional lighting world to the LED world.

Looking at the upcoming transformation towards digital lighting and IoT, OSRAM DS will be the same reliable partner, developing and delivering communication modules, smart control gear, sensors and cloud solutions which will give our customers peace of mind about emerging IoT, cloud services and other data and communication technologies and standards. As a lighting specialist with a vast experience in networked solutions, gathering and analyzing lighting data; we create solutions our customers can safely design into their luminaires or projects.

Global megatrends such as urbanization, digitalization, sustainability and ageing populations are driving the need for smart

infrastructures, smart buildings and smarter working spaces. This creates a variety of social and technological requirements which can no longer be fulfilled by treating building technologies as separate units. We are looking beyond lighting to provide more value with technologies such as DEXAL™ – a digital, streamlined solution that enables luminaire manufacturers to provide smart luminaires that offer data exchange and sensor connection – and EINSTONE® beacons for the collection and distribution of data to enhance retail experiences for consumers and retailers.

Across each of the different verticals we serve – industry (including warehouses), outdoor lighting, offices, education (schools), hospitals, retail and hospitality lighting; we see one or more of these megatrends influencing the use of upcoming technologies. Our role is to fully utilize the value technology can offer in each application, where stakeholders in these segments look to technology to solve their pain-points. We therefore understand that individual solutions are necessary and must be adaptable, and we are here to help our customers find these solutions together.

We see strong future trends in the use of wireless technologies and IoT as the next level of optimizing end-user applications and satisfaction. We also understand the desire for consumer applications driven from smartphones, and for using digital tools to make our lives easier, in everything we do. These trends impact the DS business and are the basis of our development of technology solutions and services to help our partners in the changing world of lighting. Digitalization demands from us but also allows us to do more and offer more than lighting. Data gathered with lighting technology can be made available for application-specific needs, enhancing the world around us. OSRAM DS is developing and will provide the enabling field technology components (drivers, sensors, light engines, controls) and systems; and also the platform, digital services

(algorithms) and professional services from application support to installation, commissioning and maintenance services.

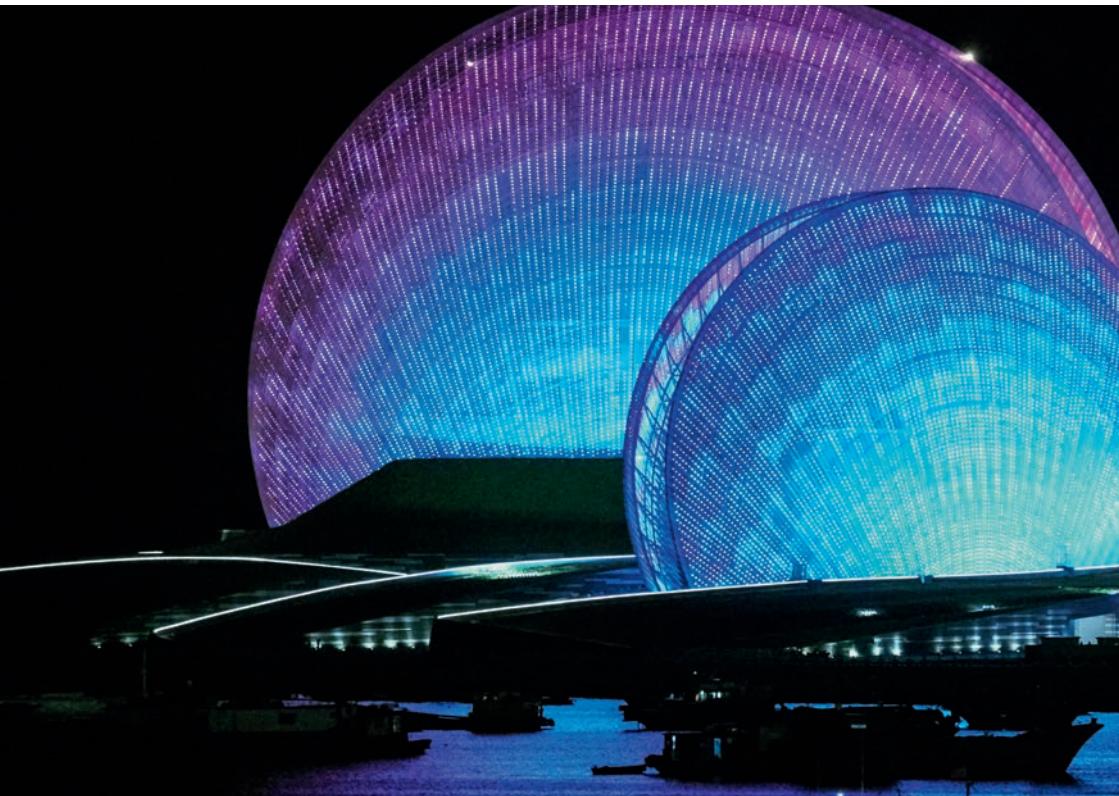

We want to take the guess work out of the design and component choices, to enable our customers to focus on their business. Whatever the individual or overall project need, we are committed to be the partner of choice and build our customers' visions with them. We support all our customers in fulfilling the high demands of the lighting market. This also includes the continued availability of traditional lighting controls for replacement purposes.

We look forward to working with you and taking the step to digitization and the world of IoT together.

www.osram.com/ds

Creating the future of light

Our comprehensive expertise in the lighting industry demonstrates our passion for light. We have been re-inventing light for more than 110 years to provide a broad, state-of-the-art product portfolio that makes it simple for our customers to serve their own customers.

We are more than our customers' partner for their current needs – OSRAM understands the challenges and opportunities of innovative lighting in the future and is driving the technological change in the

lighting industry. Facilitated by trends such as digitalization and connectivity, light will play a fundamental role in our lives in the future that goes beyond illumination – for instance in areas such as health, mobility, security and data transmission. Smart and connected systems will make our homes and cities more comfortable, secure and energy-efficient. OSRAM is already setting significant trends with regard to technological changes in the lighting market that improve quality of life.

As one of the leading light manufacturers in the world, OSRAM can leverage over a century of industry expertise in this market. At the end of fiscal year 2017, OSRAM had around 26,400 employees worldwide and generated a revenue of almost 4.1 billion euros. Primarily focused on semiconductor-based technologies, our products are used in highly diverse applications ranging from virtual reality to autonomous driving and from smartphones to connected lighting solutions in buildings and cities.

For more information, please go to
www.osram.com

Innovative and compliant

In addition to the general legal requirements, statutory and regulatory requirements relating to technical regulations, norms and standards are the main provisions of relevance to the OSRAM Licht Group. The last few years have been marked by comprehensive regulatory change around the world. This is a continuing trend. In view of new regulatory requirements, we are continuously modifying the portfolio of the affected products, often improving products at an early stage and thus taking on a leading role in the lighting industry.

Since the autumn of 2015, the European Commission has been working on further tightening the Energy Efficiency Regulation. Among other things, the focus has been shifted towards new energy efficiency requirements for all types of luminaires and components in the general lighting sector. As an important member of the European Light Association, OSRAM is working towards new requirements that, in addition to the primary goals energy efficiency, resource conservation and light quality, will also meet the requirements of the users and can be implemented realistically by the industry.

A world fit to live in – today and tomorrow

OSRAM offers a wide range of innovative products for sustainable lighting solutions, from components and luminaires to light management systems. In addition to improved efficiency and cost benefits, sustainable lighting offers many other advantages. Light protects, energizes, provides comfort, for example by offering a greater sense of security, and therefore improves our quality of life. And light is fascinating. Developing new solutions for the future, creating sustainable value for our customers and the environment, and introducing them to the fascination of light – that is what inspires us. In the future, digital or connected light will take on a key role for optimum lighting control.

You will find more information on this topic at www.osram.com/sustainability

OSRAM Flex Atelier

Discover the world of flexible lighting solutions

Take a stroll through our virtual shop, the OSRAM Flex Atelier, and adapt the shop lighting to your needs.

As a service for designers and architects, we have added enhanced product information across our LINEARlight FLEX® portfolio.

Download the tender texts list at www.osram.com/ds-tender-texts or check the individual product pages.

Architectural spirit

The fourth dimension of architecture

Extraordinary building concepts are the result of a holistic approach. As an integral part of the architecture, lighting solutions support and enhance the overall visual impression. Thanks to innovative, ultra-flat and flexible lighting solutions from OSRAM, the lighting blends discreetly into the architectural concept of a room and opens up completely new opportunities for creative design.

Thanks to the UltraFlat System, luminaire manufacturers and lighting planners profit from an unprecedented level of design freedom. The currently flattest lighting system on the market with a casing height of only 11 mm allows for the design of extremely slim luminaires. The portfolio consists of ultra-flat DALI LED drivers, perfectly matched light and presence sensors as well as the particularly slim PrevaLED® Linear LED modules in various light colors and lengths.

In addition, the LINEARlight FLEX® system offers maximum flexibility – with a wide selection of different LED modules, the corresponding LED drivers and a comprehensive range of accessories, the so-called Flexessories®. While LED strips are hidden in light coves, suspended ceilings or furniture systems, BackLED® LED modules provide a particularly homogeneous backlighting in light ceilings. This way, light sets up the visual framework for the architecture and takes the overall concept to a new level. In other words, light becomes the fourth dimension of space.

Make your visionary design come true with ultra-flat lighting systems from OSRAM.

Thanks to ultra-flat lighting solutions, the lighting blends discreetly into the architectural concept of a room

Shop/Hospitality

Sensual experience in shops and hospitality areas

Stationary retail stores have to compete with the high product availability offered by online shops and face fierce competition. Therefore, it is becoming increasingly important for them to create a stimulating shopping experience with new lighting concepts. In the hospitality and hotel business, lighting triggers emotions and creates an ambience that enhances the well-being of the guests.

Miniaturized LED lighting systems open up new opportunities for the subtle integration of luminaires into their environment – in shop as well as hotel and hospitality lighting. Spotlights and downlights are therefore getting increasingly smaller and more efficient, while covering a broad spectrum of applications. The LED modules of the PrevaLED® Core family are ideal for the design of elegant track lights and spotlights. Thanks to a wide choice of lumen packages and light colors, they offer high flexibility and can therefore be used in any area.

The adjustment of the light color to the illuminated products is crucial for the shopping experience. For example, LINEARlight FLEX® POWER LED modules with the special light colors Meat or Veggie White are suitable for the presentation of food. In the hospitality sector, the lighting mood plays a more important role. In combination with the new LED driver families OT FIT LT2 S and OT FIT CS G2, the LED modules LINEARlight FLEX®, LINEARlight FLEX® Tunable White and LINEARlight FLEX® POWER allow you to adjust a great variety of different lighting scenes.

Create an inspiring atmosphere for customers and guests – with our compact lighting systems.

Outdoor

Smart street lighting with NFC

In modern street lighting, safety and lighting mood have top priority. For cities and municipalities, energy efficiency and easy operation are also of great importance. The new OSRAM LED drivers of the product families OT 1DIM and OT 4DIM NFC meet these requirements and offer even more. Thanks to contactless NFC programming with Tuner4TRONIC®, you can reduce the complexity associated with the application of energy-saving LED luminaires and lower costs for maintenance and stock management.

Street lights with LED technology allow for high energy savings as the brightness and the dimming level, for example, can be adjusted to the requirements. This, however, drastically increases the number of different luminaire types in municipalities, leading to a higher complexity of maintenance and storage. In order to

reduce this complexity, OSRAM has developed the intelligent NFC-ready LED drivers of the product families OT 1DIM and OT 4DIM NFC. These make it possible to use flexible LED street lights that support various lumen packages, dimming modes and dimming levels.

In luminaire manufacturing, the LED drivers can be programmed efficiently with the software Tuner4TRONIC® and the corresponding NFC devices. Moreover, they can be easily programmed via smartphone with the Tuner4TRONIC® Field app, which provides municipalities and assigned installers with a simple way to replace defective LED drivers and extend existing installations – and this without requiring mains voltage.

Rely on a future-proof solution – with our NFC-ready LED drivers.

Thanks to NFC, municipalities can optimize energy efficiency without additional efforts for stock management and maintenance

HCL solutions focus on humans and the optimal light for their needs

HCL

Biologically effective light for balance and well-being

Modern lighting offers more than just optimum visibility. With innovative concepts for Tunable White and Human Centric Lighting (HCL), OSRAM uses the many positive effects of light in order to create more pleasant working environments.

HCL solutions, for example, bring the natural course of daylight and its biological effects into indoor areas. This is achieved by using artificial light with the right brightness and color temperature to supplement the daylight. The interplay of light and room climate creates an atmosphere that has a positive impact on the well-being of humans as well as on their productivity and health. This requires the application of HCL-ready luminaires that allow for melanopically effective lighting.

In combination with suitable OPTOTRONIC® OTi DALI TW LED drivers, the LED modules PrevaLED® Linear Tunable White, LINEARlight FLEX® Tunable White and BackLED® TW Plus provide a high light quality and a wide spectrum of light colors from 2,700 to 6,500 K. Lighting systems from OSRAM can be implemented in installations of any size. Light management systems such as DALI MCU TW, DALI ACU BT or DALI PROFESSIONAL form their centerpiece. Our range of solutions extends from the manual control of single rooms with Tunable White to dynamic daylight- and presence-dependent control in comprehensive HCL applications.

Improve the quality of life with light quality – with our efficient lighting systems.

Industry

Efficient LED-based industry lighting systems

High ceilings in production and logistics facilities call for lighting components with long lifetimes, wide temperature ranges, high light output levels and a high quality of light for effective working. In order to cut costs while providing high-performance lighting, many luminaire manufacturers today rely on robust LED components and intelligent control technology from OSRAM.

Our extremely reliable and energy-efficient LED system components for the industrial sector save lots of energy and reduce maintenance effort to a minimum – with perfectly matched LED modules, LED drivers and intelligent lighting control systems. With OPTOTRONIC® Intelligent DALI 100 IND and OPTOTRONIC® Intelligent DALI 150 IND as well as the OPTOTRONIC® FIT IND drivers, which are available in mid-2018, OSRAM offers

state-of-the-art constant-current LED drivers that have been specially designed for industrial applications, e.g. production areas, warehouses and high-back racking.

In combination with daylight and motion sensors, innovative light management systems from OSRAM make lighting control as easy, modern and versatile as never before. With DALI PROFESSIONAL combined with the DALI PRO Control app, even complex lighting scenarios can easily be realized and controlled via smartphone. In large and complex networks, ENCELIUM® offers high levels of flexibility and performance in order to reduce energy costs for lighting by up to 75 %.

Develop durable and energy-efficient lighting systems – with our future-proof technologies.

In industrial applications, the uninterrupted operation of the lighting is of crucial importance

App control

Wireless control via smartphone

In the connected world, the smartphone is increasingly becoming a central element. Thanks to versatile interfaces and easy-to-use apps, it also turns into an intuitive tool for intelligent lighting controls. If you would like to switch to lighting control via smartphone, OSRAM offers various simple solutions – for luminaires as well as LED modules. Moreover, all types of installation are covered and easy commissioning via app is also possible in some cases.

With their Bluetooth® interface, the DALIeco BT and DALI ACU BT controllers are ideally suited for the lighting control of small and medium-sized DALI installations via smartphone. Both controllers also support Tunable White luminaires. LUXeye® is the Bluetooth®-ready light management system for ceiling installations – with integrated light and presence sensor. The DALI PROFESSIONAL light management system is used for installations with over 30 light points.

Furthermore, OSRAM also offers wireless systems that increase flexibility and energy efficiency due to the lack of wiring, e.g. in offices and industrial facilities. In this case, not only the remote control (smartphone) and the light installation are connected, but the luminaire components (controllers, sensors etc.) are also linked to each other in a wireless network. With wireless solutions such as ENCELIUM® Wireless combined with the ZigBee2DALI adapter, you can easily update simple on/off installations to dimmable lighting without having to renew the existing wiring.

Switch now to lighting control via smartphone and make lighting as easy as it gets.

Applications

Office lighting

Focusing both on design and human needs, OSRAM lighting systems provide the basis for modern office lighting. Tunable White (TW) and Human Centric Lighting (HCL) help to improve the well-being and productivity of office workers. To provide optimal simulation of the natural daylight cycle, HCL concepts use area light sources that can be equipped with BackLED® TW Plus, PrevaLED® Linear Tunable White or LINEARlight FLEX® Tunable White LED modules. For the control of TW and HCL, OSRAM offers solutions for any project size, e.g. DALIeco BT, DALI PROFESSIONAL and ENCELLIUM®. These light management systems also allow for wireless control with smartphones, providing optimum ease of use and reducing installation costs in some cases. A highlight in terms of futuristic design is the UltraFlat system. Combining extremely flat LED drivers with sensors and the PrevaLED® Linear LED modules, it gives unprecedented freedom in the design of slim floor-standing and pendant luminaires, which become unique eye-catchers in any office.

Turn offices into a source of well-being and inspiration.

Retail and shop lighting

In shops and supermarkets, lighting plays a vital role in drawing the customer's attention to selected products or areas. LED technology achieves even more: It improves energy efficiency and creates a universe of colors that stimulate shopping.

The ever decreasing dimensions of spot- and downlights demand extremely compact LED modules, drivers and sensors. Moreover, excellent light quality, the specific color rendering and efficient light management are necessary to display the presented products in the perfect way. In combination with our compact LED drivers, such as the OT FIT LT2 S, the slim LED modules PrevaLED® Core and LINEARlight FLEX® Tunable White provide the perfect light for every situation, from sales counters and cash desk areas to subtle shelf lighting.

Make shopping an experience – thanks to LED.

Hospitality lighting

Intelligent and cost-efficient LED lighting systems combine functional and decorative lighting in hotels, bars, restaurants and wellness centers. For hospitality areas, our product range includes compact system solutions for spotlights and downlights, such as PrevaLED® Core for reception areas and PrevaLED® Flat AC for corridors in hotels. In addition, we also offer flexible LINEARlight FLEX® LED strips for integrated lighting. Due to flexible and individual lighting control, the LED modules and drivers can create the right atmosphere by dividing rooms into different zones, enhancing privacy or relaxation while ensuring that public areas are brightly lit. Tunable White light from warm to cold white and an almost endless variety of colors allow for customized lighting that suits each area. An overall light management system helps you to adjust the light output automatically according to the amount of natural light, achieving highest efficiency and low operating costs.

Set the right mood for guests with LED light and turn every stay into a special occasion.

Art and museum lighting

Lighting systems in museums and galleries have to present the works of art with the optimal brightness, in the right light color and without disturbing glare effects. For these requirements, our LED systems offer a wide range of white and colored light in various light intensities. Our portfolio includes, for example, light engines and modules for spotlights and downlights, the OT FIT Compact LED drivers and the LINEARlight FLEX® LED strips for attractive embedded lighting. With our efficient light management systems, such as DALI PROFESSIONAL and DALI MCU, pre-defined constant or dynamic scenes can be set very easily and comfortably.

Furthermore, it is possible to control the combination of daylight and artificial light with high precision. The use of sensors opens up additional options to reduce energy consumption by switching on the light only when visitors are present.

Find the right balance between architecture, costs and energy efficiency.

Backlighting and signage

An eye-catching LED backlighting and signage is simply ideal to flexibly design customized solutions for companies and shops. LED solutions provide homogeneous brightness levels for advertisement as well as logos and ensure precise control of illuminated signage applications. Our highly functional and reliable systems, consisting of high-performance LED modules, perfectly matched constant-voltage LED drivers (12V and 24V), various mounting accessories and intelligent light management systems, such as the DALI MCU TW, open up numerous opportunities for indoor and outdoor applications. Both the BackLED® and BoxLED® product families include various LED modules for the brilliant direct backlighting of channel letters and provide even, powerful and efficient illumination in light boxes.

This combination of homogeneous illumination, flexibility and a huge variety of colors gives you the design freedom you need. Perfect support is provided by the LED deSIGNer software, which automatically calculates the exact number of LED modules, ECGs and mounting profile components for a given project.

Attract great attention with tailored LED solutions.

Architectural and facade lighting

Based on cutting-edge lighting technology, the smooth interplay of light and shade highlights distinctive architectural structures to make buildings stand out from their environment.

LED luminaires and modules for outdoor applications, such as the flexible LED strip LINEARlight FLEX® Protect ADVANCED, offer superior efficiency and extreme color stability. They withstand the harshest weather conditions and deliver the energy efficiency and durability required for long-term operation. Professional light management systems allow you to smoothly control colors and energy requirements. After an easy installation of the luminaires and light engines, you can save pre-defined light scenarios and dynamic light sequences and activate them via remote control, smartphone, a central touchpad or a motion sensor.

Provide LED architectural lighting that presents every facade in the perfect light.

Industrial and logistics lighting

The correct level of light is essential in factory and warehouse settings to ensure high productivity and safety. Our perfectly matched system solutions are the ideal choice for the most challenging environments. With cutting-edge LED modules such as PrevaLED® Basic Linear or PrevaLED® Linear G4, they provide durable, high-quality lighting at high and low temperature extremes and over long operating hours, e.g. in trunking systems or water-proof, batten and high-bay luminaires. Our OTi DALI 100 IND, OTi DALI 150 IND and OT FIT IND (available in mid-2018) LED drivers have been designed to meet the special requirements of industrial applications. Efficient and convenient control is realized with sensor-based light management systems. Combined sensors with a detection range of up to 9 meters and a height of up to 13 meters are available for this purpose. With the DALI PROFESSIONAL and ENCELIUM® light management systems, we offer a perfect fit for any project size. With ENCELIUM®, you can even achieve energy savings of up to 75 %.

Use efficient lighting systems that have been specially designed for industrial use.

Smart city and street lighting

In modern street lighting, our smart outdoor technologies ensure easy installation and maintenance as well as energy-efficient operation. With the Tuner4TRONIC® software suite for Windows, the OT 1DIM and OT 4DIM NFC LED drivers from OSRAM can be programmed in a very simple and fast way. Thanks to contactless NFC programming, they allow the easy configuration of luminaires that can be flexibly adapted to different requirements. These flexible NFC luminaires significantly reduce the complexity associated with the use of energy-saving LED technology: They enable cities and municipalities to achieve new levels of energy efficiency with less effort, reducing time and costs of stock keeping and maintenance.

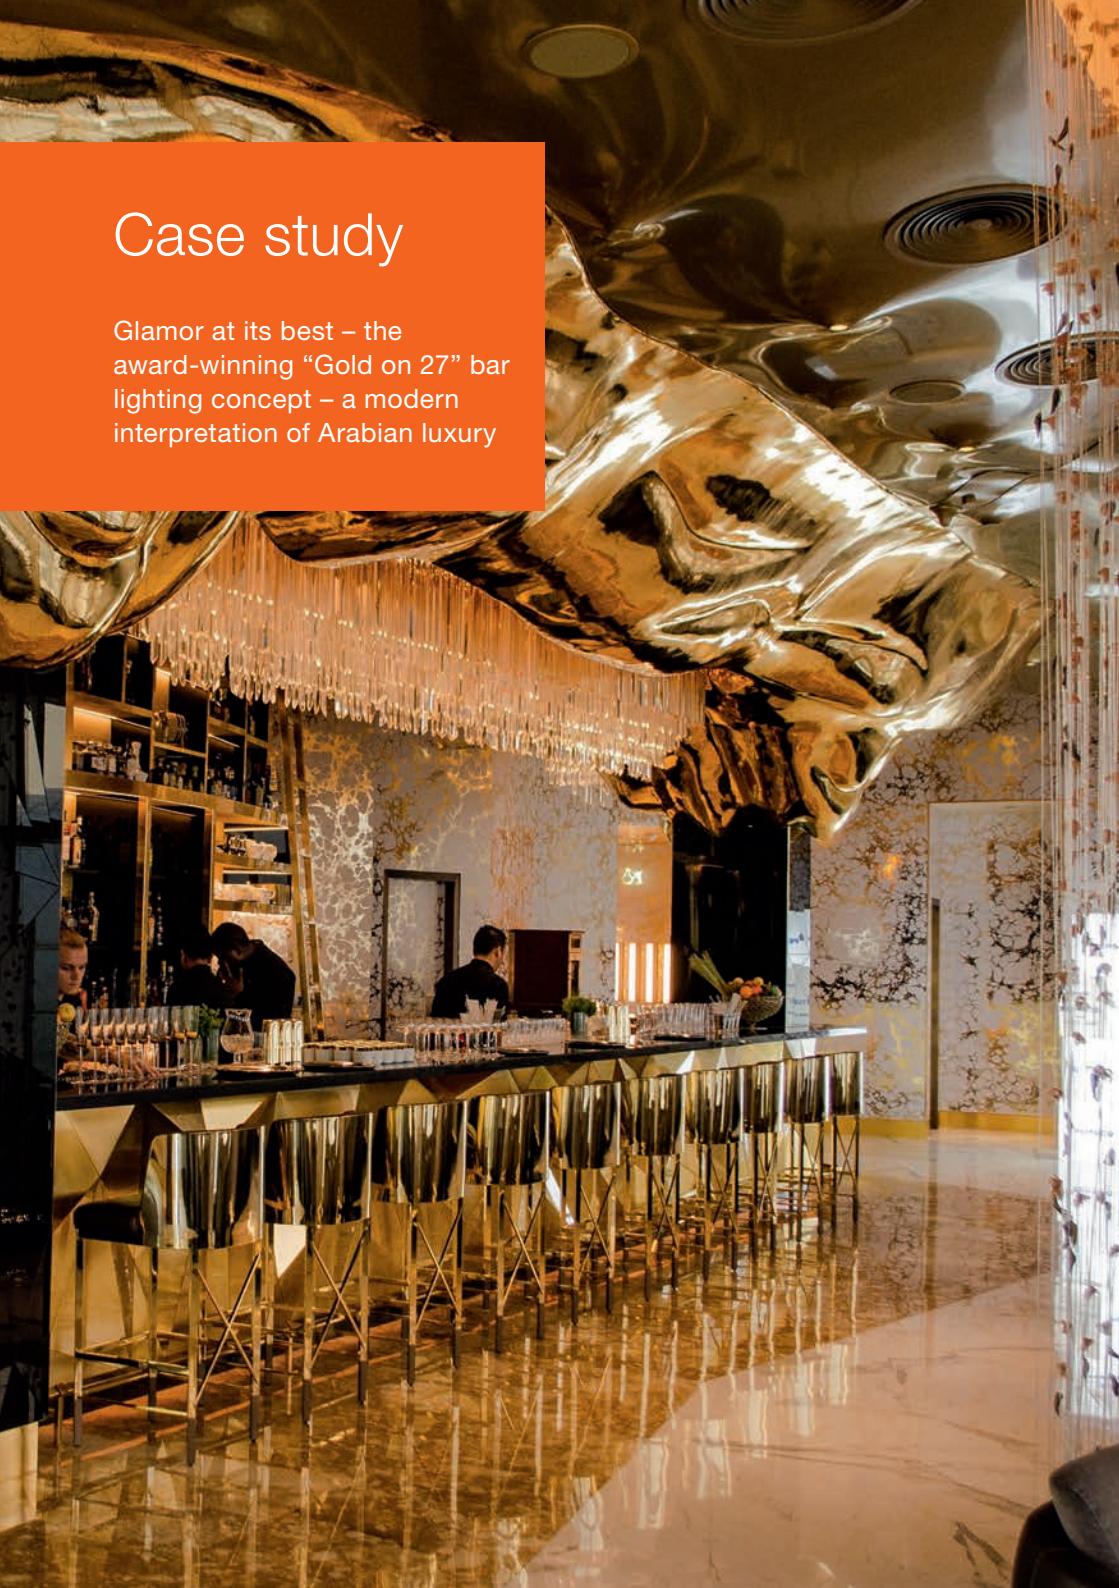

If a luminaire has to be replaced, it is possible to copy the original configuration of the failed LED luminaire and paste the data into the new LED driver via the Tuner4TRONIC® Field app.

Rely on a future-proof solution with NFC-ready LED drivers from OSRAM.

Case study

Glamor at its best – the award-winning “Gold on 27” bar lighting concept – a modern interpretation of Arabian luxury

The “Gold on 27” bar in the only 7-star hotel in the world, the Burj Al Arab, sets new standards in terms of interior and lighting design. The award-winning lighting concept was created with Delta Lighting Solutions and interior designers from Keane Brands.

The lighting planners skillfully used light to accentuate the design elements to perfection: the metallic surfaces, the gold patterns on the walls, the golden sculpture on the ceiling and the illuminated bar shelves.

“Lighting the shelving and work spaces was a special challenge for us because we were not allowed to change anything on the walls. But the wall curves precisely at this point. So the lighting also had to be curved,” says lead designer Patricia López-Yáñez. “We decided to use LINEARlight FLEX® ShortPitch because

these dimmable LED strips are very flexible and easy to cut, even into very small pieces. As a result, we were able to adapt them exactly to the counter and the shelves and achieve exactly the lighting effects we wanted. We used OPTOTRONIC® OTi DALI 75/220 LED drivers from OSRAM because they are so compact that you can install them even in the smallest of spaces.” The extremely small distance between LEDs means that the flexible LED strips provide sufficient illumination. A warm color temperature of 2,700 K highlights the golden color, and the satinized diffuser softly distributes the light along the back wall of the shelving. Despite the highly reflective metal surface, a diffuse light is produced.

Finally, for the perfect mood, programmable lighting scenes were created for sunset, night and special occasions.

Services beyond lighting

OSRAM EINSTONE®	1.02
EINSTONE® module	1.04
EINSTONE® basic	1.05
<hr/>	
Case study	1.06

OSRAM EINSTONE®

OSRAM EINSTONE® brings the offline and online worlds together using intelligent transmitter units known as beacons, thereby enabling the implementation of location-based services. The lighting installation provides a stable, secure and low-maintenance beacon infrastructure for these services. With EINSTONE® Smart Infrastructure and EINSTONE® Smart Retail, we can supply everything you require for your individual applications – from single components right through to complete solutions.

Comprehensive customer understanding for an exceptional customer experience

EINSTONE® Smart Retail

The EINSTONE® Smart Retail Solution offers retailers a holistic view of the customers. The intelligent combination of digital customer loyalty program, location-based marketing and the connection to CRM and POS systems will allow them to increase their revenue and the brand loyalty of their customers. Furthermore, our offering will create the ideal circumstances for custom omni-channel marketing.

EINSTONE® Smart Infrastructure

Lighting installations form the basis for our EINSTONE® Smart Infrastructure. Permanently supplied with power, the EINSTONE® beacon modules give you a stable and secure solution that is directly connected to the lighting installation. Not only does this ensure an ideal placement of beacons, it also reduces the necessary level of maintenance (and the associated costs) to an absolute minimum. EINSTONE® provides the basis for implementing a whole range of location-based applications in indoor facilities.

www.osram.com/einstone

The EINSTONE® Smart Infrastructure forms the basis for a variety of indoor location-based services. Combining the lighting installation with permanently powered beacons turns it into a positioning system.

Benefits

High signal quality

- Strong and stable signals:
iBeacon™, Eddystone™ URL (Physical Web™), Eddystone™ UID, AltBeacon™
- Homogeneous distribution
(through arrangement of the lighting installation)

Security

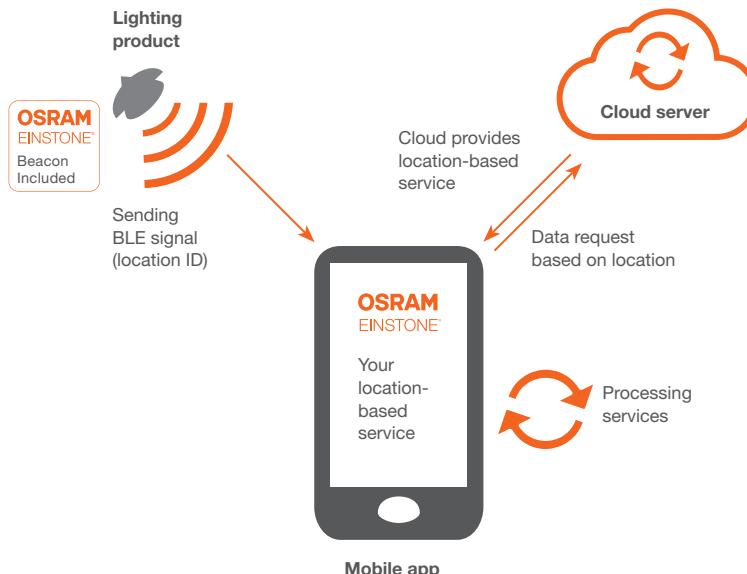

- High security and privacy standards in compliance with ISO/IEC 27018 standards
- Low risk for theft/physical manipulation due to integration in lighting installation

Low costs

- Low maintenance costs
- Integrated in existing lighting infrastructure

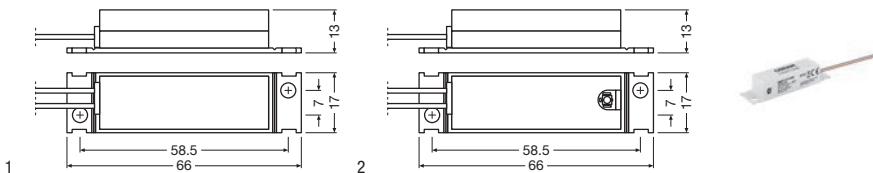

Easy management

- Beacon management & remote manageability via backend
- Over-the-air update management
- OSRAM firmware with energy management

EINSTONE® module

Case study

Relaxation in color: With a user-friendly concept, The House of Elemis Spa creates a comfortable atmosphere for its customers

For the complete renovation of the Elemis skincare brand's London spa, the lighting designers at Into Lighting worked with Virgile + Partner as lead designers to choose a relaxing, user-friendly concept with excellent technical support.

The new digital lighting system makes use of indirect light to create a sensual and calm atmosphere in the lounge areas and treatment rooms. A 2,700K color temperature was chosen in order to bathe the rooms in an inviting, warm-white light. All the furniture and fittings were highlighted by flexible LINEARlight Colormix Flex LED strips.

Color therapy is one of the services Elemis offers, so a homogeneous color-changing system was integrated in the treatment room ceiling rafts. These high-quality long-life LED strips are truly flexible – they are not only easy to bend and cut, but can also be installed and connected quickly. Using the EASY Color Control and EASY Hybrid Remote devices matched to the LED strips, the Elemis Spa therapists can easily set up the required lighting scene – without disturbing their customers.

Bringing light to your product

The advent of LEDs in the lighting industry has created unlimited freedom in light source design, thus enabling luminaires that have been unthinkable before. With our comprehensive portfolio of light engines and modules, our competence in lighting and uncompromised quality, we make our customers more successful in their businesses.

AC, DC, linear, square and round shapes, high-power, mid-power and low-power LED packages – the possibilities to create a light source seem endless. On the one hand, this provides the perfect opportunity to escape from the rigid boundaries of conventional lamps. However, on the other hand, this also creates new challenges: Matching the market needs for sustainable product propositions with fast-paced LED technology development.

Managing the technical changes required to keep a luminaire attractive over its entire production lifetime involves regular development efforts, e.g. component updates and qualification. These tasks increasingly bind valuable resources that are needed to innovate and stay competitive. We strive to support our customers by a smart component strategy to limit the effort for future product updates.

Easy to choose, easy to use

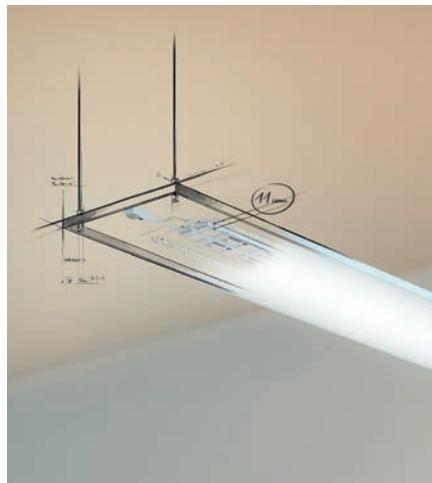

In addition to our existing performance-oriented products, we offer our customers economic alternatives. Therefore, our new portfolio provides an even wider range of products featuring increased flexibility and continuation for the changing requirements of luminaire projects:

PrevaLED® – our performance offer: exceptional performance with a comprehensive set of choices.

Basic – the economical alternative: attractive performance levels meet market standards with the reassurance of OSRAM quality.

We invite you to explore our product portfolio on the following pages. Our standard offer covers a wide range of applications and features smart solutions for outstanding products. But as we understand that every luminaire project is different, we also offer a customized approach to co-develop with you the component needed. Challenge us!

In combination with our LED drivers and LMS components, we offer system solutions that provide all the confidence and flexibility you need to stay focused on your business: **Delight your customers with the right product.**

Linear Light Engines – Summary of portfolio

Linear PrevaLED® modules

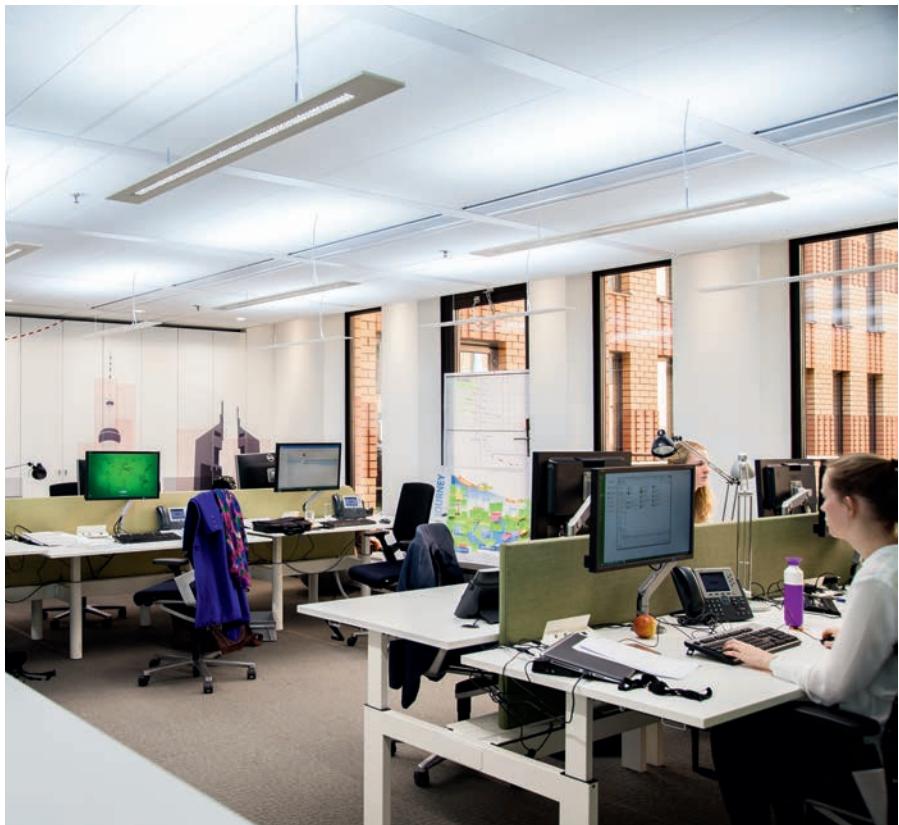

Switching to LED pays off, more and more with each passing day

The portfolio of linear LED modules is characterized by high quality and reliability as well as outstanding photometric properties. In a wide variety of applications, the modules demonstrate that, today, the switch to modern LED technology is as easy as it gets.

PrevaLED® Linear LED modules are sustainable solutions for linear lighting with state-of-the-art LED technology and a great alternative to traditional lamps. They provide efficient and high-quality light for the illumination of offices, shops, retail and industrial facilities.

From cost-efficient to highly efficient – a well-thought-out linear portfolio

Our product range for linear lighting solutions not only includes highly efficient LED modules but also cost-efficient alternatives, and thus opens up a variety of application possibilities for each luminaire type.

PrevaLED® Linear Tunable White

Biologically effective light

PrevaLED® Linear Tunable White is designed as a light engine that can be flexibly used for Tunable White/Human Centric Lighting (HCL) applications. It is used in recessed, surface-mounted and pendant variants or in floor-standing luminaires for almost all applications in offices, schools, health facilities or industrial areas.

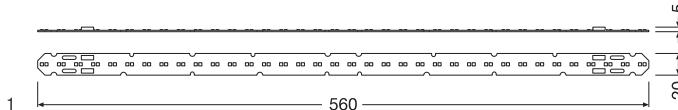

Dynamic light for enhanced well-being

The range includes an LED module that delivers warm white light (2,700 K) and cold white light (6,500 K). In combination with light management systems, it offers dynamic light scenarios such as brightness sequences or different color temperatures in the range between 2,700 and 6,500 K, thus simulating the course of natural daylight. At the location of the application, this type of dynamic light can have a positive impact on well-being and productivity.

What would a Tunable White light engine be without a driver or light management? Of course, the light engine is perfectly matched to the OPTOTRONIC® TW LED drivers. These can execute DALI DT8 for Tunable White/HCL applications as well as 2 x DALI DT6, e.g. direct/indirect lighting. A comprehensive light management range is the perfect complement to the application in terms of Tunable White/HCL. Whether for pure Tunable White applications with DALI DT8 (e.g. DALI MCU TW) or smaller as well as large HCL applications (e.g. DALIeco BT (RTC) or DALI PROFESSIONAL), OSRAM offers you the optimal solution for every application.

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table). / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values / In development, data preliminary

Product features¹⁾

- Module efficacy: up to 159 lm/W with 2,700 K
- Module efficacy: up to 164 lm/W with 6,500 K
- Luminous flux: 2,200 lm on 560 mm
- Color temperature range: 2,700...6,500 K
- Color rendering index R_a: > 80
- Initial color consistency: ≤ 3 SDCM
- Average lifetime (L80 B50): 50,000 h (temperature at T_c = 55 °C)

Areas of application

- Offices
- Educational sector
- Healthcare

Product benefits

- Tunable White by adjustable color temperature from 2,700 K to 6,500 K
- Non-isolated LED module with perfect match to 2-channel OPTOTRONIC® TW driver
- Cut-out area for shadow-free wiring
- High homogeneity thanks to tight LED pitch

PrevaLED® Linear G4

Highly efficient, powerful, versatile

PrevaLED® Linear G4 is characterized by its very high efficiency of up to 200 lm/W. This high-end lighting solution offers a wide range of light colors and lengths within the Zhaga LED module portfolio.

The champion for the widest range

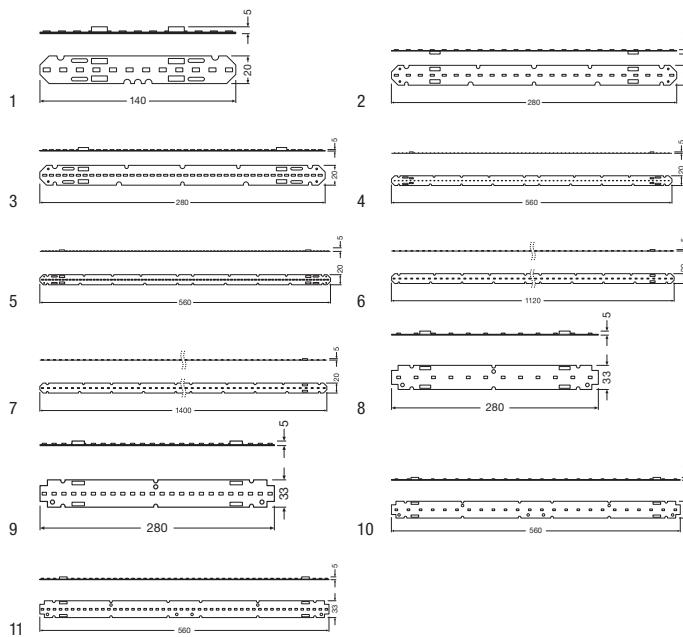

PrevaLED® Linear G4 is mainly used in solutions for industrial and office lighting. The LED modules with high luminous flux, for example, provide the powerful light needed for high-bay luminaires. LED modules with a length of 1,120 mm or 1,400 mm can be integrated easily into trunking systems and provide reliable lighting for production sites.

For office lighting projects, such as pendant or louver luminaires, surface-mounted or floor-standing luminaires, PrevaLED® Linear G4 offers unlimited possibilities. The product portfolio provides the widest range of light colors – from 2,700 K to 3,000 K, 4,000 K and 5,000 K to 6,500 K. Moreover, the portfolio not only features a color rendering index of CRI \geq 80 but also an excellent color rendering index of CRI \geq 90 and thus offers the highest levels of light quality.

PrevaLED® Linear G4 is matched to a broad range of OPTOTRONIC® Linear LED drivers – for SELV as well as non-isolated, DALI or on/off, programmable or non-programmable. It is therefore ready for universal use.

Product features¹⁾

- Available with luminous flux:
550 lm on 140 mm x 20 mm
- Available with luminous flux:
1,100 lm, 2,000 lm on 280 mm x 20 mm
- Available with luminous flux:
2,200 lm, 4,000 lm on 560 mm x 20 mm
- Available with luminous flux: 4,400 lm on 1,120 mm and 5,500 lm on 1,400 mm x 20 mm
- Available with luminous flux:
650 lm, 1,100 lm on 280 mm x 33 mm
- Available with luminous flux:
1,300 lm, 2,200 lm on 560 mm x 33 mm
- Available with color temperature:
2,700 K, 3,000 K, 4,000 K, 5,000 K or 6,500 K
- Color rendering index: > 80
- Color rendering index: > 90 for 1,100 lm,
2,000 lm on 280 mm x 20 mm
- Color rendering index: > 90 for 2,200 lm,
4,000 lm on 560 mm x 20 mm
- Average lifetime (L80 B10) for CRI ≥ 80: 50,000 h
(temperature at T_e = 55 °C)
- Average lifetime (L80 B50) for CRI ≥ 90: 50,000 h
(temperature at T_e = 55 °C)

Product benefits

- Up to 200 lm/W module efficiency for demanding lighting solutions
- Available with a wide range of color temperatures, lengths and color rendering indexes
- Cut-out area for shadow-free wiring
- Smart Fixation (SF) with back connector
- SELV or non-SELV module for easy luminaire design

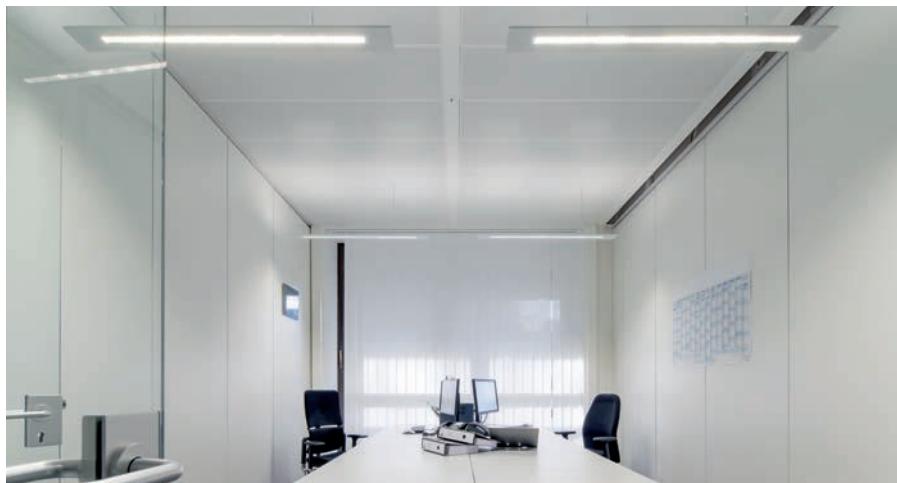

Areas of application

- Offices
- Industry

PrevaLED® Linear G4-P

The all-rounder among the LED modules

No matter for what type of luminaire, whether for pendant, surface-mounted and recessed luminaires in offices or trunking systems and high-bay luminaires in industrial applications, the PrevaLED® Linear G4-P LED module is the right choice when it comes to high-quality luminaire applications that focus both on economy and market-compliant efficiency.

Many luminaires, one answer

PrevaLED® Linear G4-P is tuned to exactly meet the market requirements for efficiency/cost and is used in all common luminaire designs for office and industrial

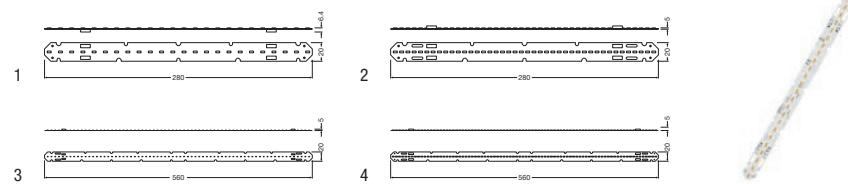

applications. We will continue to follow the efficiency/cost path with the upcoming product generations and thus ensure a future-proof solution.

The PrevaLED® Linear G4-P portfolio is suitable for both SELV and non-isolated operation. The advantage: Only one LED module for SELV and non-SELV luminaires.

Like all LED modules from OSRAM, PrevaLED® Linear G4-P is perfectly matched to the entire family of OPTOTRONIC® Linear LED drivers – for SELV as well as non-isolated, DALI or on/off, programmable or non-programmable.

Basic Linear G2

Economy as the key to success

For a variety of lighting applications that focus on economy, the Basic Linear G2 LED module has proven to be the right choice. Basic Linear G2 is primarily used in damp-proof or batten luminaires in car parks, storage rooms or corridors, which require high volumes.

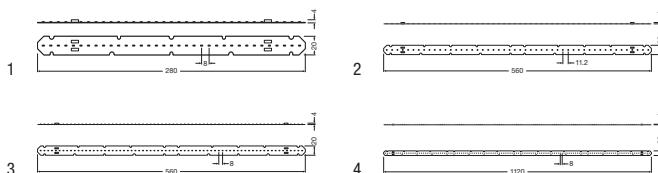

Easy mounting, variable use

Basic Linear G2 is designed for lumens per euro, without missing out on good light quality and performance. Luminaires with a length of 1.2 m, in particular, can be retrofitted to LED in no time at all with the 1,120 mm long LED module.

To fully highlight the economy, the product family Basic Linear G2 is completely matched to the cost-efficient OPTOTRONIC® FIT D or ELEMENT driver families. Thanks to the flexible driver choice, the application the luminaire is meant for can definitely be implemented.

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values / In development, data preliminary

Product features¹⁾

- Module efficacy: up to 153 lm/W
- Average lifetime (L70 B50): 50,000 h (temperature at T_p = 55 °C)
- Available with luminous flux: 1,100 lm on 280 mm
- Available with luminous flux: 1,550 lm, 2,200 lm on 560 mm
- Available with luminous flux: 4,400 lm on 1,120 mm
- Available with color temperature: 3,000 K or 4,000 K
- High initial color consistency: ≤ 3 SDCM
- CE marked

Product benefits

- Slim module for design of narrow luminaires
- Illumination comparable to that of reflector luminaires
- SELV or non-SELV module for easy luminaire design
- System match with OSRAM driver portfolio

Areas of application

- Underground carpark
- Industry (storage, warehouse)
- Suitable for indoor applications

Installation hints and tips

Current distribution across LED modules connected in parallel

In the past, the wiring of conventional lamps used to be specified in advance: Lamps were either directly connected to the mains supply or there was a specific terminal pair available on the driver for each lamp. Today, state-of-the art LED technology not only enables a larger variety

of possible applications, but also provides various options for the connection of modules and drivers to enable the ideal combination of constant-current drivers and LED modules. However, new challenges arise at the same time and perfect circuitry is more important than ever before.

Top: Measuring set-up with driver and modules without diffuser

Center: Real photo

Bottom: Luminance image in false color representation with single-side power supply

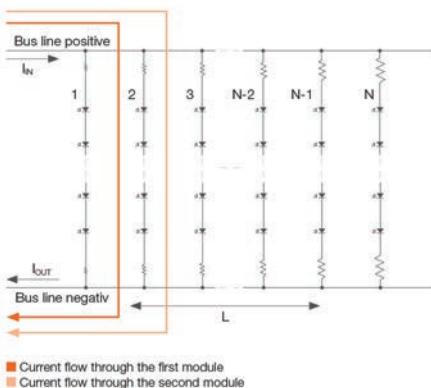

Right: Scale of the luminance image

The figure above shows a sample set-up with 12 PrevalLED® Linear units connected in parallel to an OTi DALI 80/220...240/2A1 LT2 L. Together, all the modules have an overall length of 3.36 meters. The false color representation clearly shows that the first module directly connected to the driver looks significantly brighter than the last module. This can lead to disturbing brightness jumps, for example when using

a light strip where the luminaires installed are flush with each other. In this example, power is supplied from one side and is looped through the individual modules. In this context, single-side power supply means that the plus and minus terminals on the same module side are used. This is illustrated once again in the following schematic representation.

Schematic representation – “single-side power supply”

The figure above shows an equivalent circuit diagram of the set-up. The parasitic resistances shown in the equivalent circuit diagram correspond to the unavoidable resistances of the lines, conductors and transition resistances on the terminals. These resistances add up depending on the number of modules and due to the

Equivalent circuit diagram – single-side power supply

Massachusetts, USA

^b OSRAM Licht AG, Garching, Germany

voltage drop on each module, the voltage decreases from one module to the next. For this reason, the current supplied by the driver cannot be distributed homogeneously across all LED modules – and the brightness level differs from module to module.

Top: Real photo

Bottom: Luminance image in false color representation with crossover power supply

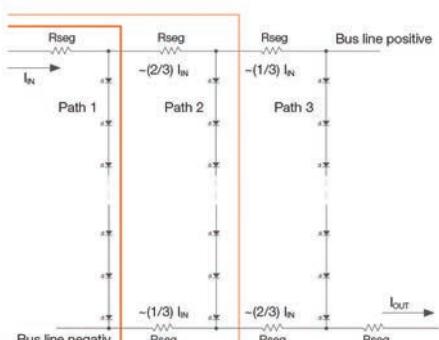

Right: Scale of the luminance image

The figure above shows the same set-up, but with different wiring. All the modules achieve almost the same brightness level. This is due to the fact that the positive terminal is connected to one side of the

modules connected in parallel and the negative terminal is connected to the other side. The following schematic representation illustrates this connection principle.

Schematic representation – “crossover power supply”

Equivalent circuit diagram – crossover power supply

Source: Luminous Flux and Current Uniformity Analysis in Linear LED Modules

Ming Li^a, Keng Chen^a, Arnulf Rupp^b,

Daniel Chu^a & Divya Vangari^a

^a OSRAM Sylvania, Inc., Danvers, Massachusetts, USA

^b OSRAM Licht AG, Garching, Germany

The figure on the previous page shows the equivalent circuit diagram of this connection principle. When looking at the current flow through the modules in the equivalent circuit diagram (orange and bright orange lines) and adding up the parasitic resistors, the total resistance per module is $3 \times R_{seg}$. This ensures that the current supplied by the driver is evenly distributed across all the LED modules.

The problem of uneven current distribution across LED modules connected in parallel especially concerns luminaires with Safety Extra-Low Voltage (SELV), because the currents are higher and the voltages are

lower. If the LED modules are consistently connected in series, each module is supplied with the same current and the problem described cannot occur.

Last but not least, it should be noted that a difference in brightness within a ready-manufactured luminaire can also be caused by other conditions such as incorrect module installation, inequalities or the contamination of reflectors and diffusers. Furthermore, other chemical impacts on the LEDs through the use of improper materials or caused by the environment etc. are also possible.

PrevaLED® Area G4

Light in a square

The LED module PrevaLED® Area G4 is ideally suited for area luminaires such as the widely used troffer luminaire. With only two LED modules, conventional luminaires are retrofitted to LED in the twinkling of an eye.

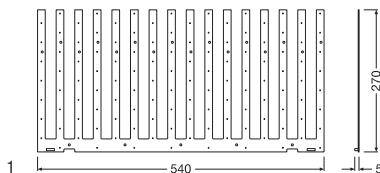

A very high efficiency of up to 178 lm/W, a high lumen package of 5,000 to 7,000 lumens and a choice of light colors of 3,000 K or 4,000 K provide the right light in a wide variety of applications.

Easy luminaire integration

The LED pitch is very small, which ensures a homogeneous illumination. PrevaLED® Area G4 is a SELV-only module and is perfectly matched to the OPTOTRONIC® SELV driver family. Luminaire integration is therefore quick and comfortable.

Basic Area G1

Ideal for cost optimization

For troffer luminaires that focus on economy and do not require a module efficiency higher than 150lm/W, Basic Area G1 is just the right thing.

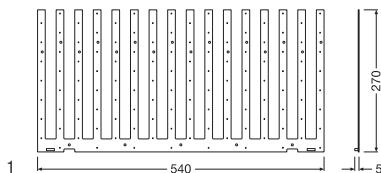

Basic Area G1 offers the same photometric properties as its big brother PrevaLED® Area G4. The only difference is a lower module efficiency of up to 150lm/W.

Homogeneous illumination

Basic Area G1, which is available in the light colors 3,000K and 4,000K, is also characterized by its very small LED pitch, which ensures a homogeneous illumination in all applications of troffer luminaires.

PrevaLED® Bar

The LED module among the trunking systems

With its three-row LED arrangement on the circuit board, the light engine PrevaLED® Bar is particularly suited for trunking systems, which are used, for example, in supermarkets or for shop & retail.

Retail applications

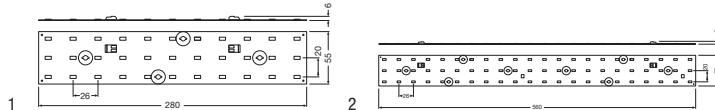

In terms of light quality, PrevaLED® Bar has excellent properties as the three-row LED arrangement reduces the luminance and therefore the glare.

PrevaLED® Bar is perfectly matched to optics that are currently available on the market (e.g. LediL® or Carclo®). Thus, the assembly of a professional trunking system becomes as easy as it gets. You have the choice between the light colors 3,000K, 4,000K and 6,500K, for a 280mm as well as a 560 mm long LED module.

PrevaLED® Bar is suitable for operation with SELV as well as non-isolated drivers. Rest assured that you will find the right driver for your application.

- Beam angle: 40°, 50° and 60°
- Available with length: 560 mm, 1,120 mm
- Material: PMMA

Areas of application

- Offices
- Industry

Product benefits

- Linear optic for PrevaLED® Linear 20 mm
- Quick and easy mounting thanks to plastic holder
- High transmission by diffuse optic
- High transmission by transparent optic

PrevaLED® Core G7

Smaller dimensions, larger selection, higher efficiency

Today, spotlights and downlights are becoming ever smaller and more efficient – but are expected to serve an even larger spectrum of applications. Whether in general lighting, shop lighting or special applications: The components must be suitable for use in a family of luminaires. The new product design of the PrevaLED® Core G7 enables optimized luminaire designs due to reduced loss of luminous flux. With its particularly low OCA height (Optical Contact Area) of just 3.5 mm and its small LES (Light-Emitting Surface) of only 10 mm or 15 mm, the reflector can be positioned very close to the light source and enables an improved light coupling and beam control. Both of these are ideal prerequisites for designing luminaires that feature optimized lighting technology and smaller overall dimensions.

Benefit from an extended range of LED modules for spotlights and downlights

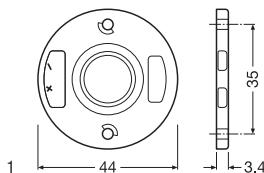

We offer a very large spectrum of power ranges, color temperatures and light qualities:

- 1,000, 2,000, 3,000 or 5,000 lm
- 2,700, 3,000, 3,500 or 4,000 K
- CRI >80 or >90
- Food colors: Meat, fish, bread or fruit and vegetables
- Fashion colors: White for clothing in brilliant colors and high contrast

Depending on the application, we recommend the combination of PrevaLED® Core G7 with our LED driver families OT FIT LT2 S and OT FIT CS G2 for an optimal OSRAM system solution. More details can be found in the chapter “LED drivers” and at www.osram.com/ds.

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

Product features¹⁾

- Complete portfolio with varying luminous flux, color temperature, color rendering
- Available with color temperature: 2,700 K, 3,000 K, 3,500 K or 4,000 K
- High module efficacy: up to 168 lm/W at T_p = 65 °C
- CE marked
- Lifetime (L80/B10): 60,000 h (temperature at T_p = 65 °C)

Product benefits

- Easy integration thanks to very compact form factor
- Easy cooling due to optimized efficiency and high maximum operation temperature
- High driver flexibility allows cost-effective and intelligent systems
- 5-year guarantee

Areas of application

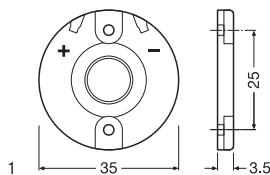

- Spotlighting in shops and retail
- Down- and wall lighting in offices, corridors, meeting rooms, workplaces
- Decorative and functional lighting in hospitality, hotels, restaurants
- Functional lighting in public and commercial buildings

1) For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- LED light engine with integrated driver
- Light-emitting surface, diameter, mounting holes positioning according to Zhaga Book 3
- Poke-in wire connection (no special connector required)
- Available with luminous flux: 800 lm, 2,000 lm
- System efficacy: up to 94 lm/W
- Color temperature: 2,700 K, 3,000 K or 4,000 K
- Color rendering index R_a: typ. 83
- Maximum housing temperature: 80 °C at T_c point
- Initial color consistency: ≤ 3 SDCM
- Power factor: > 0.95

Product benefits

- Connect directly to 220...240 V AC mains voltage for class 1 luminaires
- No external driver required
- Easy efficiency upgrade from generation 1 modules due to unchanged form factor
- Enables very high degree of freedom in luminaire design
- Allows very compact luminaire designs

- Less complexity in logistics as no external driver or special cables are required
- Enhanced safety thanks to protective cover glass and reversible thermal shutdown
- Easy to integrate due to compatibility with Zhaga Book 3 heat sinks and reflectors
- Chip-on-board technology with great homogeneity, no diffuser required
- 5-year guarantee

Areas of application

- Spotlighting in shops
- Down- and wall lighting in offices, corridors, meeting rooms, workplaces
- Decorative and functional lighting in the hospitality industry
- Accent lighting

PrevaLED® COIN

Light is reliable: Quickly connect to the LED age

There are a number of reasons why the PrevaLED® COIN 50 and PrevaLED® COIN 111 are very popular choices. Both products combine effortless and quick installation with easy operation with OSRAM drivers, long lifetime, high reliability and an amazing level of efficiency. Moreover, PrevaLED® COIN is highly flexible due to the easy replacement of the modules.

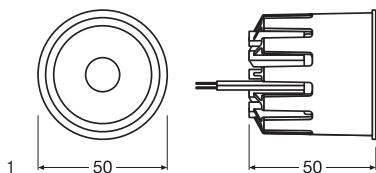

Both products have a broad range of application possibilities from attractive product presentation in shops and malls to beautiful illumination of exhibits in galleries or museums to spot lighting, e.g. in retail stores.

They are also simple solution replacements for MR16 and AR111 form factors with light, optics and heat sink. They offer:

- Best luminous efficacy in combination with OPTOTRONIC® constant-current ECG
- Easy and quick design-in for luminaire manufacturers
- High luminous flux packages
- Perfect replacement for existing lamps
- Excellent appearance
- Quick and comfortable initial installation

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

Product features¹⁾

- Consistent white light: < 3 SDCM
- Color rendering index R_a: > 80 and > 90
- Luminous flux: 980...1,500 lm (model-dependent)
- Beam angle: 15° (on demand), 24°, 40°

Product benefits

- Compact design
- Compatible with conventional MR16 lamps
- High color temperature consistency throughout the whole module
- Complying with IES TM30
- Multi-shadow-free illumination thanks to single light source
- 5-year guarantee

Areas of application

- Retail outlets
- Shop lighting
- Restaurants
- Hospitality
- Museums, galleries

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table). For current photometric data and important safety, installation and application information, see www.osram.com/led-systems. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Fits into most existing traditional MR16 luminaires
- Available with 24° or 40° beam angle
- Versions with different luminous fluxes and different color temperatures available
- Cable length: 500 mm, suitable for 1.6 mm²/AWG 22 wires
- Color rendering index R_a: typ. 92 or typ. 83 (depending on version)
- Module efficacy: up to 112 lm/W
- High color consistency: 4 SDCM
- Temperature at T_p point (according to IEC 62717): 75 °C
- Maximum temperature at T_c: 95 °C (according to IEC 62717)
- Lifetime (L70/B50): 50,000 h (temperature at T_c = 75 °C)

Product benefits

- Best luminous efficacy in combination with OPTOTRONIC® constant current ECG
- Easy and quick design-in for luminaire manufacturers
- High luminous flux
- Easy installation thanks to wiring with only two cables
- 5-year guarantee

Areas of application

- Shops
- Display cabinet lighting
- Shelf lighting
- Elevators
- Hospitality, hotels, restaurants
- Corridors

1) For current photometric data and important safety, installation and application information, see www.osram.com/led-systems. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Integrated driver, heat sink and lens optics
- Fits into most existing traditional MR16 luminaires
- Available with 24°, 40° or 60° beam angle
- Versions with different luminous fluxes and different color temperatures available
- Dimmable (with suitable phase-cut dimmers)
- IP44-protected module
- Lifetime (L70/B50): 35,000 h (temperature at T_c = 73 °C)

Areas of application

- Shop lighting
- Shopping centers
- Exhibition halls
- Museums

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

Product features¹⁾

- Type of protection IP65 according to DIN EN 60529
- The modules can only be connected in series
- Two-core connecting cable (500 mm)
- Dimmable

Product benefits

- Metal package for optimum heat removal
- Integrated M10x1.5 thread for simple installation
- No additional heat sink required
- Narrow beam angle for use as a spot source
- Perfect centering thanks to flange on the floor of the casing (diameter 12 mm)
- Low maintenance costs thanks to a lifetime of up to 70,000 h
- 5-year guarantee

Areas of application

- For accent, orientation or route lighting
- Shelf and furniture lighting
- Suitable for outdoor use

Light engines and LED modules

PrevaLED® Flat AC G2

© Stefan Müller, Berlin

Simple and flat design for intelligent luminaires

Our PrevaLED® Flat AC G2 system provides an all-in-one solution to create flat and highly diffuse wall-mounted and ceiling-mounted luminaires. The popular project uses are in functional or decorative areas in hospitality or office applications.

PrevaLED® Flat AC G2 light engines provide several specific benefits:

- Only a small design-in effort is needed (integrated system solutions).
- Energy savings and an attractive application design can be achieved by using sensor technology.
- They provide high performance in terms of efficiency and quality of light.
- A touch protect accessory allows for safe operation in luminaires that can be opened by the end user.

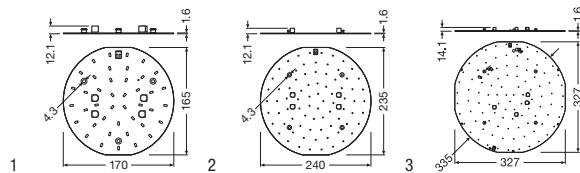

The PrevaLED® Flat AC G2 series is available in 5 different versions:

- PC version PL-FLAT-AC-PC: Includes driver on board, phase cut dimmable
- Emergency version PL-FLAT-AC-EM: Emergency lighting for single battery systems and also for central battery system
- Master version PL-FLAT-AC-MA: Includes HF sensor and ambient light sensor as well as MA/SL control
- Slave version PL-FLAT-AC-SL: To be connected to the Master version for corridors up to 35 m in length
- DALI version PL-FLAT-AC-DA: Fully dimmable and DALI-compatible

Product features¹⁾

- Dimmable (with suitable phase-cut dimmers)
- Designed for wall and ceiling luminaires with diffuse light distribution
- Low-cost LED replacement of CFL wall and ceiling luminaires
- Driver integrated on LED board
- Available diameter: 170 mm, 240 mm
- Available with color temperature: 3,000 K or 4,000 K
- Available with luminous flux: 1,500 lm, 2,500 lm, 3,300 lm

Product benefits

- Touch protection accessory for simple use in luminaires
- High reliability
- Easy to use
- Optimized design for simple thermal management
- Enables thin and efficient luminaire designs
- High quality of light thanks to low modulation
- 5-year guarantee

Areas of application

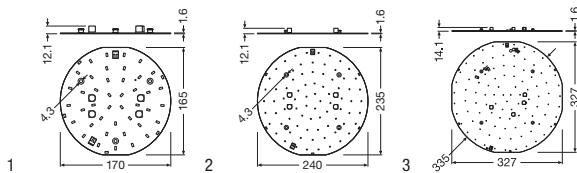

- Corridors
- Stairways
- Landings
- Hallways

1) For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Slave controlled by Master for dimming to 10 % and auto off at daylight
- Separate LED circuit for operation on local emergency lighting driver
- Designed for wall and ceiling luminaires with diffuse light distribution
- Low-cost LED replacement of CFL wall and ceiling luminaires
- Driver integrated on LED board
- Available diameter: 170 mm, 240 mm
- Available with color temperature: 3,000 K or 4,000 K
- Available with luminous flux: 1,500 lm, 2,500 lm

Areas of application

- Corridors
- Stairways
- Landings
- Hallways

Installation hints and tips

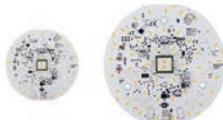

How to use the PrevaLED® Flat AC G2 Master/Slave system

I) Introduction

Take advantage of our “all-in-one device” PrevaLED® Flat AC with integrated driver on board for your extremely flat designs in large and standard-diameter luminaires with diffusers. The module creates a very homogeneous light. The optional functions

cater to all requirements for corridors and circulation areas, including emergency lighting and additional energy saving thanks to motion sensing. Our current and recently expanded PrevaLED® Flat AC portfolio comprises four diameters/lumen packages:

170 mm	240 mm	335 mm	415 mm
1500 lm	2500 lm	3300 lm	4000 lm

Master/Slave

(planned)

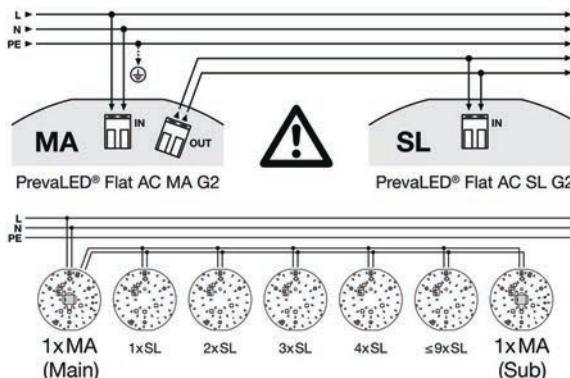

Please note:
Master/Slave devices are currently only available in 170 mm and 240 mm diameter.

II) Typical application topics with focus on PrevaLED® Flat AC G2 Master/Slave system

Our PrevaLED® Flat AC G2 Master/Slave system saves our customers money because one Master device (incl. HF motion detection sensor) can be combined with up to 10 Slave devices, which are much less expensive. Thus, a cost-efficient total set-up of 11 luminaires per system (and up to 5 Masters) is possible. One Master/Slave system can cover a maximum corridor length of approximately 35 meters. Tips for proper implementation when using more than one Master device:

1) Wiring: Master-Slave (MA/SL) – Multi-Master systems

The wiring of a PrevaLED® Flat AC G2 Master/Slave system is simple: One Master is connected directly to the mains (→ Master-in terminal), which makes this Master the main Master of the system. All other devices, such as Slaves or further Masters, must be connected to the Master-out connector of the main Master (see following picture on the following page).

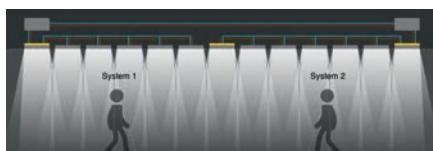

Further Masters operate as sub-Masters when connected to the output of the main Master. Please never connect the Master-out connector to the mains voltage as this destroys the device.

The available OSRAM YouTube™ video below shows the correct Multi-Master wiring as well as the operating mode of a PrevalLED® Flat AC G2 Master/Slave system: www.osram.com/prevalledflatms

2) MA/SL multi-system set-up

For corridor applications longer than 35 meters, a set-up of multiple MA/SL systems may be appropriate. These stand-alone systems are triggered separately and work independently to save as much energy as possible as well as costs.

3) Functionality overview: main Master vs. sub-Master

Identification of Master and sub-Master/s in existing installations:

The main Master can be identified by the fact that the entire system dims down when any button on the Master (see point 4: "A", "H" or "L") is pressed (= commissioning mode). A sub-Master can be identified by the fact that only the light engine dims down when any of its buttons is pressed.

Operation of a PrevalLED® Flat AC G2 Master/Slave system comprising two or more Masters:

All PrevalLED® Flat AC G2 Masters of a system have the same functionality as, for example, PrevalLED® Flat AC G2 HF and also support the Master functionality.

The setting of the following parameters, however, is not possible on any sub-Master and the corresponding menu levels cannot be addressed:

— Hold time

The hold time of the system can only be adjusted on the main Master. When pressing the “hold time” button on a sub-Master, its display continuously shows “0”.

— Corridor function

The corridor function can only be activated on the main Master. When trying to activate the corridor function on a sub-Master, the corresponding menu level is disabled.

— Luminaire mode

A sub-Master cannot be set in luminaire mode. The corresponding menu level is disabled.

— Teach-in mode for ambient light threshold

The teach-in function cannot be activated on a sub-Master. The relevant menu level “6” is not accessible in this case.

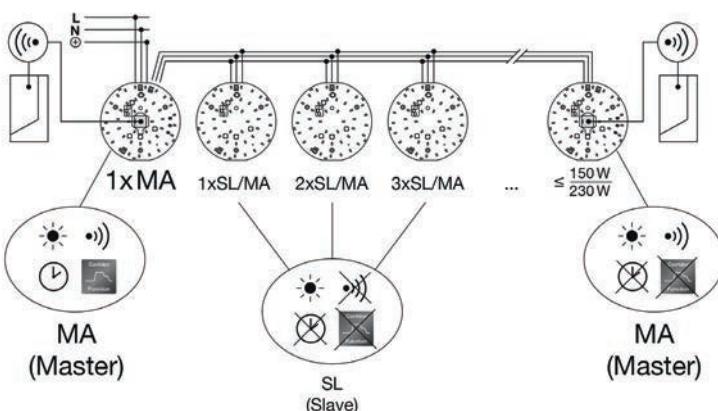

— Deactivation of motion detection

If motion detection is deactivated on the main Master, all light engines operate as on/off modules. If motion detection is deactivated on a sub-Master, this operates as a Slave (motion detection deactivated).

In the “off” state, all Masters continuously measure their ambient light level, and the sub-Masters send the appropriate information to the main Master. When the corridor function is activated, the light engine never switches off, and light measurement is automatically and permanently deactivated.

The main Master and all sub-Masters continuously monitor whether a motion occurs inside their detection area. Whenever a low light level is measured on one of the Masters and motion is detected anywhere in the system, the light is switched on. Low light level measurement and motion detection must not necessarily be in the same position. If the ambient light measurement is deactivated on one or more Master light engines, all ambient light levels are ignored and the system turns the lights on as soon as motion is detected in the system.

Please do a quick functionality check of the main Master, Slaves and sub-Master by referring to the picture below:

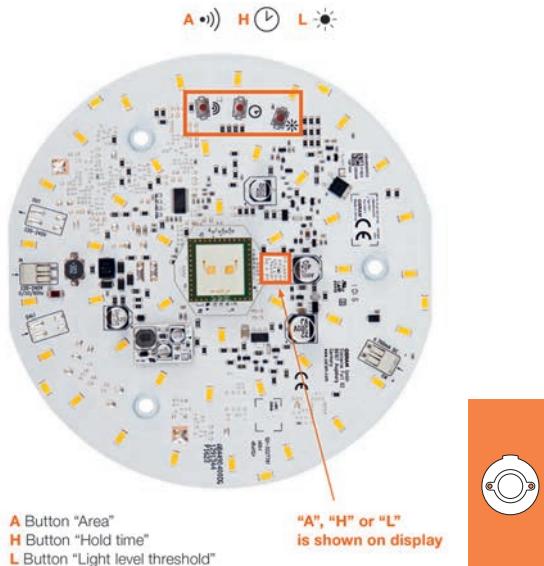

4) User interface and commissioning functions

The picture on the right shows the positions of the buttons for commissioning.

(If you press any button to switch to commissioning mode, the luminaire dims immediately down to 5 % to avoid glare.)

An installed PrevaLED® Flat AC G2 Master/Slave system works with the standard factory settings. For more information on user-specific settings of the interface for the PrevaLED® Flat AC G2 MA version, please refer to the cockpit chart below, which shows the various commissioning functions as well as the factory settings:

OSRAM	A Button "Area"	H Button "Hold time"	L Button "Light level threshold"
MAIN MENU (Level 1)	DETECTION AREA	HOLD TIME	DAYLIGHT THRESHOLD
Parameter/Display	A	H	L
Level	0 off 1 10% 2 25% 3 50% 4 75% 5 90% 6 100%	0 1s 1 10s 2 30s 3 60s 4 3min 5 5min 6 10min 7 15min	0 off 1 -5lux 2 -50lux 3 -100lux 4 -300lux 5 -500lux 6 teached value
	(100% = approx. 3.5 meters conical detection range; for ceiling applications: Up to 10 meters height)		
SUB-MENU (Level > 3)	LUMINAIRE MODE	CORRIDOR FUNCTION	TEACH MODE
Parameter/Display	E	C	P
Level	0 Luminaire mode enabled 1 Luminaire mode disabled	0 100% (hold time) → 10% (10s) → 0% 1 100% (hold time) → 10% 2 100% (hold time) → 10% (Xs = "H") → 0%	0 off 1 Light will remain "on" for 1 minute (display shows a blinking "P"). Light will turn "off" for 1 s. Daylight value will be measured now and saved as new threshold. Light will return to 100%.
	F FACTORY RESET By pressing the button A "Area" and H "Hold time" simultaneously for 3 seconds → the display shows "F"

III) Did you know?

Additional tips & tricks

The best diffuser distance depends on the material characteristics of the diffuser and can differ from use case to use case. Different or unknown materials can influence the behavior of the HF sensor (e.g. reflecting rays can disturb the sensor). Before you use your own cover, we recommend that you carry out tests to ensure the correct functioning of the HF sensor.

 General HF sensor calibration function:
Once turned on, the antenna signal evaluation function measures the disturbance spectrum of the environment. This can take up to two minutes.

During this calibration process, the module can “flash” again if it detects a movement that is “not present”. If the permanent disturbance spectrum of the luminaire environment changes, the changed environmental conditions are triggered again during the calibration process. (That is why the PrevaLED® Flat AC G2 device may be “flashing”, and this calibration mode takes up to two minutes.) This is a built-in advantage to ensure a long-term unrestricted, optimal functioning of the sensor.

If, for example, a ceiling fan is also installed and moves around during this two-minute calibration process, this device will be detected not as a movement but as “permanent disturbance” or general environment.

To ensure a certain standard of quality, the HF sensor is subjected to a 100 % functionality test in every device. Every PrevaLED® Flat AC G2 device with HF sensors is tested after production.

IV) Bonus

For more technical and application-related topics, visit our website and download the Application Guide now.

You can find more information on our PrevaLED® Flat AC G2 light engine family on our website.

For our PrevaLED® Flat AC G2 phase cut version, a dimmer compatibility overview is available on request.

Here is a short overview of the five different versions of PrevaLED® Flat AC G2:

- **PC (phase cut) version
PL-FLAT-AC-PC**
Includes driver on board
- **Emergency light version
PL-FLAT-AC-EM**
Includes C-EM (central battery) and L-EM (local battery) function
- **Master version PL-FLAT-AC-MA**
Includes HF sensor and ambient light sensor, C-EM and L-EM function and MA/SL control
- **Slave version PL-FLAT-AC-SL**
To be connected to the Master version
- **DALI version PL-FLAT-AC-DA**
Fully dimmable and DALI-compatible, includes C-EM and L-EM function

Flexible LED strips – Summary of portfolio

Find the perfect solution to every customer's need with the Flex portfolio

Freedom of design with LINEARlight FLEX® LED strips

LINEARlight FLEX® LED strips are the best choice for representative and prestigious applications, enabling the design of professional and durable lighting solutions.

OSRAM provides highest-quality shop lighting solutions for almost any project and application. You can create just the right effect to highlight products perfectly or to gently guide people through a shopping mall with our extensive product portfolio of dynamic Tunable White, high CRI, shop whites and more.

Set the stage for brilliant products, avoid yellowish effects, maintain vivid colors and make vegetables, cheese and meat appear delicious with the right special white LED strip.

Sophisticated lighting projects require a strong connection between architecture, function, light and a perfect interaction between daylight and artificial light. OSRAM provides an ideal solution with the white, Tunable White and RGBW LINEARlight FLEX® LED strips.

OSRAM LINEARlight FLEX® RGB and RGBW provide vivid colors with full single binning for homogeneity and ensure that the pure white and color consistency are maintained throughout large installations and over time.

Our monochromatic versions offer excellent color stability and enable the possibility to have solid colors without the need of a control system. Diffused colors are also available.

Effective solutions with VALUE Flex® LED strips

Create the desired lighting atmosphere, set decorative accents, or highlight products: in the blink of an eye with the new generation of the OSRAM VALUE Flex® LED strips. Thanks to improved features, you can design homogeneous lighting with just the right amount of light in a wide range of color temperatures.

VALUE Flex® LED strips bring homogeneous light into narrowest coves and perfectly illuminate every space with a large selection of various light colors.

The product family not only offers lumen packages from 300 to 2,400lm/m with an efficacy of up to 140lm/W. Thanks to

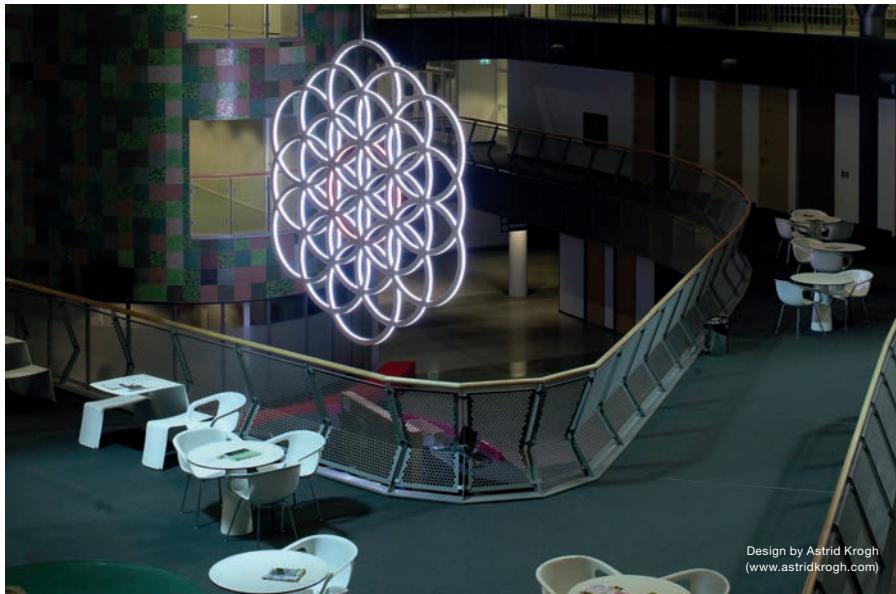

VALUE® Flex, OSRAM provides even more options for various applications: just the right solution for comfortable ambient lighting as well as brightly illuminated rooms. The new ShortPitch versions are available as protected (IP66) and non-protected LED strips (IP20): simply ideal to create homogeneous lighting solutions.

Combined with ON/OFF ELEMENT LED drivers, dimmable OTi DALI LED drivers, protected OPTOTRONIC® devices and our extended range of connectors, tracks and covers, you can design the ideal lighting solution for every need.

Shaping light – realize your own design

Design by Astrid Krogh
(www.astridkrogh.com)

OSRAM provides the possibility to customize flexible LED strips and realize unique projects. Determine the desired design and functionality and we will manufacture suitable high-quality LED strips.

We offer many possibilities, including custom-made solutions, in addition to our standard portfolio:

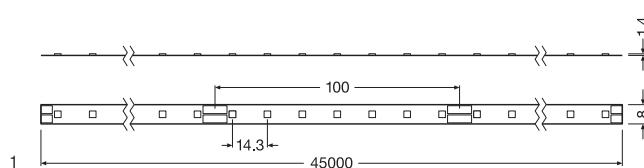

- Longer length reels for automated processing
- Private or personalized labels and marking
- Special light colors
- Semi-finished assemblies
- Extended performances and warranty

We can help in creating the right product to fit any need. OSRAM experts are always available to support you in making the best choice between various possible solutions. We accelerate your design-in activity thanks to our extensive knowledge and well-equipped, certified laboratories. We offer high-quality and reliable products made in Italy and we count on our "Quality First" culture.

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values / In development, data preliminary / More versions available on request.

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 3,000 lm/m
- Module efficacy: up to 138 lm/W
- Dimmable with PWM technology
- Fine White (3 SDCM)
- 45,000 mm reel

Product benefits

- Large selection of light colors
- Great design freedom thanks to flexibility and cuttability of module
- Simple mounting and connection
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- High luminous flux
- Extraordinary design and high-quality materials
- Type of protection: IP00

Areas of application

- Architecture lighting
- Cove lighting
- Ceiling integration

Equipment/Accessories

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

- Adjustable color temperature via Tunable White: 2,700...6,500 K
- Adjustable color temperature via Tunable White: 2,200...3,500 K
- Adjustable color temperature via Tunable White: 2,400...3,500 K

Product benefits

- Simple mounting and connection
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- High luminous flux
- Extraordinary design and high-quality materials
- Pre-soldered wires (TWW versions)

Areas of application

- Cove lighting
- Shop lighting
- Offices

Equipment/Accessories

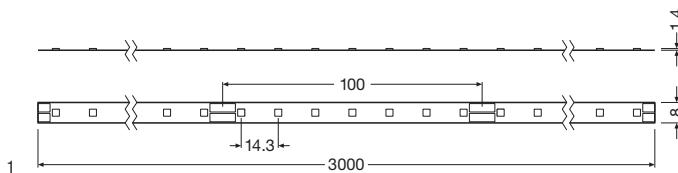

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional SLIM TRACK System
- Perfectly matched to OPTOTRONIC® OTi DALI 50/220...240/24 TW
- Perfectly matched to OPTOTRONIC® OTi DALI 80/220...240/24 TW

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 3,850 lm/m
- Module efficacy: up to 133 lm/W
- Dimmable with PWM technology
- Fine White (3 SDCM)
- High CRI versions: typical average value 95

Product benefits

- Single bin technology for very good color consistency over time and space
- Large selection of light colors
- Large selection of white tones
- High luminous flux suitable for general lighting
- "Shop White" versions available for great color rendering without yellowing effect
- Great design freedom thanks to flexibility and cuttability of module
- Extraordinary design and high quality materials
- Simple mounting and connection
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Areas of application

- Cove lighting
- Ceiling integration

Equipment/Accessories

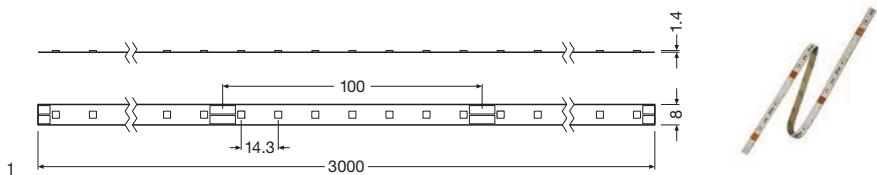

- Simplified connection with the optional CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

²⁾ Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip
- Fine White (3 SDCM)
- Available luminous flux: up to 2,000 lm/m

Product benefits

- Makes fresh foods more attractive
- Prevents "yellowing" appearance of white-colored foods
- Simple mounting and connection
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Areas of application

- Fresh food counters
- Special purpose LED strip for fresh food counters lighting
- Suitable for white meat, fish, cheese and vegetables
- Not suitable for general lighting

Equipment/Accessories

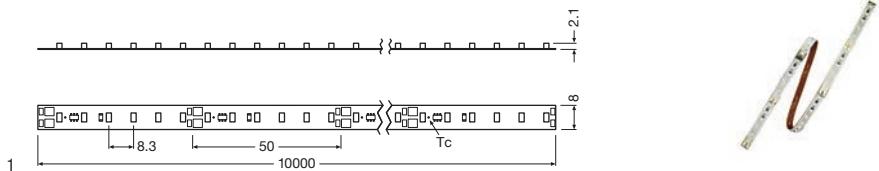

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 850 lm/m
- Module efficacy: up to 99 lm/W
- Dimmable with PWM technology
- Fine White

Product benefits

- Very small LED spacing
- Great design freedom thanks to flexibility and cuttability of module
- Simple mounting and connection
- Toolless connection with the optional SLIMCONNECT system G2
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Areas of application

- Edge coupling
- Small coving
- Path lighting
- Contour accent lighting
- Signage
- Advertising and lettering

Equipment/Accessories

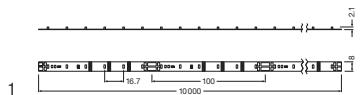

- Simplified connection with optional matching SLIMCONNECT system G2
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 400 lm/m
- Module efficacy: up to 88 lm/W
- Dimmable with PWM technology
- Fine White

Product benefits

- Very long for seamless bands of light
- Large selection of light colors
- Great design freedom thanks to flexibility and cuttability of module
- Simple mounting and connection
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Areas of application

- Cove lighting
- Signage
- Advertising and lettering

Equipment/Accessories

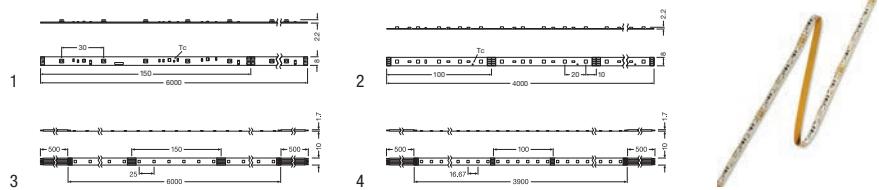

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

2) Color binning / With RGB wavelengths: R/G/B 625/525/465 nm

3) Color binning / With RGB wavelengths: R/G/B 625/525/465 nm / White point binning

4) Full single bin on white and each color / With RGB wavelengths: R/G/B 622/534/485 nm

5) Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip with inline multichip RGB LEDs
- RGBW: full single bin on each color and white

Product benefits

- Uniform color changing
- Great design freedom thanks to flexibility and cuttability of module
- Simple mounting and connection
- Type of protection: IP00
- Toolless connection with the optional CONNECTsystem for RGB
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Areas of application

- Effect lighting in architecture
- Injection of light into displays and low-profile light guides
- Dynamic effects in public zones

Equipment/Accessories

- Simplified connection with optional matching CONNECTsystem for RGB
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

2) Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 3,000 lm/m
- Type of protection: IP67
- Dimmable with PWM technology
- Fine White (3.5 SDCM)

Product benefits

- High luminous flux
- Great design freedom thanks to flexibility and cuttability of module
- High-performance silicone for extremely long life and flexibility
- Simple connection thanks to premounted connectors
- Extraordinary design and high quality materials
- Toolless connection only if using the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- Outdoor use possible: UV and salt mist resistant (UV acc. to ISO 4892-2 – Method A, salt mist acc. to IEC 60068-2-52 severity 1)

Areas of application

- Facade accent lighting
- Ceiling integration
- Wall integration
- Cove lighting
- Machine lighting
- Path lighting
- Suitable for outdoor use

Equipment/Accessories

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories[®])
- Perfectly matched to OPTOTRONIC[®] 24 V electronic control gears

LF06A-W3F-870-P ¹⁾	120	60	A++ ²⁾	8	1

1) Module perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Applicable on smallest operable unit

Product features¹⁾

- Flexible and cuttable LED strip
- Luminous flux: up to 420 lm/m
- Type of protection: IP67
- Dimmable with PWM technology
- Fine White (3.5 SDCM)
- Salt mist proof

Areas of application

- Cove lighting
- Wall integration
- Hand rails and corridors
- Machine lighting
- Path lighting
- Signage
- Suitable for outdoor use

Product benefits

- Very long for seamless bands of light
- Great design freedom thanks to flexibility and cuttability of module
- High-performance silicone for extremely long life and flexibility
- Simple connection thanks to premounted connectors
- Extraordinary design and high quality materials
- Toolless connection with the optional CONNECTsystem
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back

Equipment/Accessories

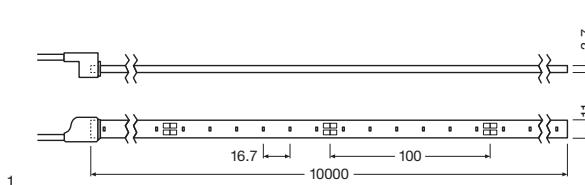

- Simplified connection with optional matching CONNECTsystem
- Quick installation with optional track system (OSRAM Flexessories®)
- Perfectly matched to OPTOTRONIC® 24 V electronic control gears

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems. All the technical parameters apply to the entire module.

To view the detailed manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

2) Applicable on smallest operable unit

Product features¹⁾

- Diffused light lines without visible spots
- Flexible and cuttable module to support design freedom
- Long operational length per single power feed possible (up to 6 m)
- Ideal for luminaire designs
- Extra strong self-adhesive back for easy mounting
- 24 V technology for easy dimensioning
- Recommended in system use with OPTOTRONIC®
- Increased reliability due to single-piece reel-to-reel technology
- Dimmable with PWM technology

Product benefits

- IP67 protection with high-performance silicone
- Outdoor use possible: UV and salt mist resistant (UV acc. to ISO 4892-2 - Method A, salt mist acc. to IEC 60068-2-52 severity 1)

Areas of application

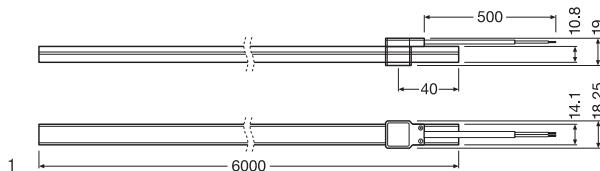

- Individual and customized luminaires
- Organic-shaped luminaires
- Architectural integration – e.g. coves, walls
- Object integration – e.g. handrails
- Signage and illuminated advertising

²⁾ Applicable on smallest operable unit

Product features¹⁾

- Available with light color: Warm White, Cool White
- Luminous flux: up to 1,600 lm/m
- High color consistency: 4 SDCM
- Self-cooling
- Beam angle per module: 120°
- Dimmable with suitable OPTOTRONIC® LED drivers
- Type of protection: IP00

Areas of application

- Hospitality
- Signage
- Architecture lighting
- Cove lighting
- General illumination
- Wall integration
- Display cabinet lighting

Product benefits

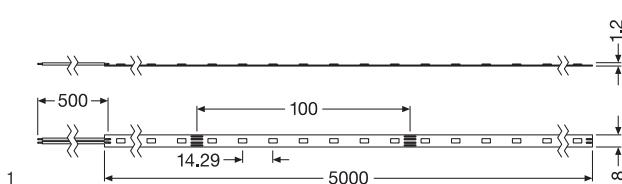

- Energy-saving low-power flexible LED strip
- Pre-wired LED strip, simple and quick plug-and-play installation
- Good light output due to homogeneous LED distance and high color consistency
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- Easy installation with optional track system
- Easy to cut and reconnect to the reliable SLIMCONNECT system

Equipment/Accessories

- SLIMCONNECT system FLEX connector
- Optional track system
- ELEMENT LED drivers
- OPTOTRONIC® LED drivers

- High color consistency: 4 SDCM
- Self-cooling
- Beam angle per module: 120°
- Dimmable with suitable OPTOTRONIC® LED drivers
- Type of protection: IP00

Product benefits

- Energy-saving low-power flexible LED strip
- Pre-wired LED strip, simple and quick plug-and-play installation
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- Easy installation with optional track system
- Easy to cut and reconnect to the reliable SLIMCONNECT system

Areas of application

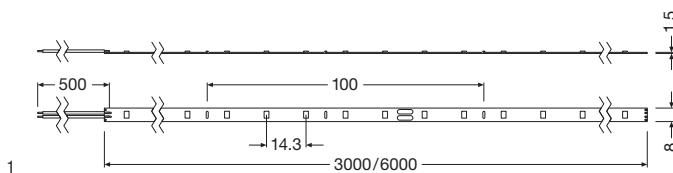

- Hospitality
- Under-cabinet lighting
- Shelf lighting
- Decorative lighting

Equipment/Accessories

- SLIMCONNECT system FLEX connector
- Optional track system
- ELEMENT LED drivers
- OPTOTRONIC® LED drivers

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values

²⁾ Applicable on smallest operable unit

Product features¹⁾

- Available with light color: Warm White, Cool White
- Luminous flux: up to 1,000 lm/m
- High color consistency: 4 SDCM
- Self-cooling
- Beam angle per module: 120°
- Dimmable with suitable OPTOTRONIC® LED drivers
- Type of protection: IP00

Product benefits

- Energy-saving low-power flexible LED strip
- Pre-wired LED strip, simple and quick plug-and-play installation
- Good light output due to homogeneous LED distance and high color consistency
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- Easy installation with optional track system
- Easy to cut and reconnect to the reliable SLIMCONNECT system

Areas of application

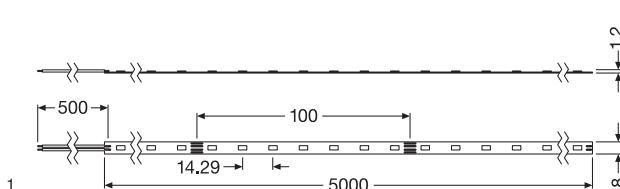

- Hospitality
- Signage
- Architecture lighting
- Cove lighting
- General illumination
- Wall integration
- Display cabinet lighting

Equipment/Accessories

- SLIMCONNECT system FLEX connector
- Optional track system
- ELEMENT LED drivers
- OPTOTRONIC® LED drivers

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

²⁾ Applicable on smallest operable unit

Product features¹⁾

- Available with light color: Warm White, Cool White
- Luminous flux: up to 890 lm/m
- IP66 protection
- High color consistency: 4 SDCM
- Beam angle per module: 120°
- Dimmable with suitable OPTOTRONIC® LED drivers

Product benefits

- Energy-saving low-power flexible LED strip
- Pre-wired LED strip, simple and quick plug-and-play installation
- Good light output due to homogeneous LED distance and high color consistency
- Easy mounting on many smooth surfaces thanks to self-adhesive tape at the back
- Easy installation with optional track system
- Protection against the ingress of water according to IP66
- Multi-cuttable LED strip with SLIMCONNECT system G2

Areas of application

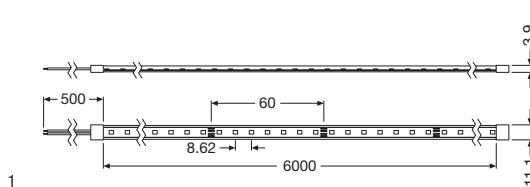

- Wet or damp areas
- General illumination
- Hospitality
- Display cabinet lighting
- Signage
- Architecture lighting
- Wall integration
- Suitable for outdoor use

Equipment/Accessories

- SLIMCONNECT system G2
- Optional track system
- ELEMENT LED drivers
- OPTOTRONIC® LED drivers

Complete every project with our Flexessories® range

Cover a wide range of applications with Flexessories®

Create tailored solutions with LINEARlight FLEX® LED modules for a great variety of different applications. Four different track systems (slim track, handrail track, wide track and edge lighting track) and further Flexessories® allow you to make your flexible LED solution complete and create a unique system that exactly meets your needs.

Do you know the OSRAM system guarantee?

We recommend always to use LED strips in combination with OSRAM OPTOTRONIC® constant-voltage LED drivers. With this system, we offer an extended system guarantee.

Guarantee conditions and details:

LED modules for light advertising and backlighting – Summary of portfolio

LED modules for illuminated signage and backlighting

LED modules are becoming ever more popular for the backlighting of buildings, for example for illuminated signage. The advantages are obvious. Compared to traditional lighting solutions using neon or T5/T8 fluorescent lamps, LED modules have longer lifespans and thus less service intervals. Significant energy costs can

be saved thanks to higher efficiency levels. With LEDs as point light sources combined with optics designed specifically for the application, highly homogeneous backlighting is achieved, offering a new level of design freedom. Colored LED modules can also be integrated into the application to positively intensify perception of the backlight object or building.

With an efficient complete system, OSRAM is setting standards in modern illuminated advertising. The range of services includes:

- BackLED® and BoxLED® modules with robust designs including high IP protection
- Wide range of module sizes: XS, S, M, L, XL and DS (double-sided)
- Wide range of colors: 3,000 K, 4,000 K, 6,500 K, red, green, blue, RGBW and TW (Tunable White from 2,700 K to 6,500 K)
- Homogeneous illumination and backlighting using OSRAM Flat Ray or Square Lens technology
- Mounting profiles for simple and rapid installation

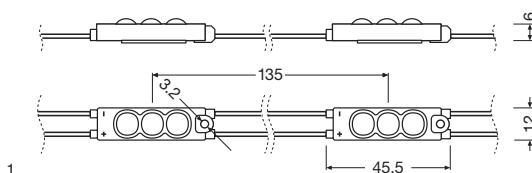

LED deSIGNer

The LED deSIGNer is an online planning tool that allows you to calculate the required number of components. The new software leads you step-by-step to an optimal system of LED modules, LED drivers and accessories. You can then use the evaluations for your customer propositions. Calculate with us:
www.osram.com/led-designer.

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table). For current photometric data and important safety, installation and application information, see www.osram.com/led-systems. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

5 Year

OSRAM
Guarantee***Product features¹⁾**

- Connected with flexible cables
- Type of protection (modules): IP66
- Color rendering index $R_a > 80$
- CE marked and UL listed

Product benefits

- Uniform illumination at high LED pitches thanks to Square Lens technology
- Modules are compatible with BackLED® mounting profile
- Significantly better application efficiency compared to systems without lenses
- Several options for quick and simple mounting: bolting or snap-in
- Excellent module efficacy
- Very long lifetime
- 5-year guarantee

Areas of application

- Signage and illuminated advertising
- Backlighting of small and/or flat channel letters
- Backlighting of single and double-sided light boxes
- Permanent outdoor use in enclosed light boxes or channel letters

Equipment/Accessories

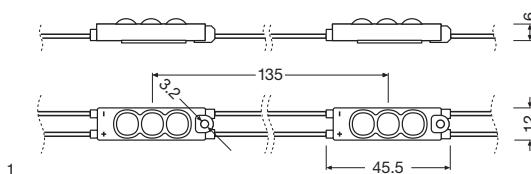

- BackLED® mounting profile BA-SM-MP
- Several types of OPTOTRONIC® 12 V power supplies available

In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Chain of 40 LED modules with three LEDs each
- Connected with flexible cables
- Variable LED module distance of 120...200 mm
- Very homogeneous backlighting with installation depth of 60 mm
- Dimmable with OT DIM, OT DALI DIM, OT DALI DIM LI
- Lifetime (L70/B50): 30,000 h (temperature at $T_c = 70^\circ\text{C}$)
- Color rendering index $R_a > 80$

Product benefits

- Type of protection IP64 thanks to full encapsulation of LED modules
- Illumination without hotspots with less modules, slim depths due to batwing optics
- Consistent white light (Standard Deviation of Color Matching SDCM: < 3)
- Completely molded housing protects PCB and LEDs
- Easier pre-mounting with double-sided tape with extra long foil
- 5-year guarantee

Areas of application

- Backlighting of medium-sized channel letters

Equipment/Accessories

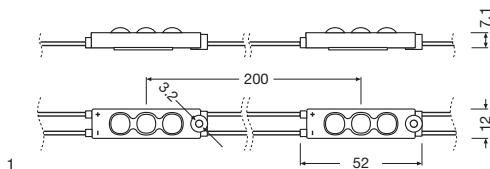

- Optimized for operation with OPTOTRONIC® 12 V power supplies

1) Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table) / For current photometric data and important safety, installation and application information, see www.osram.com/led-systems / All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values / In development, data preliminary

Product features¹⁾

- Connected with flexible cables
- Type of protection (modules): IP66 and IP68
- Color rendering index R_a: > 80
- Single bin LEDs for all CCTs
- Consistent white light: < 3 SDCM
- CE marked, ENEC certified; UL listed

Product benefits

- Uniform illumination at high LED pitches thanks to Flat Ray technology
- Click and Play: quick and easy click-in of the LED modules, no tools needed
- High module efficacy: up to 135 lm/W
- Dimming capability: 1...10 V, DALI and DMX methods
- Very long lifetime: up to 50,000 h (L70/B50)
- 5-year guarantee

Areas of application

- Signage and illuminated advertising
- Backlighting of single and double-sided light boxes
- Permanent outdoor use in enclosed light boxes
- Decorative applications

Equipment/Accessories

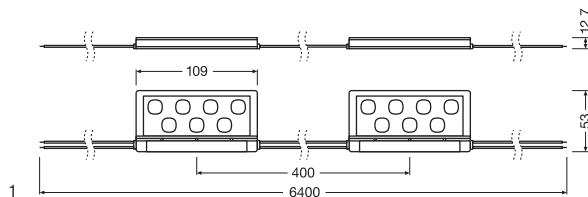

- Mounting profile BX-MP
- Several types of OPTOTRONIC® 24 V LED drivers available

	BA-RGBW-PL G2 ¹⁾	154	150	8	15	B	5	1

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® LED drivers (see relevant table). For current photometric data and important safety, installation and application information, see www.osram.com/led-systems. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light-emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product features¹⁾

- Connected with flexible cables
- Type of protection (modules): IP66/IP68
- Special robust encapsulation
- CE marked
- Dimmable by pulse width modulation (PWM)

Product benefits

- Simple fixing with M3 screws
- Broad color mixing palette (in connection with light management systems)
- Uniform backlighting of large surfaces thanks to extremely wide angle optics
- Simple connection with open cable ends
- Consistent white light (Standard Deviation of Color Matching SDCM: < 5)
- 5-year guarantee

Areas of application

- Dynamic color backlighting
- Dynamic mood lighting
- Spas
- Shops
- Restaurants
- Trade fair lighting
- Permanent outdoor use in enclosed light boxes or channel letters

Equipment/Accessories

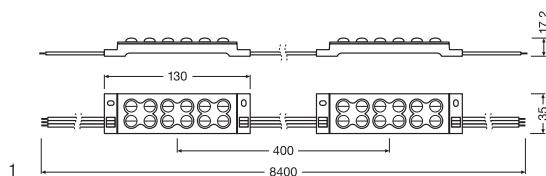

- Several types of OPTOTRONIC® 24 V power supplies available
- BoxLED® mounting profile BX-MP

Product features¹⁾

- Connected with flexible single-wire cables
- Cuttable after each single module
- Type of protection: IP20
- Color rendering index R_a : > 80
- CE marked

Product benefits

- Single-wire enables dimensionally stable shapes and curves
- Fully flexible in all directions
- LED pitch adjustable as required
- Extra-small engineered modules avoid shades, delivering great light uniformity
- White-painted modules on both sides, ensuring optimal reflection
- Very long lifetime: up to 50,000 h (L70/B50)

Areas of application

- Permanent outdoor use in potted full-acrylic block letters
- Signage and illuminated advertising
- Illumination of front, side or back light emitting letters

Mounting profiles

Time and precision play an important role in light installations. Consequently, a quick mounting process, which is optimally supported by mounting profiles from OSRAM, is a proven means to reduce costs.

For installation, the LED modules are simply snapped into the profiles which are then bolted down with screws driven through pre-drilled mounting holes.

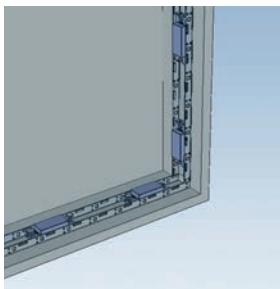

Thanks to the regular distances between the drill holes in the mounting profiles, the modules can be placed at even pitches without the need to measure. Within the profiles, however, they can be moved back and forth flexibly, as required.

The even arrangement of the modules therefore ensures a homogeneous illumination of the entire surface. Moreover, thanks to the strong aluminum profiles, the entire construction is very robust and maintenance-friendly.

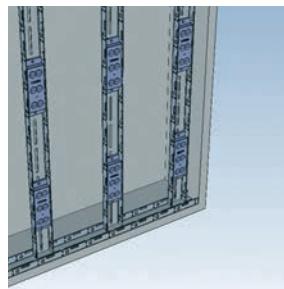

Functions of the mounting profiles

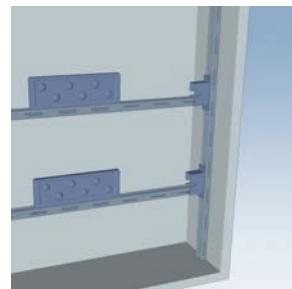

1) Side injection (single-sided and double-sided)

2) Backlighting (single-sided)

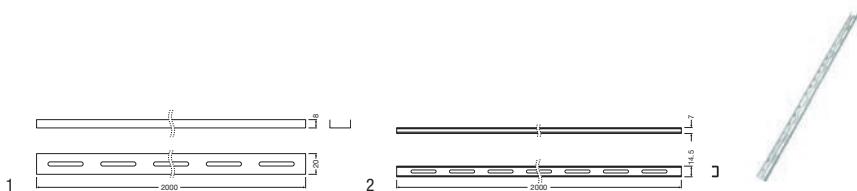

3) Backlighting (double-sided)*

* Patent pending

Control systems for Flex and signage modules

The OSRAM dynamic control system lets you create any possible comfortable ambiance whether you are working, meeting or relaxing. OSRAM offers several options to control the light in small and large projects – cabled and wireless.

Large projects (up to 255 light points)

Shopping mall

For large projects, we recommend solutions based on the DALI PROFESSIONAL Controller in combination with OTi DALI 1-4 CH and OTi DALI Tunable White. Manage the color change and tune the color temperature using the DALI PRO Control app.

DALI PRO CONT-4 controller

OTi DALI 80/220-240/24 1-4 CH

BackLED® Plus G15 RGBW

Medium-sized projects (up to 100 light points)

Hotel lobby

Our solution based on the OT Bluetooth Low Energy (BLE) minimizes the installation effort with a wireless system. It is intuitive to set up, along with the powerful control base from the app.

The Casambi solution is based on Bluetooth Low Energy, the state-of-the-art wireless technology and the only low-power wireless technology in all modern smartphones, tablets and even smart watches, making it the only mainstream and future-proof low-power radio technology in the world.

OT 50/220-240/24

OT Bluetooth Low Energy (BLE)

LINEARlight FLEX® POWER

Small projects (up to 25 light points)

Tunable White office solution

Our solution based on the DIM MCU TW and the OTi DALI TW is very convenient for single rooms with one single point of light control to tune the light temperature and intensity. It is easy to install and delivers a great result, giving you peace of mind.

DALI MCU

OTi DALI 80/220-240/24

LINEARlight FLEX® POWER Tunable White

Flex and Signage: constant-voltage compatibility

System matching instructions:

1. Constant-voltage LED drivers can be 12 V or 24 V.
2. Control the 12 V or 24 V voltage required from the light engine (LED strip/signage module).
3. Estimate the required length for the final installation of the LED strip or signage module.
4. Verify the required power consumption of the light engine* and select the appropriate driver. All drivers in the OPTOTRONIC® range with the "Smart Power Supply" function are designed to compensate for the extra power required during the warm-up of the LED modules up to 20 % of the nominal rated power to avoid flickering or any flux reduction. This intelligent control ensures constant light output for very low temperatures as well as high temperatures.

Example:

With 9 meters of LF1200-G3-827-09, a power consumption of $8.9 \text{ W/m} \rightarrow 80.1 \text{ W}$ in 9 meters. The OPTOTRONIC® with "Smart Power Supply" will compensate for the extra 15 % power required during the light-on phase.

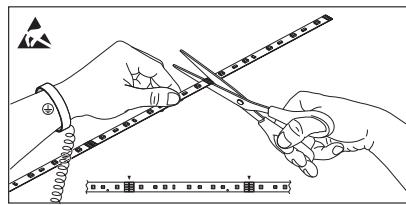

Other possible system applications:

Connect the LED strips with proper connectors or solder cables.

Important:

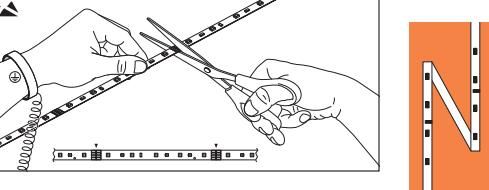

Be aware of electrostatic discharge (ESD) and wear ESD protection.

5. Connect the light engine to the drivers at 24 V (+) and 0 V (-).

* All values indicated on the datasheet (listed under each product on our website) refer to an ambient temperature of 20 °C. The power consumption of the light engine at a lower temperature is higher and has to be evaluated.

Contact flex-support@osram.com or signage-support@osram.com.

Driver compatibility list – Constant voltage

Case study

Spectacular LED light ceiling design at the Rostocker Hof creates a welcoming retail environment with homogeneous illumination

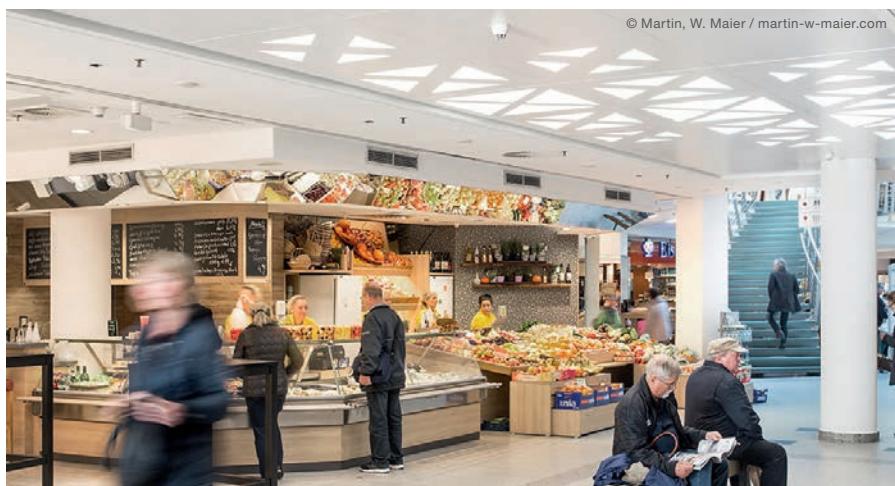

To mark its 20th anniversary, the Rostocker Hof shopping mall was redesigned by Mark Bendow Interior Environments, to enhance the entrance area and create a friendly atmosphere. The lighting design studio Konzeptlicht developed a spectacular 250-square-meter light ceiling system from specially designed panel luminaires, the difference was comparable to night and day. The BackLED® strip lighting and OPTOTRONIC® LED drivers were chosen to add the perfect light sources and control gears.

The light ceiling system from Konzeptlicht Lighting Solutions has a modular design and consists of light fields in four different sizes, a dummy cover, an equipment panel and a frame structure.

The innovative LED backlighting system with BackLED® lighting strips is characterized by particularly homogeneous illumination and uniform color effects while ensuring high module efficiency and economy. Another decisive factor for backlighting is the flexible adjustment of LED strips to objects with different shapes, sizes and materials. To adapt perfectly to the specified shape, the LEDs in the BackLED® family are attached on movable chains at equal intervals.

The constant-voltage OPTOTRONIC® LED drivers for 24 V LED modules for indoor and outdoor use are perfectly matched to the BackLED® family to achieve maximum efficiency, reliability and economy. Thanks to their robust design, they are also extremely durable, making them ideal for use in rooms with very high ceilings or open spaces such as the Rostocker Hof shopping mall.

OPTOTRONIC® LED drivers from OSRAM – reliable and interoperable systems for energy-efficient lighting design

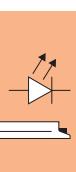

Versatile LED drivers for different project needs

With a wide range of LED drivers, OSRAM provides you with individual LED solutions for your multifaceted professional and semiprofessional projects. All OSRAM LED drivers are known for their high performance and efficiency, giving you tremendous flexibility for the design of LED luminaires. No matter whether the job involves indoor or outdoor settings, round or linear luminaires, general or accent lighting – we can help you find the right OSRAM LED driver. The following chapter informs you about:

- Perfect combinations – systems with matching LED drivers and LED modules
- High quality and guarantee (please visit www.osram.com/system-guarantee for more details) – any LED driver that has failed because of a material or manufacturer's fault will be refunded
- OSRAM DALI technology (DALI-2, Constant Light Output (CLO), soft

switch-off, Emergency Lighting (EL), Tunable White, Monitoring Data etc.), software and programming

- Design freedom and innovative housing designs
- Product families
Features and segmentation of OSRAM LED driver families
 - Constant current, linear shape, indoor application
 - Constant current, compact shape, indoor application
 - Constant current, outdoor application
 - Constant voltage, indoor and outdoor application
- Useful installation and operating instructions (number of ECGs per circuit breaker, permitted number of switching cycles, lifetime of LED drivers and permitted temperatures etc.)

A perfect combination

Expect more than just components. Expect a perfectly matched system. As one of the world's leading suppliers in the lighting sector, OSRAM provides you with perfectly matched components: innovative LED drivers and LED modules.

Your benefits

- LED drivers and modules from a single source
- Maximum reliability in system operation
- Only one point of contact in all matters relating to lighting

Research and development

Providing today what tomorrow needs. Continuous research and development on all OSRAM products promises innovative and open systems with additional user benefits to fulfill the needs of future lighting systems.

Your benefits

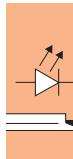

- Compliance with current regulations and, in certain cases, conformity with planned regulations
- High energy efficiency in lighting solutions
- The use of standard protocols enhanced by globally unique features

- DALI-2 logo: High interoperability with DALI control devices and sensors from various manufacturers
- OSRAM's proven quality, technology and guarantee
- High quality of light (low light modulation, CLO)

Excellent experience with 1 billion installed ECGs

Only those supplying maximum quality earn your trust. With up to 100,000 hours at a maximum failure rate of 10 %, OSRAM offers an excellent lifetime performance in the market. Thanks to this excellent level of reliability, OSRAM ECGs are not only the choice of leading luminaire manufacturers but also of well-known major users across the world.

Due to their high performance, an increasing number of OPTOTRONIC® LED drivers are also being used in extreme temperature ranges and harsh environments.

Guarantee for up to 5 years*

Hundreds of thousands of customers place their trust in us, year after year. In return, we provide guarantees lasting many years. OSRAM LED drivers deliver maximum quality, enabling us to provide a full 3-year or 5-year guarantee depending on the respective LED driver family or LED modules and LMS components.

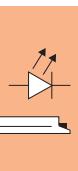

OSRAM's guarantees give you the level of safety you expect over a long period of time. And this is something you can rely on.

OSRAM's guarantees

System quality from a single source – the OSRAM service concept. You, as our customer, benefit from this passion. You can rely on our system guarantees for LED drivers, LED light sources (light engines and LED modules) and LMS components.

This means you only have a single contact person for your servicing needs. In the event of a defect, OSRAM will replace an item, free of charge, or issue a credit note for every product that demonstrably fails because of a material or manufacturing defect within the relevant guarantee period.

*For conditions and details, go to www.osram.com/system-guarantee; see also page 3.05

Intelligent DALI LED drivers from OSRAM

OSRAM has been developing DALI drivers for many years and was one of the first manufacturers to achieve the new DALI-2 certificate granted for DALI LED drivers. In numerous major DALI installations with over 10,000 devices, our DALI components are operating reliably. DALI is a well-established light control interface in the lighting industry, which covers all important light control functions and ensures high reliability.

Variety of DALI control options

Intelligent DALI drivers from OSRAM support different light control functions, from dimming of single luminaires to grouping of several luminaires to lighting scene setting. In addition, status information of the light source and the driver can be queried by the controller and transmitted to a light control system or to a building management system. Besides drivers and controllers, OSRAM also provides also a DALI analysis tool (DALI Wizard software plus

DALI magic) to ensure easy commissioning in the field. In addition, OSRAM offers the DALI programming tool Tuner4TRONIC® for simple configuration of drivers in the production line.

OSRAM offers a complete set of DALI products, starting with drivers, followed by input devices (e.g. DALI dimmers) and sensors, up to control units, which underlines the high DALI system competence of OSRAM.

DALI Version-1

Prior to the introduction of the DALI-2 certification process by the Digital Illumination Interface Alliance (DiiA), DALI conformity was based on a self-declaration by the manufacturer, based on the DALI standards IEC 62386-101: Ed1 and IEC 62386-102: Ed1 (DALI Version-1). Due to the extensive experience of OSRAM regarding DALI-based light control systems, the device itself shows a high interoperability and reliability. This has been confirmed by many major projects.

DALI drivers, which are compatible with DALI Version-1, support stepless dimming, scene setting, grouping, status queries and addressing of each single luminaire. Up to 64 drivers can be connected to this bidirectional interface. Some sensors can be directly powered by the bus line, which simplifies the installation and cuts costs.

DALI-2

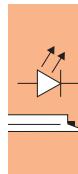

Together with the new DALI standard according to IEC 62386 (Edition 2), a manufacturer-independent certification process has been established by the Digital Illumination Interface Alliance (DiiA). The product certification by the DiiA ensures a significantly improved interoperability between the different manufacturers. With DALI-2, additional functionalities have been introduced compared to the existing

DALI system (Version-1) in the market. Moreover, the backwards compatibility to existing systems has been factored in. Only certified DALI-2 products are allowed to carry the DALI-2 certification mark issued by the DiiA.

With DALI-2, the following additional functionalities have been introduced (e.g.):

- Extended fade times (Fade-Time, Fade-Rate)
- Longer serial number and HW identification for improved device recognition
- Queries to identify which DALI functionalities are supported
- Sensors now have a separate address area, therefore all 64 addresses can be used for drivers. In addition, they can also send commands and, therefore, do not need to be queried continuously by the application control. This improves the payload of the DALI bus.

DALI-2-compatible drivers also support light control functions defined in DALI Version-1.

Extended OSRAM-specific add-on functions

Besides the standardized DALI functions, OSRAM devices also support optional add-on functionalities, which bring additional benefits for certain applications. These functions can be activated on demand by the Tuner4TRONIC® software.

Optional add-on dimming functionalities

Easy switching and dimming of up to 20 DALI drivers

In addition to the DALI feature, some OSRAM DALI LED drivers support Touch DIM® operation. With Touch DIM®, standard pushbuttons (suitable for mains power) can be used to switch and dim the lighting and save a desired brightness value. A maximum of up to 20 drivers is supported.

Efficient light control of a single luminaire with sensor

With this feature, LT2 digital sensors (e.g. LS/PD LT2 LI UF) can be directly connected to LED drivers via the LEDset interface without the need of an additional control unit. Dimming and switching as well as set point storage for daylight-dependent regulation can either be done via the sensor-integrated pushbutton or via the Touch DIM® interface of the driver.

Flexible lighting profiles for maximum convenience and security

The Corridor Function available for OSRAM DALI drivers allows configuration of a lighting profile over up to two levels. This defines the extent to which brightness values are retained when a person leaves the room. The brightness values and levels can be modified at any time using Tuner4TRONIC®. A typical area of application is the illumination of stairwells.

Dimming down to extremely low light levels

This feature allows dimming below 1%, which enables steady dimming down to the final switch-off of the device. This feature is suitable for theaters, movie theaters or other special applications. For LED drivers with pure amplitude dimming, the minimal dimming value in percent is determined by the ratio of minimal output current to rated current.

Smooth continuous dimming down to off

As soon as the device receives a switch-off command by a control interface (e.g. Touch DIM® or DALI), this feature dims the device down to zero nearly logarithmically, and with pre-defined delay times. This function is supposed to simulate the behavior of traditional halogen lamps.

Emergency Light: optional DC voltage detection

In addition to DALI-compliant functions, such as system failure level (disconnecting the control line), OSRAM DALI LED drivers with this feature offer the automatic detection of DC voltage supply. When DC voltage is detected, a preprogrammed luminous flux level between 0 and 100 % is implemented.

Typically, the factory setting for indoor LED drivers is 15 %. This luminous flux value can be additionally protected from unintentional overwriting by setting a locking bit. The settings can be adjusted via the Tuner4TRONIC® software.

Well-being and good working conditions with Tunable White control

In combination with different white LEDs, this feature enables multi-channel DALI LED drivers (Device Type 8) to change the color temperature and brightness. This makes offering Human Centric Lighting possible, where the color temperature and brightness are adapted to the human circadian rhythm and well-being.

Optional add-on functionalities for light control system and service

Optimization of the actual energy consumption

Drivers with this feature provide the actual input power consumption of the device. By using these data, it is possible to visualize the current power consumption of the lighting installation in a light management system, without the manual entry of dimming level/power consumption tables for every light point.

Data for predictive maintenance of luminaires and energy efficiency optimization

LED drivers with this feature offer additional operation and status information that exceeds what is currently offered by the DALI standard (such as energy consumption, power, operating time, overvoltage or undervoltage etc.). By using these data, it is possible to offer predictive maintenance and an overall better lighting service. Moreover, it makes the light management system intelligent. Monitoring Data is an enhancement of the “Smart Grid” feature. The data can also be visualized in the Tuner4TRONIC® software.

Luminaire info with electronic type label

To make light management systems intelligent in terms of service and predictive maintenance, they need basic information about the connected luminaire (model, power, service life etc.). During production, the luminaire manufacturer can store these data in the LED driver, and the light management system can recall these data in the installation.

Constant Lumen Function for improved maintenance cycles

To ensure the maintenance interval of the system, the light level must be achieved also at the end of the entire lifetime. Due to lumen depreciation of the light source over time, the system usually needs to be overpowered at the beginning, which leads to increased energy cost. This is not necessary thanks to the Constant Lumen Function, as the operating output is adjusted continuously to compensate for the lumen loss.

Optional add-on functionalities for improved luminaire performance

Fast and simple programming without mains voltage

In combination with OSRAM Tuner4TRONIC® software, LED drivers with NFC technology allow fast and contactless programming without connecting mains voltage during and after the luminaire manufacturing process. In the field optionally with the T4T-F app, which runs on mobile devices with an integrated NFC reader (ISO 15693) e.g. for specific outdoor LED drivers.

Improved light quality thanks to analog dimming

This feature allows purely analog dimming down to the minimal dimming value of the device. The analog dimming process achieves lower light modulation (flicker) and therefore better light quality.

Luminaire variety reduction with Tuning Factor

Within limits predefined by the luminaire manufacturer, this feature allows an adjustment of the amount of light in the field or in production. Thus, one luminaire can manage different lumen packages. If the feature is combined with LEDset2, other lumen packages can also be achieved which differ in terms of resistor coding.

Simple current setting by resistor

LEDSet2 is a multi-vendor LED module interface which allows to set the correct operating current for the LED module by resistor coding, without the necessity to reprogram the constant current LED driver, if an LED module has to be replaced by a newer generation. This ensures optimal efficacy and the right amount of light at all times.

Accurate current setting by software

This feature allows to set the operating current of a constant current LED driver with the Tuner4TRONIC® software. Compared to current setting by LEDSet2 interface, a higher current accuracy can be achieved, and no resistor is necessary on the LED module, which reduces the effort within the luminaire (insulation, wiring etc.).

Flexible thermo management, adapted to the luminaire

By default, the internal protection mechanisms of the LED driver are designed for maximum temperature, however, not for those of the luminaire. By means of this feature, you can adjust the temperature derating of the LED driver so that it not only matches the luminaire, but also leads to a higher reliability of the luminaire.

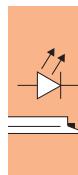

Protection against unintentional access to device settings

This feature enables luminaire manufacturers (OEMs) to safeguard certain predefined setting parameters in the LED driver against unintentional access and unauthorized users via Tuner4TRONIC® software. Drivers and luminaires need to be protected against unintentional access.

Intelligent access control management of device settings

This feature is an advancement of OEM Key, which allows controlling the access rights for individual features within the LED driver via Tuner4TRONIC® software and to assign different rights to the luminaire manufacturer, to the service team and to the general user. Assigning user rights also allows offering “light as a service” and still maintaining total control over who may change what within the device or luminaire.

Note: The exact operating modes of the individual additional functions can be found in the technical data sheets and application brochures for the respective devices.

Effective LED lighting for your success – OPTOTRONIC® LED drivers

Whether it's innovative or classic design, constant current or constant voltage, DALI or 1...10V, indoor or outdoor lighting – we have the LED driver to meet your needs.

The diverse OPTOTRONIC® portfolio from OSRAM has the optimum solution for an extremely broad range of requirements, bringing you energy-saving LED applications with high light quality, long operating life and exceptional reliability.

Fully in line with your requirements: OSRAM OPTOTRONIC® Linear – constant current LED drivers

Our linear LED drivers are perfect for a wide range of luminaires and applications, especially in office, industrial and retail scenarios.

Greater design flexibility for compact luminaires: OSRAM OPTOTRONIC® constant current LED drivers

No compromise on performance, more options and greater flexibility – discover the new miniaturized LED drivers especially for shop and hospitality applications.

Smart efficiency modification: OSRAM OPTOTRONIC® constant voltage LED drivers

LED drivers with an output voltage of 12 V and 24 V are the perfect choice for implementing modular and flexibly scalable LED systems.

High level of functionality: OPTOTRONIC® Outdoor drivers

Particularly efficient and robust LED drivers for luminaires and lighting applications in outdoor areas.

OSRAM Digital Lighting Systems' wide range of products and services helps you give your customers what they want:

Design flexibility

Complete component portfolio, created with maximum compatibility and design freedom in mind, individual design-in support and customer-specific mass production

User friendliness

Simple selection, configuration, installation and use, reliable operations for the product's entire lifespan

Stability

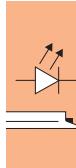

Proven brand quality, long-life, efficient products, optimally coordinated systems

Planning security

Complexity and risk reduction, simple and efficient warehousing

OSRAM guarantee

Three or five years guarantee for our products and systems
(details and general requirements:
www.osram.com/system-guarantee)

Details of all OPTOTRONIC® LED drivers can be found at
www.osram.com/optotronic

OPTOTRONIC® Indoor LED drivers

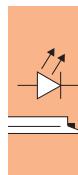

The perfect choice for your lighting applications

No matter if you are looking for linear office, educational-sector, industry, retail or hospitality lighting solutions, OSRAM offers the perfect choice of drivers. Cutting-edge design for ultra-flat luminaires, innovative service and maintenance functionalities or outstanding lighting quality and long lasting reliability are just some of the portfolio proof points. Dedicated software tools and programming interfaces such as NFC (near-field communication) add further value through higher programming speed.

1. The most important features of OPTOTRONIC® Linear constant current LED drivers:

- Cutting-edge housing design – UltraFlat family (driver and sensor) with only 11 mm housing height – all other drivers with dimensions of 30x21 mm
- Extremely long-lasting, highly efficient and brand-new industry (IND) driver family
- Tunable White/Human Centric Lighting (HCL) made easy with the all-new OTi DALI TW (Tunable White) product family
- Intelligent commissioning (all OPTOTRONIC® DALI) and predictive maintenance features (OPTOTRONIC® DALI IND) integrated
- NFC integrated in OPTOTRONIC® DALI as well as FIT drivers for speeding up the OEM production
- Innovative DEXAL™ (DX) technology for direct sensor connection
- Analog dimming available as standard in all OPTOTRONIC® DALI drivers
- All OPTOTRONIC® OTi DALI window drivers are fully programmable by DALI and/or NFC
- SELV and non-isolated versions available for maximal choice of module combinations
- Five OPTOTRONIC® DALI driver families:
 - OPTOTRONIC® Intelligent DALI UF, height: only 11 mm
 - OPTOTRONIC® Intelligent DALI NFC TW L, Tunable White driver
 - OPTOTRONIC® Intelligent DALI NFC IND L, industry driver
 - OPTOTRONIC® Intelligent DX L, DEXAL™ driver with sensor connection
 - OPTOTRONIC® Intelligent DALI L
- Five OPTOTRONIC® ON/OFF driver families:
 - OPTOTRONIC® FIT D IND NFC L, industry window driver with NFC
 - OPTOTRONIC® FIT D NFC L, window driver (NFC)
 - OPTOTRONIC® FIT D LT2 L, window driver (LEDset)
 - OPTOTRONIC® FIT D L with fixed output
 - OPTOTRONIC® FIT CS L G2 with DIP switch (4 currents)

OPTOTRONIC® Intelligent – DEXAL™

The programmable OSRAM OPTOTRONIC® LED driver with DEXAL™ technology (Data Exchange for Advanced Lighting) is a DALI-based intra-luminaire interface that enables bi-directional communications and supply current between the driver and luminaire-integrated components such as intelligent sensors and wireless modules.

This interface allows easy connection to different wireless-based building management systems. It provides exact luminaire-specific data, including diagnostics, to light management systems. Luminaire manufacturers can design smart luminaires and streamline the configuration process by leveraging DEXAL™ as a standard bi-directional communications interface.

Product benefits

- Versatile DEXAL™ window driver up to 50W due to flexible output characteristic
- Integrated power supply over DALI Version-1 to power sensors and wireless modules
- Simplified luminaire design for different wireless lighting control systems and sensors
- Extended luminaire/driver data (power, energy, operating hours etc.) for analytics

Product features

- Input voltage: 120...277 V
- Available with an output current range of up to 1,400 mA
- Constant lumen function
- Overtemperature protection with external NTC
- End-of-life indication

Equipment/accessories

- OT Programmer hardware for configuration of DEXAL™ ECGs necessary
- Programmable via OT Programmer software

DEXAL™ video:

1) Permitted voltage range

2) ±5%

Product features

- Line frequency: 0 Hz 50 Hz 60 Hz
- Versatile DALI window driver up to 75 W due to flexible output characteristic
- Supply voltage: 220..240 V
- Available with output current range: up to 700 mA
- Direct Ultraflat sensor connection via LEDset (LS/PD LT2 LI UF Sensor), see page 4.09
- Use with Ultraflat DALI sensor (LS/PD DALI LI UF Sensor), see page 4.64
- Constant Lumen Output (CLO)
- Non-isolated drivers
- DALI-2 certified (Part -101, -102 and -207)

Product benefits

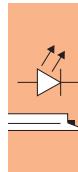

- Ultra-flat housing (11 mm height) for innovative luminaire designs and applications
- LEDset interface for direct Ultraflat sensor connection (LS/PD LT2 LI UF sensor)
- Fully programmable via software (DALI Interface, NFC)
- Lifetime: up to 100,000 h (temperature at $T_c = 65^\circ\text{C}$, max. 10 % failure rate)
- High-quality dimming of 1...100 % by amplitude dimming
- High quality of light thanks to <1% output ripple current
- Very high efficiency
- Fulfill safety requirement due to overload, overtemperature, Hot Plug protection

Versatile scope of application due to OSRAM DALI Technology

- Easy to use in corridors and restrooms because of three-level Corridor function
- Touch DIM® application: easy to control via pushbutton or sensor
- Energy-efficient Touch DIM® operation due to automatic switch-off at sufficient residual light
- Suitable for emergency installations (acc. to EN 60598-2-22 and IEC 61347-2-13, appendix J) thanks to DC detection (0 Hz, pulsating DC), on/off switchable
- Feedback of power consumption and operating hours (Fit for SMART GRID)
- Suitable for buildings according to EPBD/BREEAM/LEED due to automatic Constant Lumen Output setting
- Luminaire information for easy maintenance

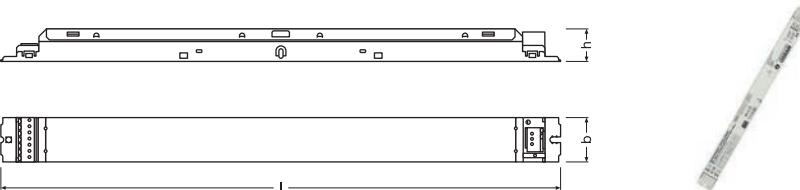

Areas of application

- Linear lighting for office, education, industry, storage areas and retail
- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Suitable for luminaires of protection class I

1) Preliminary data

Product features

- Line frequency: 0 Hz 50 Hz 60 Hz
- Versatile DALI window driver up to 75 W due to flexible output characteristic
- Supply voltage: 220...240 V
- Usable as DT6 (2-channel) or DT8 (Tunable White) driver
- Available with output current range: up to 700 mA
- Constant lumen function
- Integrated customizable thermal management (Driver Guard)
- Non-isolated drivers
- DALI-2 certified (Part -101,-102 and -207)

Product benefits

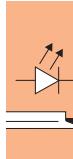

- Control of standard white or Tunable White light acc. to DALI device type 8 (DT8)
- TouchDIM® Tunable White integrated for use without additional LMS (within 2018)
- Fully programmable via software (DALI Interface, NFC)
- Lifetime: up to 100,000 h (temperature at $T_c = 65^\circ\text{C}$, max. 10 % failure rate)
- High-quality dimming of 1...100 % (amplitude and/or PWM selectable by software)
- High quality of light thanks to <1% output ripple current
- Very high efficiency
- Fulfill safety requirement due to overload, overtemperature, Hot Plug protection

Versatile scope of application due to OSRAM DALI Technology

- Easy to use in corridors and restrooms because of three-level Corridor function
- Touch DIM® application: easy to control via pushbutton or sensor
- Energy-efficient Touch DIM® operation due to automatic switch-off at sufficient residual light
- Suitable for emergency installations (acc. to EN 60598-2-22 and IEC 61347-2-13, appendix J) thanks to DC detection (0 Hz, pulsating DC), on/off switchable
- Feedback of power consumption and operating hours (Fit for SMART GRID)
- Suitable for buildings according to EPBD/BREEAM/LEED due to automatic Constant Lumen Output setting
- Luminaire information for easy maintenance

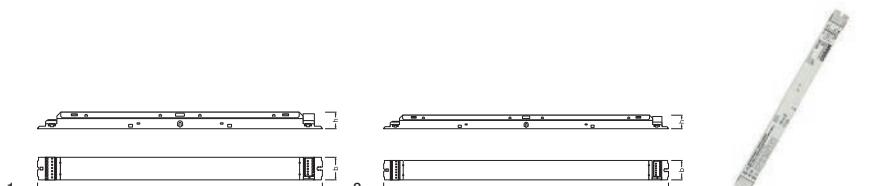

Areas of application

- For Tunable White as well as for 2-channel use (e.g. direct/indirect lighting)
- Perfect system match with PrevalLED® Linear Tunable White (see page 2.06)
- Linear lighting for office, education, industry, storage areas and retail
- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Suitable for installation in emergency lighting systems according to EN 60598-2-22
- Suitable for luminaires of protection class I

1) Preliminary data

Product features

- Line frequency: 0 Hz 50 Hz 60 Hz
- Versatile scope of application due to output power range of up to 150 W
- Supply voltage: 220...240 V
- Available with output current range: up to 1,000 mA
- Constant lumen function
- Integrated customizable thermal management (Driver Guard)
- Non-isolated drivers
- DALI-2 certified (Part -101, -102 and -207)

Product benefits

- Fully programmable via software (DALI Interface, NFC)
- Lifetime: up to 100,000 h
(temperature at $T_c = 75^\circ\text{C}$, max. 10 % failure rate, preliminary data)
- High light quality: 1...100% amplitude dimming and <1% output ripple current
- Wide operating temperature range: -40...+65 °C
- High surge protection: up to 4 kV (L-N)/4 kV (L/N-PE)
- Integrated inrush current limiter
- Very high efficiency (up to 96 %)
- Fulfill safety requirement due to overload, overtemperature, Hot Plug protection

Versatile scope of application due to OSRAM DALI Technology

- Easy to use in corridors and restrooms because of three-level Corridor function
- Touch DIM® application: easy to control via pushbutton or sensor
- Energy-efficient Touch DIM® operation due to automatic switch-off at sufficient residual light
- Suitable for emergency installations
(acc. to EN 60598-2-22 and IEC 61347-2-13, appendix J) thanks to DC detection
(0 Hz, pulsating DC), on/off switchable
- Feedback of power consumption and operating hours (Fit for SMART GRID)
- Suitable for buildings according to EPBD/BREEAM/LEED due to automatic Constant Lumen Output setting
- Luminaire information for easy maintenance
- Advanced luminaire/driver data (power, energy, operating hours...) for analytics

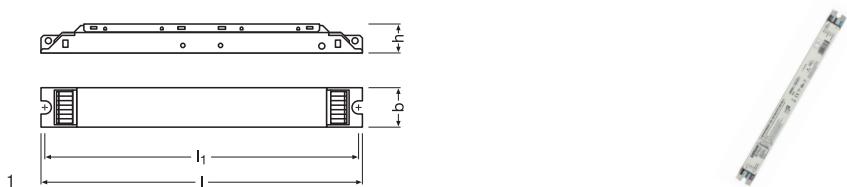

Areas of application

- Linear lighting solutions for industry, storage areas and retail applications
- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Suitable for installation in emergency lighting systems according to EN 60598-2-22
- Suitable for luminaires of protection class I

¹⁾ For output currents above 450mA, for lower currents PWM dimming with 460 Hz

Product features

- Input voltage: 120...277 V
- UL Class 2 output, SELV
- Available with output current range: up to 1,400 mA
- Constant lumen function
- Overtemperature protection via external NTC
- End-of-life indication

Areas of application

- Offices

Equipment/Accessories

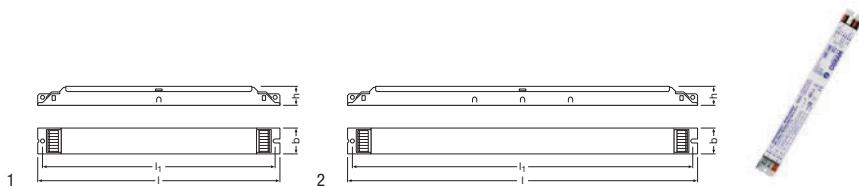

- OT Programmer hardware for configuration of DEXAL™ ECGs necessary
- Programmable only via OT Programmer software

Product benefits

- Versatile DEXAL™ LED driver up to 50 W due to flexible output characteristic
- Integrated DALI (Version-1) bus power supply for sensors and wireless radios
- Simplified luminaire design for wireless lighting control system and sensors
- Analytics possibility using luminaire data (power, energy, operating hours)

1) Permitted voltage range

2) Maximum 350 V

3) Maximum 60 V

4) For maximum nominal output current

Product features

- Line frequency: 0 Hz 50 Hz 60 Hz
- Versatile DALI window driver up to 90 W due to flexible output characteristic
- Supply voltage: 220...240 V
- Available with output current range: up to 2,100 mA
- Constant lumen function
- Integrated customizable thermal management (Driver Guard)
- SELV and non-isolated versions available
- DALI-2 certified (Part -101,-102 and -207)

Product benefits

- Fully programmable via software (DALI Interface)
- Flexible current setting (LEDset2)
- Lifetime: up to 100,000 h
(temperature at T_c = 65 °C, max. 10 % failure rate)
- High-quality dimming of 1...100 % by amplitude dimming (except 80W versions)
- High quality of light thanks to <1% output ripple current
- Very high efficiency
- Very low standby power consumption: < 0.15 W (SELV), < 0.25 W (non-isolated)
- Fulfil safety requirement due to overload, overtemperature, Hot Plug protection

Versatile scope of application due to OSRAM DALI Technology

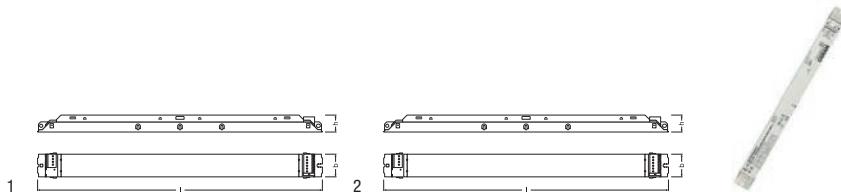

- Easy to use in corridors and restrooms because of three-level Corridor function
- Touch DIM® application: easy to control via pushbutton or sensor
- Energy-efficient Touch DIM® operation due to automatic switch-off at sufficient residual light
- Suitable for emergency installations (acc. to EN 60598-2-22 and IEC 61347-2-13, appendix J) thanks to DC detection (0 Hz, pulsating DC), on/off switchable
- Feedback of power consumption and operating hours (Fit for SMART GRID)
- Suitable for buildings according to EPBD/BREEAM/LEED due to automatic Constant Lumen Output setting
- Luminaire information for easy maintenance

Areas of application

- Linear lighting for office, education, industry, storage areas and retail
- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Suitable for luminaires of protection class I

1) Permitted voltage range

Product features

- Line frequency: 0 Hz 50 Hz 60 Hz
- Versatile scope of application due to output power range of up to 75 W
- Supply voltage: 220...240 V
- Available with output current range: up to 1,400 mA
- SELV system

Areas of application

- Linear lighting for office, education, industry, storage areas and retail
- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Suitable for luminaires of protection class I

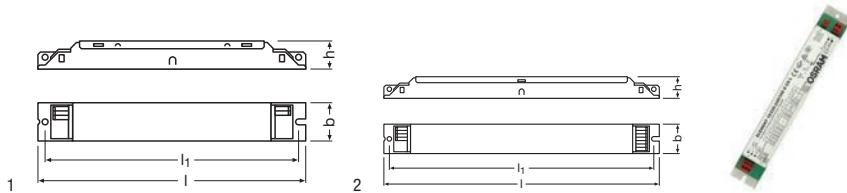

Product benefits

- Flexible current setting (DIP switch – 4 currents)
- Lifetime: up to 100,000 h
(temperature at T_c = 65 °C, max. 10 % failure rate)
- High efficiency
- High quality of light thanks to low output ripple current
- Fulfill safety requirement due to overload, overtemperature, Hot Plug protection

ELEMENT

Linear / Area constant current LED drivers – Non-dimmable

Product name	GTIN (EAN)	Hz	V _{IN}	I [mA]	V _{OUT}	I [mA]

1) Preliminary data

2) At 200/250mA / At 300/350mA

3) At 500/600mA / At 700/800mA

4) At 920/1050mA / At 1075/1200mA

5) ±5%

Product features

- Versatile scope of application due to output power range of up to 60 W
- Supply voltage: 220...240 V
- Available with output current range: up to 1,200 mA
- SELV and non-isolated versions available

Areas of application

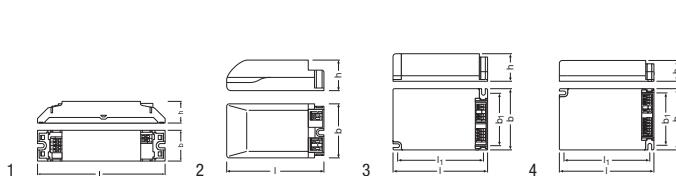

- Linear lighting for office, education, industry, storage areas and retail
- Suitable for luminaires of protection class I

Product benefits

- Small housing design
- Flexible current setting (DIP switch – 4 currents)
- Lifetime: up to 50,000 h (temperature at T_c = 65°C, max 10% failure rate)
- High efficiency
- Fulfill safety requirement due to overload, overtemperature, Hot Plug protection (no overload protection for ELEMENT 40/220...240/350 D CS L)

1) Permitted voltage range

2) Maximum at the T_c point

3) Maximum 60 V

4) ±5%

5) For maximum nominal output current

6) Ripple average at 100 Hz %

7) Partial load 7...27 W

8) Partial load 15...35 W

9) Partial load 22...55 W

Product features

- Supply voltage: 220...240 V
- Line frequency: 0 Hz 50 Hz 60 Hz
- Line voltage: 198...264 V
- Safety according to EN 61347-1, 61347-2-13, 62384
- RI suppression according to EN 55015:2007+A1:2007/CDN
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547
- Lifetime: up to 100,000 h
(temperature at $T_c = 65^\circ\text{C}$, max. 10 % failure rate)
- Type of protection: IP20
- Independent connection via through-looping
(except OTi DALI 15)

Product benefits

- Versatile DALI window driver due to flexible output characteristic
- Very high efficiency
- Protection of the system thanks to thermal management and Smart Control
- High-quality dimming of 1...100 % by amplitude dimming
- Soft switch-off function (OTi DALI 15)
- Easy and fast output current setting via NFC

**Versatile scope of application due to OSRAM DALI Technology**

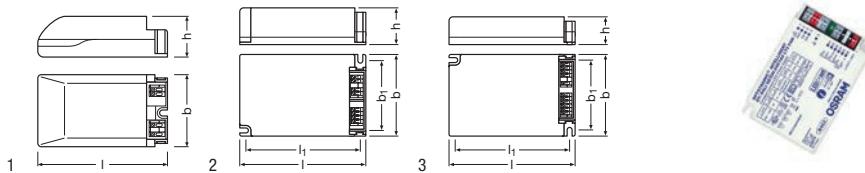

- Easy to use in corridors and restrooms because of three-level Corridor function
- Touch DIM® application: easy to control via pushbutton or sensor
- Energy-efficient Touch DIM® operation due to automatic switch-off at sufficient residual light
- Suitable for emergency installations
(acc. to EN 60598-2-22 and IEC 61347-2-13, appendix J) thanks to DC detection
(0 Hz, pulsating DC), on/off switchable
- Feedback of power consumption and operating hours (Fit for SMART GRID)
- Suitable for buildings according to EPBD/BREEAM/LEED due to automatic Constant Lumen Output setting

Areas of application

- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- For use in luminaires with flexible current setting (DALI, CLO, LEDset, NFC)
- Suitable for indoor SELV installations
- Suitable for luminaires of protection classes I and II
- Suitable for downlights, spotlights and LED panels
- Installation via Cable Clamp Kit possible
(depending on version of product)

14) Partial load 19...35 W

Product features

- Dimmable via leading edge/trailing edge
- Type of protection: IP20

Product benefits

- Compact housing for mounting in very tight spaces
- Compatible with the most common leading-edge and trailing-edge phase dimmers

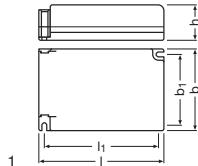

Areas of application

- Optional cable clamp E-style for independent mounting
- Suitable for indoor installations
- Suitable for indoor SELV installations

OPTOTRONIC® FIT LT2 LP

Compact constant current LED drivers – Non-dimmable

OT FIT 40/220...240/1A0 LT2 LP	-20...+50	75	No	I / II	20	1

Product features

- Supply voltage: 220...240 V
- Line frequency: 0 Hz 50 Hz 60 Hz
- Line voltage: 198...264 V
- Safety according to EN 61347-1, 61347-2-13, 62384
- RI suppression according to EN 55015
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547
- Lifetime: up to 100,000 h
(temperature at T_a = 65 °C, max. 10 % failure rate)
- Independent connection via through-looping
(depending on version of product)

Areas of application

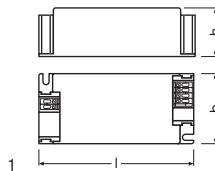

- Installation in emergency lighting systems according to IEC 61347-2-13, appendix J
- Luminaires with flexible current setting (LEDset2)
- Suitable for indoor SELV installations
- Suitable for luminaires of protection classes I and II
- Suitable for downlights, spotlights and LED panels
- Independent mounting via Cable Clamp Kit possible

Product benefits

- Versatile scope of application due to output power range of up to 40 W
- Fulfill safety requirement due to overload, overtemperature protection
- High efficiency
- Higher quality of light thanks to < 5 % output ripple current

Product features

- Supply voltage: 220...240 V
- Line frequency: 50 Hz / 60 Hz
- Line voltage: 198...264 V
- Safety according to EN 61347-1, 61347-2-13, 62384
- RI suppression according to EN 55015
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547
- Lifetime: up to 100,000 h
(temperature at T_c = 65 °C, max. 10 % failure rate)
- Cable clamp kit for independent mounting

Areas of application

- Luminaires with flexible current setting (LEDset2)
- Suitable for indoor SELV installations
- Suitable for luminaires of protection classes I and II
- Suitable for downlights, spotlights and LED panels
- Independent mounting via Cable Clamp Kit possible

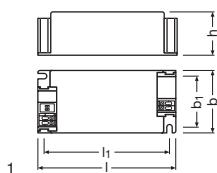

Product benefits

- Versatile scope of application due to output power range of up to 40 W
- Fulfill safety requirement due to overload, overtemperature protection
- High efficiency
- High quality of light thanks to < 1 % output ripple current
- Small housing for flexible luminaire designs

OPTOTRONIC® FIT CS

Compact constant current LED drivers – Non-dimmable

Product features

- Supply voltage: 220...240 V
- Line frequency: 50 Hz / 60 Hz
- Line voltage: 198...264 V
- Safety according to EN 61347-1, 61347-2-13, 62384
- RI suppression according to EN 55015
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547
- Lifetime: up to 50,000 h
(temperature at T_c = 70 °C, max. 10 % failure rate)
- Cable clamp kit for independent mounting

Areas of application

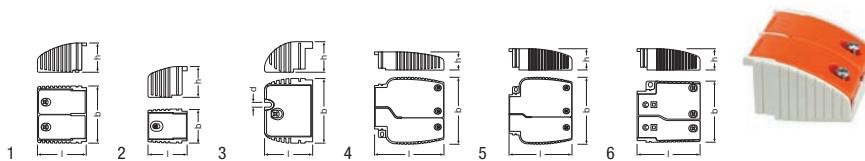

- Suitable for downlights, spotlights and LED panels
- Suitable for luminaires of protection classes I and II

Product benefits

- High quality of light thanks to low output ripple current
- High flexibility due to four different output currents
- Small housing for flexible luminaire designs
- High efficiency

OPTOTRONIC® Cable Clamp

Driver accessories

Product features

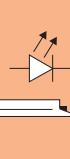

- Easy-to-install and flexible cable clamps
- Separate cable clamps for primary and secondary side
- Pre-fixed, captive screws
- Through-looping (TL version)

Areas of application

- Downlights, flat luminaires
- Suitable for different cable types
- Suitable for indoor installations

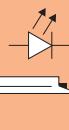

Product benefits

- Simple and quick cable mounting
- Sufficient space for cable connection
- Cost-effective and space-saving solution (TL version)
- Free cable connection thanks to open flaps
- Immediate installation thanks to pre-assembled cable clamps

1) ±5%

Product features

- Available with wattages of up to 44 W
- Constant output current
- Integrated cable clamp for luminaire and independent installation
- Operated with safety extra-low voltage (SELV): < 60 V
- Reversible overtemperature, overload, short-circuit and open-circuit protection

Product benefits

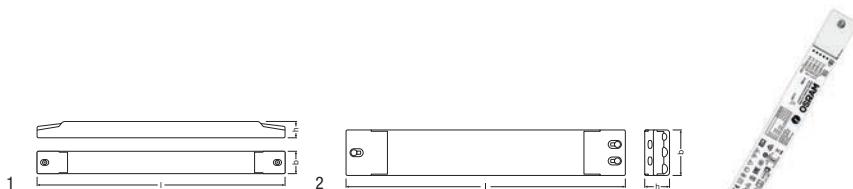

- Compatible with LEDs with chip-on-board technology and discrete LEDs
- High efficiency
- Simple installation and wiring

Areas of application

- Spotlight and downlight installations for shops
- Recessed luminaires
- Suitable for luminaires of protection classes I and II
- Suitable for indoor SELV installations

1) DC voltage

Product features

- Dimmable via Touch DIM®
- LED driver whose output power can be shared arbitrarily among the 4 channels
- Dimming range: 0.1...100 %
- Line frequency: 0 Hz 50 Hz 60 Hz

Product benefits

- Intelligent power matching thanks to Smart Power Supply
- Slim form factor for mounting on the cove or in linear luminaires
- Minimized flicker thanks to high PWM frequency
- Suitable for installation in emergency lighting systems according to EN 60598-2-22
- Available as Tunable White version (DALI Device Type 8)
- DALI message detection "LED module failure"

Areas of application

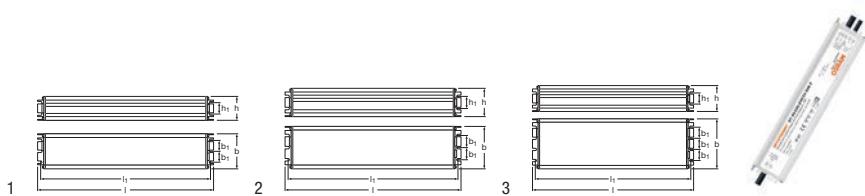

- Cove lighting, wall washer, corridor, handrail
- Suitable for use in luminaires of protection class I and II

Equipment/Accessories

- Suitable for 24 V LED modules

1) +1.0/-0.5 V

Product features

- Dimmable via fully isolated 1...10 V interface
- Driver with output power range of up to 240 W

Areas of application

- Suitable for use in tight, flat luminaires or installation in suspended ceilings
- Suitable for indoor and outdoor SELV installations

Product benefits

- Versatile 1...10 V window driver up to 240 W due to flexible output characteristic
- Very high efficiency
- IP rating: IP67
- High surge protection: up to 3 kV (L-N)/6 kV (L/N-PE)

1) With OPTOTRONIC dimmers

Product benefits

- Versatile scope of application due to output power range of up to 240 W
- Very high efficiency
- Constant luminous flux for very low and high temperatures due to Smart Power Supply

Areas of application

- Suitable for indoor and outdoor SELV installations
- Outdoor applications only in suitable installations
- Suitable for use in tight, flat luminaires or installation in suspended ceilings

1) With OPTOTRONIC dimmers

Product benefits

- Versatile scope of application due to output power range of up to 120 W
- Very high efficiency
- IP rating: up to IP67
- High surge protection: up to 3 kV (L-N)/6 kV (L/N-PE)

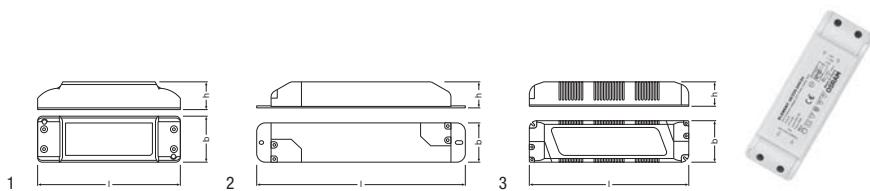

Areas of application

- Suitable for indoor and outdoor installations
- Ideal for mounting in very tight spaces

ELEMENT

Product features

- Lifetime: up to 50,000 h (temperature at $t_c = 75^\circ\text{C}$)
- Overtemperature protection
- Overload protection

Areas of application

- Suitable for luminaires of protection class II
- Decorative lighting in hospitality, restaurants and shops
- Shelf lighting for shops
- Cove lighting
- Under-cabinet lighting

Product benefits

- Large output power range: up to 90 W
- Compatible with OSRAM Flex® products
- Excellent price/performance ratio

OPTOTRONIC®

Constant voltage dimmers with Bluetooth

Product name	GTIN (EAN)						
OT BLE DIM	4052899557833	12...24	240	172	42	20	164
Product name							
OT BLE DIM	-20...+45	Yes	0...100 %	III	IP20	20	1

Product features

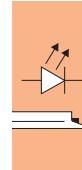

- Wireless 4-channel dimmer, with a output voltage of 12 V and 24 V
- Control of LED loads of up to 240 W
- Wireless module based on Bluetooth Low Energy

Areas of application

- Suitable for indoor installations
- Shops and hospitality: retail, hotels, restaurants
- Museums
- Residential buildings

Product benefits

- Control of white, Tunable White, RGB and RGBW LED modules
- Independent housing for ceiling installation
- Support of systems based on Casambi lighting control solutions
- Minimal installation effort
- Dry contacts for connection to any commercial pushbutton

OPTOTRONIC®

Constant voltage dimmers with DALI

Product name	GTIN (EAN)	V _{OUT}	W	l [mm]	b [mm]	h [mm]	l [mm]
OTi DALI DIM	4008321061195	10.5...24	120	172	42	20	164
Product name		T _a	Yes	W	0...100 %	II	IP20
OTi DALI DIM		-20...+50				20	1

Product features

- Intelligent digital dimmer (DALI) with constant output voltage
- Dimming range: 0...100 %
- Device fits also for special applications where dimming below 1 % is required

Areas of application

- Suitable for indoor installations
- Separate installation (ceiling mounting)

Product benefits

- Very precise dimming thanks to digital light control

OPTOTRONIC®

Constant voltage dimmers with DMX

Product name	GTIN (EAN)	V _{OUT}	W	I [mm]	b [mm]	h [mm]	l ₁ [mm]
OT DMX RGB DIM	4008321160829	10.5...24	144	172	42	20	164
OT DMX RGBW DIM	4052899557949	12...24	172	172	42	20	164
Product name		T _a	W	IP	IP	No.	
OT DMX RGB DIM	-20...+50	Yes	0...100 %	III	IP20	20	1
OT DMX RGBW DIM	-20...+50	Yes	0...100 %	III	IP20	20	1

Product features

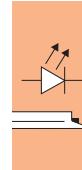

- Intelligent DMX dimmer with multi-channel topology and single control
- Automatic or manual addressing
- Device fits also for special applications where dimming below 1 % is required

Areas of application

- Suitable for indoor installations
- Shops and hospitality: retail, hotels, restaurants
- Museums
- Residential buildings

Product benefits

- 3- and 4-channel DMX dimmer for RGB and RGBW LED modules
- Independent housing for ceiling installation
- High PWM frequency to optimize video recording

OPTOTRONIC®

Constant voltage dimmers with 1...10 V

Product name	GTIN (EAN)	V_{OUT}	W	$\frac{l}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	$\frac{l_1}{[mm]}$
OT DIM	4050300943459	10.5...24	120	172	42	20	164
Product name		T_a	\odot	W	II	IP	IP20
OT DIM	-20...+50	Yes ¹⁾	0...100 %			20	1

1) 1 channel PWM output

Product features

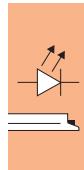

- Intelligent analog dimmer (1...10 V) with constant output voltage
- Dimming range: 0...100 %
- Cable clamp housing for independent mounting
- Device fits also for special applications where dimming below 1 % is required

Areas of application

- Suitable for indoor SELV installations

Product benefits

- 1...10V control port basic isolated

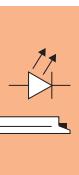

OPTOTRONIC®

Outdoor LED drivers

OPTOTRONIC® LED drivers for outdoor applications

Long life, low maintenance and high efficiency are very important for outdoor applications. OPTOTRONIC® LED drivers for outdoor applications fulfill these expectations and use the advantages of LED-based light sources.

The high flexibility of these devices enables the optimal adaptation to required lighting conditions as well as the cost optimization of LED luminaire systems.

Significant energy savings as well as a reduction of CO₂ emissions can be achieved thanks to the integrated dimming functions (depending on the device family). Because of the large operating window (voltage/current) of these LED drivers, a wide range of LED modules are supported. The table on the next page can be used as a guide.

OSRAM sets new standards with integrated overvoltage protection for protection class I and II luminaires. The following constant current LED driver families are available for outdoor applications.

¹⁾ With external relay²⁾ Feature summary on page 3.07 ff.

Control interfaces/dimming possibilities

Stand-alone control

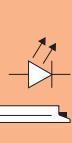

AstroDIM

AstroDIM provides multi-stage night-time power reduction based on an internal timer referenced to the power ON/OFF time. There is no need for an external control infrastructure. The unit automatically performs a dimming profile based on the predefined scheduled reference to the midpoint, which is calculated based on the power ON/OFF times.

Presence-controlled

In this dimming mode, the light output can be adjusted to the activity around each light point with an additional external sensor powered by the mains, regardless of the actual dimming level of the AstroDIM mode.

Group control

StepDIM

The StepDIM (bi-power) mode allows switching between two output levels, the “normal” mode and the “reduced load” mode, by means of an additional switched phase. In the “reduced load” mode, the driver reduces the lighting level and therefore the energy consumption. The light levels can be preprogrammed flexibly.

MainsDIM

This feature is mainly used in combination with magnetic ballasts for outdoor applications. The light output is reduced by lowering the mains voltage. The reduction of the mains voltage is applied by a controller in the distribution cabinet.

Network control

DALI

In DALI mode, the driver can be integrated into a light management system such as the OSRAM Street Light Control system. The standardized DALI interface enables bi-directional communication between the driver and the light management system, which means that stepless dimming, status requests and addressing of each individual luminaire are possible. For additional information, please refer to pages 3.06 ff. and 4.60 ff.

0-10V

With a 0-10V interface, the driver can be integrated into a light management system such as the OSRAM Street Light Control system. This uni-directional interface allows adjusting the light output of the system.

Additional features

External temperature sensor

This feature allows the temperature protection of the LED module or the complete luminaire in hot ambient temperatures via an external sensor (e.g. NTC, negative temperature coefficient resistor). The derating can be modified via the Tuner4TRONIC® software.

Tuning Factor

Within limits predefined by the luminaire manufacturer, this feature allows an adjustment of the amount of light in the field or in production. Thus, one luminaire can manage different lumen packages. If the feature is combined with LEDset2, other lumen packages can also be achieved which differ in terms of resistor coding.

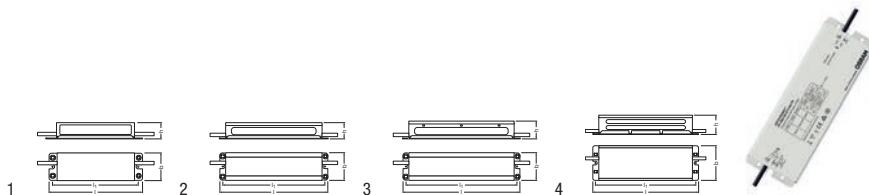

High overvoltage protection

With the OSRAM-developed EQUI connection, these drivers (depending on the OPTOTRONIC® family type) offer a high overvoltage protection up to 10 kV in common mode (6 kV in differential mode) for protection class I or II, protecting not only the LED driver, but also the connected module.

OPTOTRONIC® Outdoor

Constant current LED drivers – Non-dimmable

1) in development, data preliminary

Product features

- Supply voltage: 220...240 V
- Current output range: 70...1,050 mA
- Easy and fast wireless luminaire programming via NFC
- Flexible current setting with one additional wire (LEDset2)
- AstroDIM for autonomous dimming with five independent levels (astro, time mode)
- Standby power consumption: < 0.5 W
- Constant lumen function
- Overtemperature protection via external NTC
- Integrated customizable thermal management (Driver Guard)

Product benefits

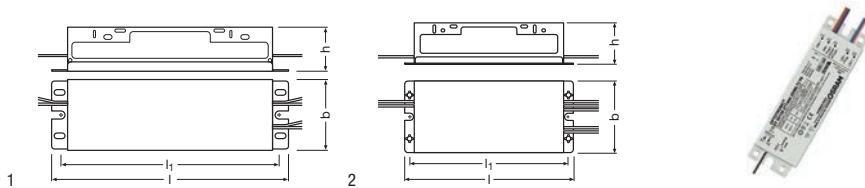

- Easy and fast wireless luminaire programming
- Very high efficiency
- Optimized for AstroDIM operation
- Wide current output range: 200 mA...1050 mA
- High surge protection: up to 10 kV (in protection class I or II)
- Great flexibility due to wide operating temperature range of -40...55 °C or 60 °C
- Protection through double isolation between mains input and LED output

Areas of application

- Street and urban lighting
- Industry
- Suitable for outdoor applications in luminaires with IP > 65
- Suitable for use in outdoor luminaires of protection class I and II

Product features

- Available with different wattages: 50 W, 100 W, 110 W
- Input voltage: 120...277 V
- Available with output current range: up to 1,400 mA
- Flexible current setting with one additional wire (LEDset2)
- AstroDIM for autonomous dimming with five independent levels (astro mode)
- Isolated 0...10 V interface for unidirectional telemangement systems
- Constant lumen function
- Overtemperature protection with external NTC or LEDset2 interface

— Fast programming without mains voltage

— High efficiency

— Great flexibility due to wide operating temperature range of -40...55 °C

— Protection through double isolation between mains input and LED output

— IP rating: IP64

Areas of application

- Street and urban lighting
- Industry
- Suitable for luminaires of protection classes I and II

Equipment/Accessories

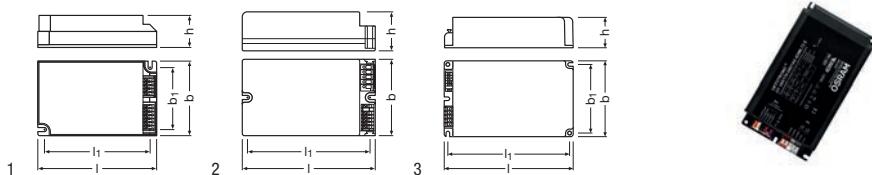

- OT Programmer hardware for configuration of 2DIM ECGs necessary
- Programmable via Tuner4TRONIC® software

Product benefits

- 2DIM functionality in one device (AstroDIM, 0...10 V)
- High surge protection: up to 6 kV (in protection class I or II)

- Current output range: 70...1,050 mA
- Flexible current setting with one additional wire (LEDset2)
- AstroDIM for autonomous dimming with five independent levels (astro, time mode)
- Allows for energy saving in twilight phases
- MainsDIM function for dimming via reduction of line voltage amplitude
- Isolated DALI interface for bidirectional telemangement systems
- Standby power consumption: < 0.5 W
- Constant lumen function
- Overtemperature protection via external NTC

Product benefits

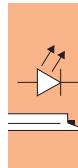

- 4DIM functionality in one device (StepDIM, AstroDIM, MainsDIM, DALI)
- Very high efficiency
- High surge protection: up to 10 kV (1 pulse)/8 kV, in protection class I or II
- Low luminous efficacy tolerance through low output current tolerance of ± 3 %
- Great flexibility due to wide operating temperature range of -40...55 °C or 60 °C
- Protection through double isolation between mains input and LED output

Areas of application

- Street and urban lighting
- Industry
- Suitable for outdoor applications in luminaires with IP > 54
- Suitable for use in outdoor luminaires of protection class I and II

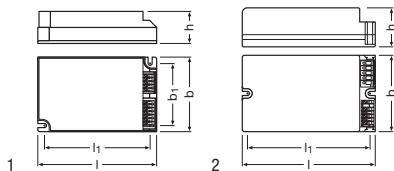

Equipment/Accessories

- DALI magic hardware for configuring
4DIM ECGs necessary
- Programmable via Tuner4TRONIC® software

OPTOTRONIC® Outdoor

Constant current LED drivers with 4DIM/DALI and NFC

1) in development, data preliminary

Product features

- Supply voltage: 220...240 V
- Current output range: 70...1,050 mA
- Easy and fast wireless luminaire programming via NFC
- Flexible current setting with one additional wire (LEDset2)
- AstroDIM for autonomous dimming with five independent levels (astro, time mode)
- Allows for energy saving in twilight phases
- MainsDIM function for dimming via reduction of line voltage amplitude
- Isolated DALI interface for bidirectional telemangement systems
- Standby power consumption: < 0.5 W
- Constant lumen function
- Overtemperature protection via external NTC
- Integrated customizable thermal management (Driver Guard)

Product benefits

- 4DIM functionality in one device (StepDIM, AstroDIM, MainsDIM, DALI)
- Easy and fast wireless luminaire programming
- Very high efficiency
- Wide current output range: 200 mA...1050 mA
- High surge protection: up to 10 kV (in protection class I or II)
- Great flexibility due to wide operating temperature range of -40...55 °C or 60 °C
- Protection through double isolation between mains input and LED output

Areas of application

- Street and urban lighting
- Industry
- Suitable for outdoor applications in luminaires with IP > 54
- Suitable for use in outdoor luminaires of protection class I and II

Light is smart

NFC makes the installation and maintenance of LED street lighting as easy as it gets. Use the **Tuner4TRONIC® Field app** for the wireless NFC programming of OT 1DIM and OT 4DIM NFC LED drivers.

Light is OSRAM

OSRAM

Tuner4TRONIC®

The Tuner4TRONIC® (T4T) software suite allows luminaire manufacturers to program OSRAM drivers via DALI and/or NFC in a simple, fast and cost-effective way, speeding up the production process. This software for Windows consists of three main modules: T4T Development (T4T-D), T4T Production (T4T-P) and T4T Machine (T4T-M).

With T4T Development, drivers can be configured by setting each individual parameter such as output current, dimming levels, constant lumen output, operating modes and much more. With the Configuration Lock, drivers can be protected with a multi-level password system against unauthorized modification while service personnel can be given access to modify selected features. When the configuration is finished, the settings are exported as an encrypted read-only production file and sent to the assembly line.

T4T Production features a multilingual user interface and allows operators to load the encrypted production files intuitively to start the automatic programming for fast mass production. Rest assured, no driver configuration changes can be done at this stage.

DALI magic, OT Programmer or FEIG NFC readers can be used as hardware programming interfaces to program the drivers. The FEIG NFC readers allow an even quicker, wireless and mains-free programming process. The OT Programmer is used for non-DALI OT drivers with universal input voltage 120-277 VAC.

T4T Machine completes our unique software suite and consists of a DLL and a command line tool to provide integration into existing automated programming and testing stations in the factory line.

In addition, OSRAM offers custom integration into ERP systems as an add-on service to optimize the production process.

Tuner4TRONIC® for Windows can be downloaded from: www.osram.com/t4t

Wireless NFC interfaces

PRH101

CPR30

OT Programmer

OSRAM also offers programmable UL-certified LED drivers. These drivers can be programmed with the OT Programmer Windows software together with the OT Programmer programming interface (Prog+).

To download the OT Programmer software, please visit:
www.osram.com/otprogrammer

Tuner4TRONIC® Field app

The new T4T Field app makes the installation and maintenance of street light luminaires as easy as it gets by allowing the wireless programming of OSRAM outdoor OT 1DIM and OT 4DIM NFC LED drivers without the need for mains voltage. After entering the service password of the LED driver provided by the luminaire manufacturer, the user-friendly interface shows how to scan the LED driver's NFC tag with the smartphone's integrated antenna or the optional NFC Scanner (Bluetooth to NFC adapter) and adjust the luminaire settings.

With the T4T Field app, the luminaire settings can be easily adapted according to the specific needs and within a predefined range set by the luminaire manufacturer. Typical examples are the adjustment of light output depending on the required road class or changing the dimming times or levels to optimize energy savings. With the Tuner4TRONIC® Field app there is also the easy possibility to disable dimming functionality as it is requested for special applications such as roundabouts or pedestrian crossings.

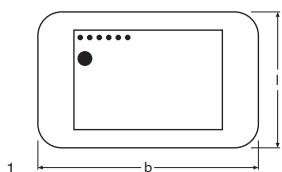

Replacing a flexible LED luminaire with a new luminaire of the same type was never as easy as now! Using the copy-and-paste functionality of the T4T Field app, the settings of the original luminaire can be easily transferred to the new one in a matter of seconds.

The T4T Field app only supports LED drivers that have been protected with a Master key by the luminaire manufacturer to ensure that only authorized parameters can be modified and thus avoid unauthorized modifications.

DALI magic

USB to DALI programming interface

Product name	GTIN (EAN)	Hz	W SYSTEM	IP	COLOR	I [mm]
DALI magic	4052899039551	50 / 60	7	IP20	White	120
Product name	b [mm]	h [mm]	V	1	No.	
DALI magic	76	28	100...240	1	1	

Product features

- USB DALI converter for Tuner4TRONIC® and DALI Wizard software for Windows PC
- Pushbutton to test DALI dimming without the need of connection to a computer
- Powered by USB or by included universal power supply
- Integrated automatic DALI supply of up to 64 devices (up to 4 if powered by USB)

Areas of application

- Configuration of DALI ECG functions
- Monitoring of DALI installations

Equipment/Accessories

- Universal power supply (100...240 V_{AC}, 5.9 V_{DC}, 1.15 A, EU plug)
- USB cable (male A to male B), 180 cm
- Bipolar plug for DALI connection

References/Links

Compatible software available at
www.osram.com/ds-tools

Tuner4TRONIC® software available at
www.osram.com/t4t

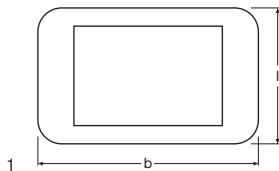

Tuner4TRONIC® software features (included)

- Intuitive configuration of up to 64 DALI electronic control gears
- Offline/online configuration of DALI installations
- "DALI Spy" functionality for recording DALI-line data flow

- Programming of OSRAM ECG
- Suitable for shop floor environments
- Performs fast manual and automatic programming
- Easily enables the use of the pre-parameterization service

PRH101-USB

NFC programming interfaces

Product name	GTIN (EAN)				
PRH101-USB	4055462165152	230	80	100	1

Product features

- Standard USB interface
- Wireless programming of OPTOTRONIC® devices with the NFC interface
- Programming without applying mains voltage to the OPTOTRONIC® driver

Equipment/Accessories

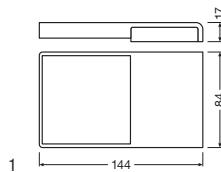

- USB cable for connection to PC with Tuner4TRONIC® software

References/Links

Tuner4TRONIC® software available at
www.osram.com/t4t

**CPR30-USB**

NFC programming interfaces

Product name	GTIN (EAN)				
CPR30-USB	4055462165169	144	84	17	1

Product features

- Standard USB interface
- Wireless programming of OPTOTRONIC® devices with the NFC interface
- Programming without applying mains voltage to the OPTOTRONIC® driver

Equipment/Accessories

- USB cable for connection to PC with Tuner4TRONIC® software

References/Links

NFC Scanner

Bluetooth to NFC adapter for Tuner4TRONIC® Field

Product name	GTIN (EAN)	[mm]	[mm]	[mm]		
NFC Scanner	4055462203571	76	42	18	IP54	1

Product features

- Small and robust NFC antenna extension
- Provides NFC functionality to smartphones without NFC antenna using Bluetooth

Tuner4TRONIC® Field app features

- Wireless and mains voltage-free programming of OSRAM outdoor NFC LED drivers
- Adjustment of the light output and dimming levels of a luminaire
- Copy and paste luminaire settings from defective to replacement LED drivers
- Support of OSRAM's new generation of OT 1DIM and 4DIM outdoor LED NFC drivers

Areas of application

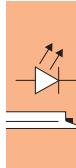

- Wireless programming of LED drivers using the T4T Field software

Equipment/Accessories

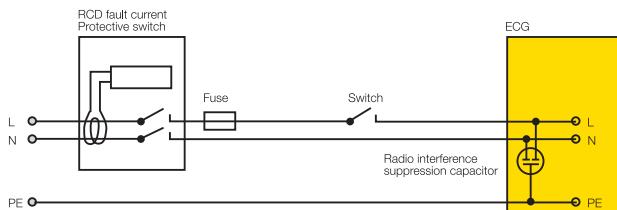

- USB cable (Micro USB type B)

References/Links

Tuner4TRONIC® software available at
www.osram.com/t4t

Installation and operating instructions

The following installation and operating instructions have been included to help you get the most out of your electronic control gears.

Requirements

The requirements to be met by lighting systems with electronic control gears fall into the following categories:

1. Residual currents/residual current detector
2. Capacity for automatic cutouts/switch-on currents
3. ECGs in 3-phase operation
(overvoltages/undervoltages/missing neutral conductor)
4. LED drivers in emergency lighting systems
(voltage ranges and switch-on times)
5. Power factor/compensation
6. Permissible cable lengths
7. DALI ECGs with Touch DIM®/corridor function should
not be operated on open DALI lines
8. Permissible switching cycles for LED drivers
9. Dimming operation
10. Luminaires with LED drivers
11. Ambient and control gear temperatures
12. LED drivers for outdoor luminaires
13. Wiring of LED drivers
14. Lifespan and reliability of LED drivers

For more detailed information, see the Technical Guides at
www.osram.com/ds-certificates

1. Residual currents/residual current detector

Problem

For LED drivers with protective earth (PE), both the high short-duration inrush current and the small leakage current from the interference suppression capacitors in the electronic control gears can trigger the residual current detector.

Solution

- Distribute luminaires across 3 phases and use 3-phase circuit breakers
- Use surge-current-resistant, short-delay circuit breakers
- If permissible, use 30 mA RCDs

2. Capacity for automatic cutouts

On switch-on at peak voltage, the storage capacitors of electronic control gears cause a high but very brief current pulse. OSRAM offers an inrush current limiter for some OPTOTRONIC® devices. The EBN-OS restricts the switch-on current, which means that a larger number of LED drivers can be connected to an automatic cutout.

When using the values given in the tables, please note the following:

- For LED driver operation, the load data relates to switching on at peak voltage
- If circuit breaker types have C characteristics, the number of permitted luminaires for LED driver operation can be increased by 70 % (as compared to B characteristics)
- Circuit breaker design:
The specified loading is for single-pole circuit breakers. When multi-pole circuit breakers (2-pole, 3-pole) are used, the number of permitted luminaires is reduced by 20 %.
- Circuit impedance:
The specified loading applies with reference to a line impedance of 800 mΩ (corresponding to a 15 m long cable with a diameter of 1.5 mm from the distribution board to the first luminaire and a further distance of 20 m to the middle of the circuit; at a line impedance of 400 mΩ, the permitted values are reduced by 10 %, and by 20 % with 200 mΩ)

Circuit impedance: The specified loading applies with reference to a line impedance of 800 mΩ (corresponding to a 15 m long cable with a diameter of 1.5 mm² from the distribution board to the first luminaire and a further distance of 20 m to the middle of the circuit; at a line impedance of 400 mΩ, the permitted values are reduced by 10%, and by 20% with a line impedance of 200 mΩ).

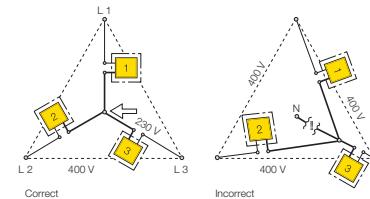

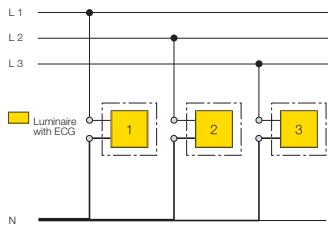

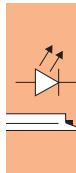

3. ECGs in 3-phase operation

Overvoltage/undervoltage/no neutral conductor

1. Check whether the line voltage is within the application range of the ECG (AC/DC range from 198 V to 254 V for example).
2. The mains connection should only be made to the luminaire terminal. For luminaires or luminaire groups in 3-phase circuits.
3. Make absolutely sure that the neutral conductor is correctly connected to all luminaires and that it is making proper contact.
4. Cables should only be connected or disconnected when no voltage is present.
5. For 3x230/240V supply networks in triangular circuit arrangements, protection by way of common disconnection of the phase conductor is necessary.

Important

- In new systems, the loads must not be connected when the insulation resistance is measured with 500 V DC, as, according to VDE 0100-600 Section 9, the test voltage is also applied between the neutral conductor (N) and all 3 external lines (L1, L2, L3). In existing systems, it is sufficient to conduct an insulation test between the external conductors (L1, L2, L3) and protective earth (PE) without disconnecting from the network. The neutral conductor (N) and protective earth (PE) must not be electrically connected in any way while this is being done. For this insulation measurement (500 V = to \odot), the neutral conductor disconnection terminal may only be opened after the line voltage has been disconnected.
- Make sure that the N conductor is correctly connected before putting the equipment into operation.
- During operation of the lighting system, do not disconnect the N conductor under any circumstances.

The diagram above shows the wiring for luminaires or luminaire groups in 3-phase circuits and with a common neutral conductor. If the common neutral conductor is interrupted in a 3-phase star configuration and voltage is present, then luminaires or groups of luminaires may be exposed to unacceptably high voltages and the electronic control gears may be destroyed.

4. LED drivers in emergency lighting systems with DC voltage

Permitted battery voltage	Upper limit	Lower limit
OTi DALI ²⁾	276 V ¹⁾	176 V
OTi ²⁾	276 V ¹⁾	176 V
OT FIT ²⁾	276 V ¹⁾	176 V
Switch-on times	Maintained Supply is switched from AC to DC	Non-maintained Emergency luminaires are switched on from cold
OTi DALI	0.2 s	0.3 s ³⁾ /0.6 s ⁴⁾
OTi	< 0.5 s	< 0.5 s
OT FIT	< 0.5 s	< 0.5 s

1) DC voltage or pulsed DC voltage (> 198 V necessary for switch-on)

2) OTi DALI and OTi drivers (not dimmable) can detect DC voltage and adjust to 15 % output current. Positive with regard to battery capacity.

If higher output currents than 15 % (factory setting) are necessary for OTi DALI, these can be configured using DALI magic/Wizard or DALI magic/Tuner4TRONIC®.

3) Switch-on time (emergency lighting mode activated)

4) Switch-on time (at 230 V/50 Hz/full load in accordance with DALI standard) emergency lighting mode not activated

Please find conformity certificates with central battery systems online (please see the "Others" section):

EATON Conformity certificate

www.osram.com/ds-certificates

INOTEC Conformity certificate

www.osram.com/ds-certificates

5. Power factor/compensation

The power factor λ for an electrical load is the ratio of the effective power ($P_{\text{eff}} = \text{voltage} \times \text{effective current}$) to the apparent power ($P_{\text{app}} = \text{voltage} \times \text{current}$). This value is affected both by the phase displacement $\cos \phi$ between the current and the voltage and by the current distortion ε .

$$\lambda = \frac{P_{\text{eff}}}{P_{\text{app}}} = \varepsilon \cdot \cos \phi$$

However, distortion in the sine-wave current supply occurs during the operation of electronic control gears. Generally speaking, these distortions are classified by integer multiples of the line frequency (harmonics).

The harmonic content of the line current is strictly controlled by national and international standards (IEC 61000-3-2).

OSRAM LED drivers have integrated active electronic harmonic filters for this purpose, which ensure a value for ε of more than 0.95 and therefore a power factor λ greater than 0.9 (exceptions are indicated).

6. Permissible cable lengths

OPTOTRONIC®

The maximum cable length between OPTOTRONIC® and the LED module depends on the type of cable, the currents carried, compliance with radio interference limit values and how the cable is routed. The following maximum cable lengths can be used as guidelines:

Max. permissible LED driver cable length	family	Typical LED driver type
10 m	OPTOTRONIC® constant voltage: 12V and 24 V	e.g. OT.../12 P/ OT... 24 DIM (P), OTi DALI 75/24
2 m	OPTOTRONIC® constant current	e.g. OT...350..., OTi DALI..., OTe
2 m	OPTOTRONIC® OUTDOOR: constant current	OT 4DIM
10 m	OPTOTRONIC® OUTDOOR: constant current	OT 2DIM
10 m	OPTOTRONIC® OUTDOOR: constant current	OT ... 700 P5
2 m	LEDset cables	

Cable routing

For reasons of interference suppression, the power cable should not be laid parallel to the casing and/or the secondary cable. This will avoid high-frequency coupling effects.

Measurement of secondary voltage

Standard multimeters with appropriate accuracy can be used.

7. DALI ECGs with Touch DIM®/corridor function should not be operated on open DALI lines

Due to an increasing number of questions about DALI installations where no DALI controller is (yet) connected, we recommend you short-circuit the (currently) open DALI lines in the sub-distribution cabinet to avoid unwanted switching/unsynchronized dimming.

Recommendation

In DALI installations where no DALI controller is (yet) connected, short-circuit the open DALI lines in the sub-distribution cabinet (also applies to installations where Touch DIM®/corridor mode operation is planned).

Reason

To avoid unwanted switching/unsynchronized dimming caused by electrical distortions/coupling into open DALI lines.

Technical background

Even low induced voltages can trigger the DALI Touch DIM® mode on the DALI input connector of the control gear and therefore cause different and unsynchronized dimming levels. This antenna effect depends on the length and location of the open DALI line. With open DALI lines of more than 10 m, we recommend short-circuiting the DALI line.

Reset in cases of error

If the DALI ECGs have already been triggered incorrectly, do the following:

1. Disconnect the mains power to the DALI ECGs and connect a DALI control unit (e.g. OSRAM DALI Repeater or OSRAM DALI MCU)
2. Reconnect the power: The DALI ECGs will detect the signal and switch back to DALI mode again

3. Interrupt the mains power again and disconnect the DALI control unit
4. Short-circuit the DALI line
5. Connect up the power again

Applies **only** to DALI ECGs with Touch DIM®/corridor function.

8. Permissible switching cycles for LED drivers

OPTOTRONIC® constant current LED drivers and OSRAM LED modules are designed for at least 100,000 switching cycles. For OSRAM systems used in high switching cycle applications, such as in car parks, corridors, elevators and logistics areas, this ensures reliable operation over a period of at least 5 years based on approximately 50 switching cycles per day (i.e. approx. 18,000 switching cycles per year).

No. of switching LED driver cycles		Comment
> 1,000,000	DALI LED driver OTi DALI...	DALI driver in standby mode, switching via DALI commands
> 150,000	DALI LED driver OTi DALI... Window driver OTi...	Switching on the mains side of the LED driver ON/OFF
> 150,000	LED driver with three current settings or a fixed output current OT FIT	Switching on the mains side of the LED driver ON/OFF
> 100,000	OT ECO OTe...	Switching on the mains side of the LED driver ON/OFF

In-house tests at OSRAM have shown that even significantly higher switching cycles can be achieved without failure of an OSRAM LED driver or OSRAM LED module.

Another benefit of the LED light solution is the fact that – in contrast to fluorescent lamp solutions – no “burn-in” time is required: LED modules immediately achieve the full luminous flux.

For applications with particularly high switching cycle requirements, OSRAM recommends DALI LED drivers which are permanently operated in standby mode (permanent power supply voltage) and switched exclusively via DALI commands (DALI command 0 = 0 % luminous flux and DALI command 254 = 100 % luminous flux or any other luminous flux required). Since the DALI LED drivers remain in standby mode, ON/OFF switching on the primary side is no longer required. This ensures that inrush current peaks have no negative effect on the service life of either the DALI LED driver or the LED module. This operating mode enables more than 1,000,000 switching cycles.

Another user-friendly option for corridors and storage areas is to define a lower dimming setting of 5 to 10 % which provides orientation in the room. This means that the illumination level will only be increased when a person or a forklift truck enters the corridor or the storage area.

Possible DALI solution for applications in corridors:
DALIeco with activated corridor function
(2 changing lighting values)

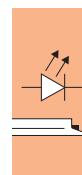

9. Dimming operation

— OPTOTRONIC® provides the following interfaces for dimming: 1...10V, DALI, phase-cut dimmer. The minimum dimming value depends on the type of device. Constant voltage LED drivers can be extended using appropriate DIM modules (page 3.51 ff.).

10. Luminaires with LED drivers

The following general points apply to luminaires with LED drivers:

- The temperature limits of the LED drivers regarding ambient temperature and measuring point temperature on the device must not be exceeded (see 11. Ambient and control gear temperatures).
- The maximum permissible radio interference suppression values (EN 55015) must not be exceeded. Make sure the protective conductor and the function earth are correctly connected. Running the lamp cables and protective conductor together (e.g. NYM cables) may lead to problems due to high-frequency interference.

11. Ambient and control gear temperatures

The temperature ranges specified for the relevant control gear must be maintained to enable the LED driver to operate reliably. Generally speaking, lower operating temperatures can extend the life of LED drivers. When LED drivers are built into luminaires, the measuring point temperature T_c on the casing is the crucial parameter. The maximum permissible value specified for the device must not be exceeded.

12. LED drivers for outdoor usage

Some constant current and constant voltage LED drivers of the OT 2DIM, OT 4DIM, OT...E and OT..P families have been especially designed for outdoor usage. These drivers are equipped against moisture (up to IP67), mains voltage peaks (up to 6 kV) and vibrations (wind load, railroad vehicles).

More information about ingress protection (IP) can be found in the technical application guide "IP codes in accordance with IEC 60529" at: www.osram.com/ds-tag-ip

For the technical data of these drivers, please check the technical descriptions for the Outdoor drivers earlier in this chapter (LED drivers).

13. Wiring of LED drivers

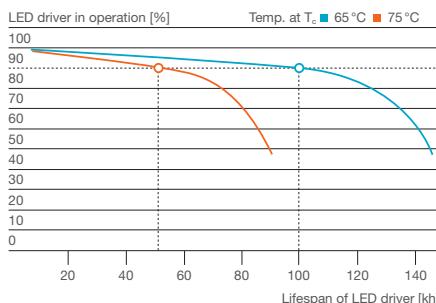

In general, connecting OPTOTRONIC® LED drivers on the secondary side is not permitted. In exceptional cases, parallel connection of OT 50/220-240/24 E and OT 75 220-230/24 E is possible. Moreover, series connection of OPTOTRONIC® LED drivers on the secondary side requires specific indication in the datasheet. Please also see the technical application guide "OPTOTRONIC® LED drivers for indoor applications."

14. Lifespan and reliability of LED drivers

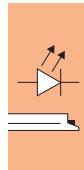

The lifespan of OPTOTRONIC® LED drivers is dependent on the lifespan of the electrical components used and their individual electrical and thermal loads. Each OPTOTRONIC® LED driver is marked with a so-called T_c point. To ensure reliable operation, the temperature at the T_c point should not exceed the defined maximum temperature. This will also ensure that OPTOTRONIC® LED drivers typically achieve a rated life of up to 50,000 hours at a maximum failure rate of 10 %.

If you install an LED driver outside of a luminaire, please make sure that it is not located too close to a source of heat. Otherwise there is a risk of overheating. The exponential dependency between lifespan and temperature means that the life of an LED driver can be extended when it is always operated below the defined maximum temperature at the T_c point. As a rule of thumb, you can expect to double the lifespan of an OPTOTRONIC® LED driver if the temperature maintained at the T_c point is 10 °C lower than the maximum permissible temperature. The following graphic shows the typical lifespan of an OPTOTRONIC® LED driver at different T_c temperatures (with a nominal service life of 50,000 hours and a maximum T_c temperature of 75 °C).

Expected lifespan of an OPTOTRONIC® LED driver

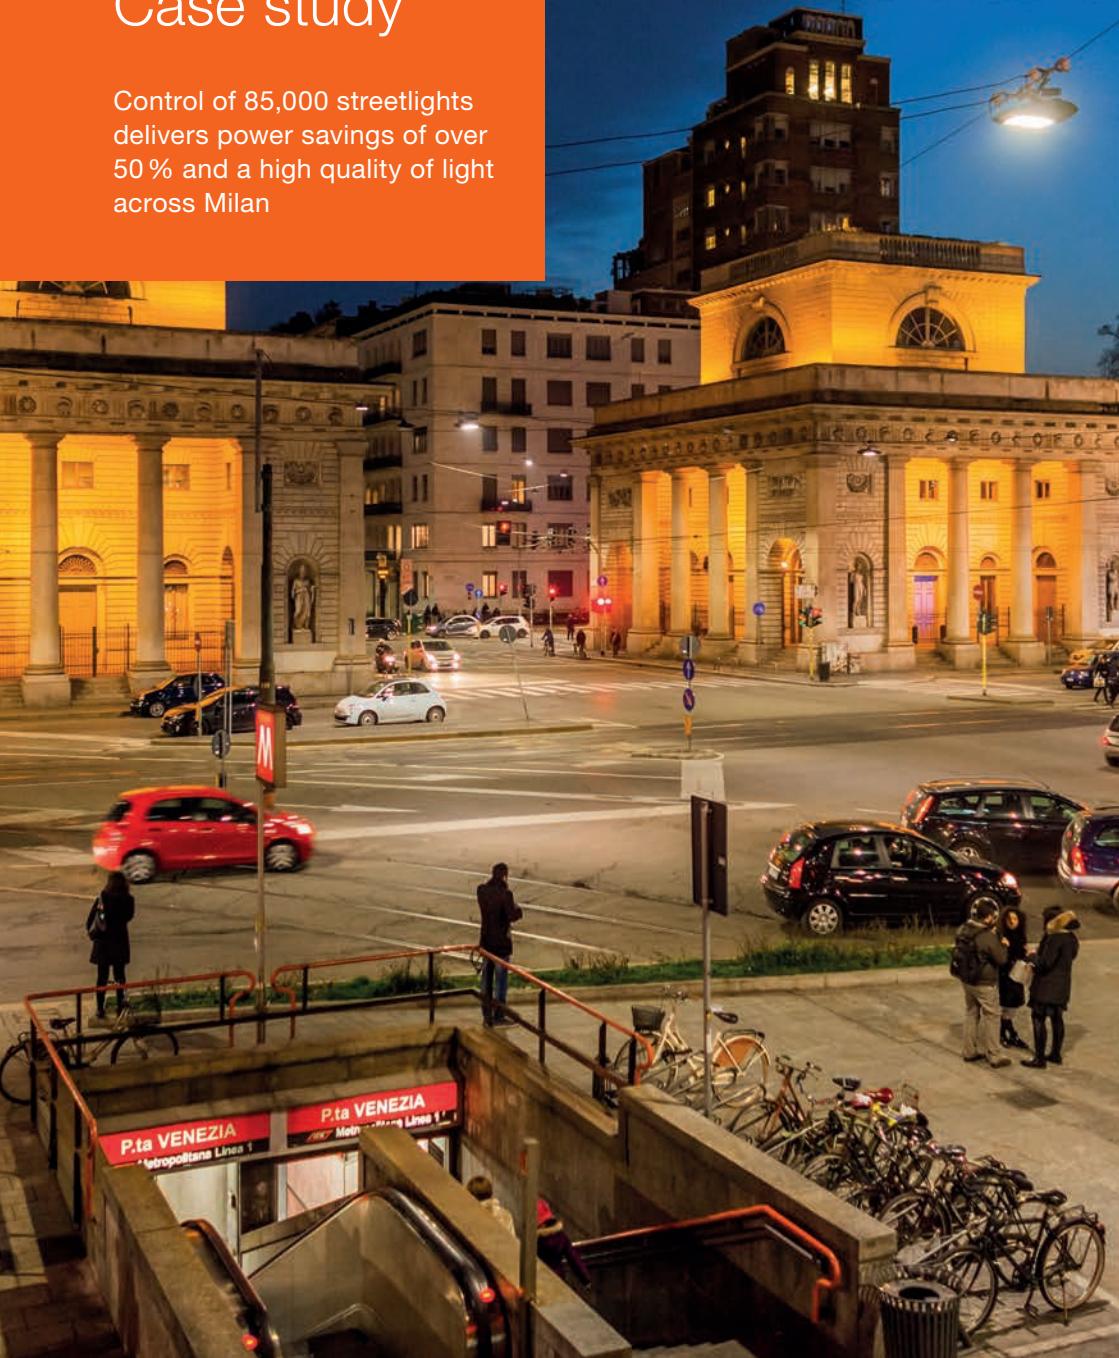

Special applications, such as operation in corrosive atmospheres, strong vibrations, impermissible voltage conditions etc., may necessitate further protective measures.

Case study

Control of 85,000 streetlights delivers power savings of over 50 % and a high quality of light across Milan

Milan appears in a new light – in every sense of the word: For the first time, an Italian metropolis has opted for a large-scale upgrade of its street lighting to LED lighting. There is much better light in the streets of the city thanks to the state-of-the-art luminaire design and considerable energy and maintenance savings.

85,000 of the 141,000 street lights replaced come from Italian luminaire manufacturer AEC Illuminazione and are controlled by OPTOTRONIC® 3DIM electronic control gears. When switched on, their brilliant light provides optimum visibility and at the same time high energy savings. The aim is to achieve power savings of more than 50 % through the switch to LED technology.

The OPTOTRONIC® 3DIM LED drivers ensure timed lighting control throughout the night, and optimum LED control, especially at high and low temperatures.

Among other things, the LED drivers feature three control and dimming options – from classic bi-phase dimming (StepDIM), or using the integrated astronomical clock (AstroDIM) to integration in digital tele-management systems via a DALI interface.

“There were many good reasons for choosing this OSRAM product. Reliable overvoltage protection, a large variety of functions and easy installation, just to name a few. And we are now also using the latest technology which is available at the moment as far as energy savings are concerned,” says Alessandro Cini, CEO at AEC Illuminazione. Particularly noteworthy is the high surge (overvoltage) protection of the 3DIM DALI OPTOTRONIC® drivers (up to 6 kilovolts in protection classes I and II). The latest 4DIM DALI LED driver now protects from surges of up to 10 kilovolts (one pulse).

All under control with Light Management Systems

OSRAM light management systems (LMS)

The increasing demand for lighting solutions for more and more energy saving, flexibility and individual customization options has dramatically changed lighting requirements. Having the right light brings a greater sense of well-being, for example, and boosts motivation. Light management systems from OSRAM enable you to implement a diverse range of dynamic lighting solutions in a simple and efficient way – from simple dimming to daylight simulation.

OSRAM provides individual light management systems (LMS) for many different applications:

- Luminaire-integrated solutions for autonomous luminaires
- Room controllers for fast and easy installation in multiple rooms
- Flexible floor controllers for connected light in medium-sized installations
- Powerful building light management system with data analytics for big installations

Product highlights

Bluetooth® enabled light controls

New generation of OSRAM light controls with Bluetooth® interface

- **DALI ACU BT**

Easy-to-install light controller for integration into luminaires and flush-mounted boxes

- **DALIeco BT**

Multi-functional luminaire-integrated light controller

- **LUXeye®**

Stand-alone ceiling-integrated light controller

HubSense®

- Hybrid technology, design freedom
- Scalable for any building size
- Connected with data analytics
- Innovative and brandable user interface

DALI PROFESSIONAL

Big feature update

- App interface/configurator
- Tunable White control
- Human Centric Lighting (HCL) functions
- Color control functions
- Controller interconnectivity

FXS system

- Wireless light control for 12V and 24V LED modules
- Bluetooth® Low Energy (BLE) app by Casambi
- Up to 240W control in a four-channel device: White, Tunable White, RGB, RGBW

Touch DIM®

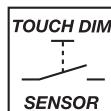

Lighting control without a controller and dimming without a control line

The Touch DIM® function in the DALI ECG family makes it possible to dim and switch the control gear directly with line voltage at the DALI control terminals. There is no longer any need for a separate controller as the ECG itself acts as the controller. By using DALI to 1...10 V converters, it is also possible to control 1...10 V ECGs via Touch DIM®. The Touch DIM® function is characterized in particular by protective soft starting, precise setting of the required light value, manual storage of the switch-on value by double-clicking or switching on at the last dimmer value and automatic restoration of the last state after a power failure.

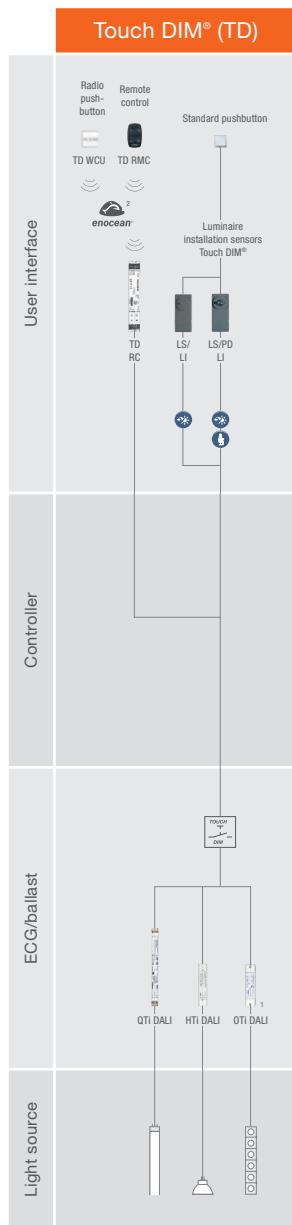

In conjunction with Touch DIM® sensors, it is possible to provide daylight-dependent and presence-dependent lighting control, and with the 2-channel radio switch + associated radio receiver module, all Touch DIM® compatible electronic control gears can be controlled. Both radio components are absolutely maintenance-free. Up to 30 radio switches can be easily saved and deleted in each receiver module with one click. Thanks to innovative induction technology, batteries are not needed to power the transmitter module in the radio switch. For realization of large Touch DIM® installations or long line lengths, the usage of a DALI Repeater is recommended. Thereby, the signal of the pushbutton will be transformed into a DALI signal. In this way, the usage of pushbutton control is possible for all DALI products.

Applications

- Free-standing and other single luminaires
- Strip lighting
- Modernization of existing installations

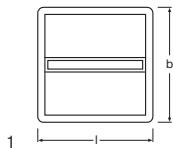

System overview

Touch DIM® WCU

User interfaces for light management systems

Product name	GTIN (EAN)	CONTROL	Touch DIM	30 ¹⁾	IP	Wall mounting	COLOR
TOUCH DIM WCU	4008321032737		Touch DIM	30 ¹⁾	IP	Wall mounting	White
Product name		I [mm]	b [mm]	t h [mm]			
TOUCH DIM WCU	80	80	20	20	1		

1) Maximum / Valid inside

Product features

- Batteryless radio pushbutton for up to 2 lighting groups
- Frequency band: 868.3 MHz
- Output power: 10 mW

Areas of application

- Wireless control in industry and office areas

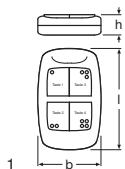

Product benefits

- Dimming without control line by maintenance-free EnOcean radio technology
- Batteryless operation thanks to inductive power generation

Touch DIM® RMC

User interfaces for light management systems

Product name	GTIN (EAN)	CONTROL	30 ¹⁾	IP	COLOR
TOUCH DIM RMC	4008321183033	Touch DIM	30 ¹⁾	IP20	Black
Product name		I [mm]	b [mm]	h [mm]	10 No.
TOUCH DIM RMC	82	49	20	10	1

1) Maximum / Valid inside

Product features

- Batteryless radio remote control for up to 4 lighting groups
- Frequency band: 868.3 MHz
- Output power: 10 mW

Product benefits

- Dimming without control line by maintenance-free EnOcean radio technology
- Batteryless operation thanks to inductive power generation

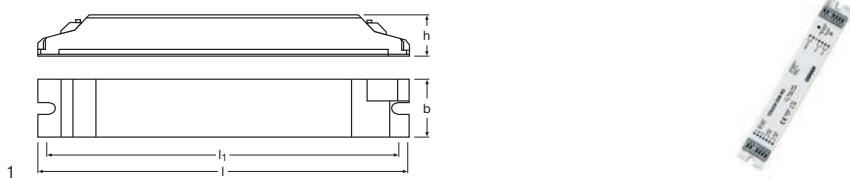

Areas of application

- Wireless control in industry and office areas

Touch DIM® RC

User interfaces for light management systems

Product name	GTIN (EAN)	V	Hz	CONTROL	IP	Luminaire integration / Ceiling integration	T _a
TOUCH DIM RC	4008321031938	220...240	50...60	Touch DIM	IP20		0...+50
Product name	I [mm]	b [mm]	h [mm]	l [mm]	25	1	
TOUCH DIM RC	189	30	21	180			

Product features

- Radio receiver for batteryless EnOcean radio pushbuttons for 2 lighting groups
- Maximum power input: 1.5 W
- Frequency band: 868.3 MHz
- 2 floating semiconductor relay outputs max. 45 mA/240 V
- Up to 30 transmitters can be trained

Areas of application

- Wireless control in industry and office areas
- Ceiling or independent installation via LMS CI BOX possible

Equipment/Accessories

- Suitable for up to 15 QTi DALI ECGs, OTi DALI ECGs or HTi transformers per output

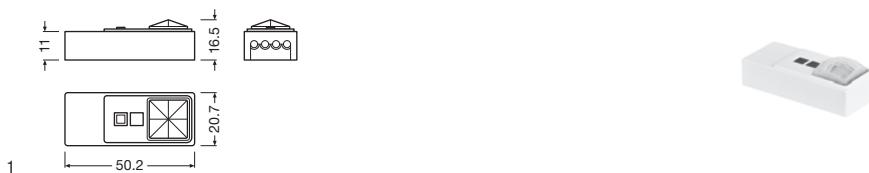

Product benefits

- Dimming without control line by maintenance-free EnOcean radio technology

LS/PD LT2 LI UF

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	LEDset	4	IP	Luminaire integration	COLOR
LS/PD LT2 LI UF	4052899984615		LEDset	4	IP20		White
Product name							
LS/PD LT2 LI UF		50.2	20.7	16.5	10	1	

Product features

- Touch DIM® light and presence sensor for LEDset interface connection
- Can also be used purely as a light sensor or purely as a presence sensor

Areas of application

- Single luminaires in office areas

Equipment/Accessories

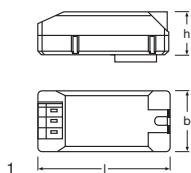

- Suitable for up to 2 OTi DALI UltraFlat LED drivers

Product benefits

- A setpoint for daylight-dependent control can be stored by double-clicking
- Operated via standard switches or integrated pushbutton
- Extremely low profile
- Presence detection range can be restricted by snap-on shutters

Touch DIM® LS LI

Light sensors for light management systems

Product name	GTIN (EAN)	CONTROL	LX	IP	
TOUCH DIM LS LI	4008321023087	Touch DIM	4	10...350 ¹⁾	IP20
Product name	COLOR	l [mm]	b [mm]	h [mm]	No.
TOUCH DIM LS LI	Anthracite	63	29	21	1

¹⁾ Approximately, measured at the sensor

Product features

- Touch DIM® light sensor
- Maximum signal line length: 10 m
- Maximum power input: 0.5 W

Product benefits

- A setpoint for daylight-dependent control can be stored by double-clicking
- Operated via standard switches

Areas of application

- Single luminaires in office areas

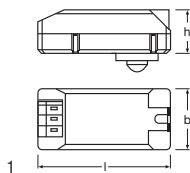

Equipment/Accessories

- Suitable for up to 4 QTi DALI ECGs or 4 HTi DALI transformers or 4 OTi DALI LED drivers

Touch DIM® LS/PD LI

Light and presence sensors for light management systems

Product name	GTIN (EAN)	CONTROL	A h m	Lx	No. of outputs	W SYSTEM	IP
TOUCH DIM LS/PD LI	4008321023025	Touch DIM	4	80 ¹⁾	10...350 ²⁾	1	0.50
Product name		COLOR	I [mm]	b [mm]	h [mm]	LED No.	
TOUCH DIM LS/PD LI	Luminaire integration	Anthracite	63	29	21	25	1

1) Approximately

2) Approximately, measured at the sensor

Product features

- Touch DIM® light and presence sensor
- Can also be operated purely as a presence sensor
- Maximum signal line length: 10 m
- Maximum power input: 0.5 W
- Delay time: 15 min

Areas of application

- Single luminaires in office areas

Equipment/Accessories

- Suitable for up to 4 QTi DALI ECGs or 4 HTi DALI transformers or 4 OTi DALI LED drivers

Product benefits

- A setpoint for daylight-dependent control can be stored by double-clicking
- Operated via standard switches

DALIeco

An intelligent and powerful light management system for lighting groups in small, medium-sized and large rooms

2 DALI channels, 1-click setup, selectable lighting modes and remote controllable extra functions – DALIeco offers a wide range of operation possibilities for intelligent energy saving solutions.

Flexible

The modular system is setting standards in terms of flexibility in planning and installing a cost-efficient light management system. The system components offer the possibility of direct luminaire integration as well as independent installation. Floor-standing luminaires, for example, can be connected wirelessly via the DALIeco Swarm Adapter, if required.

Powerful

Up to 32 DALI ECGs, 10 sensors and any number of pushbuttons can be connected to a DALIeco controller.

Intelligent

1-click setup enables fully automatic system calibration in accordance with the lighting regulations for workplaces.

Simple

Integration of extension sensors and additional pushbuttons via the DALI lines is simple and installation-friendly.

Convenient

With an intuitive PC software with visualization possibility, individual function profiles can be created, transmitted to the remote control via USB and stored at the push of a button.

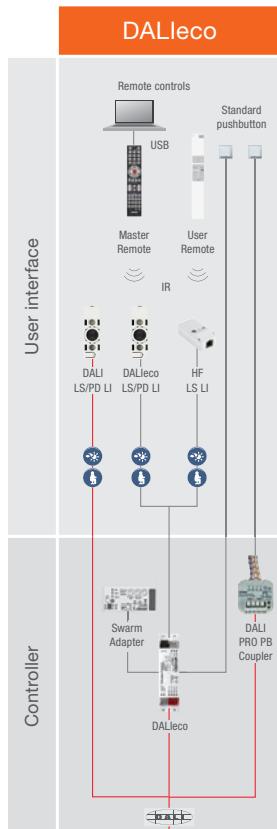

Applications

- Offices: single and group workplaces
- Classrooms and training rooms
- Corridors and foyers
- Toilets and washrooms
- Factories and warehouses

The latest software can be found here:

System overview

DALIeco Control

Control units for light management systems

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	W SYSTEM	IP	Luminaire integration
DALIECO CONTROL	4008321988645	230	50...60	DALI	2	4	IP20	
Product name	T _a	l [mm]	b [mm]	h [mm]	l ₁ [mm]	Light No.		
DALIECO CONTROL	-20...+50	118	30	21	110	25	1	

Product features

- 2 channel light control with DALI interface
- Daylight-dependent regulation and presence-dependent control of light
- 100 hours burn-in function for fluorescent lamps
- Operation via standard pushbutton or IR remote control
- Outputs with adjustable offset
- Outputs with electronical reversible overtemperature, short-circuit, overload protection
- Connection of up to 4 DALIeco LS/PD LI or 6 DALI LS/PD LI sensors
- Connection of up to 4 light and presence sensors via 4p4c plug system
- Individual adjustment of functional parameters via IR remote control
- Halogen-free polycarbonate plastic housing
- Sensor connection via polarity reversal protected 4p4c socket (RJ10)

Areas of application

- Offices
- Classrooms
- Training rooms
- Corridors
- Ceiling or independent installation via ECO CI KIT possible

Equipment/Accessories

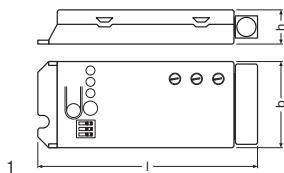

- Suitable for up to 32 electronic control gears

Product benefits

- VDE/VDE EMC certified system
- Simplified startup thanks to predefined operation modes
- Automatic and manual setting of regulation set point

DALIeco Swarm Adapter

Radio adapter for DALIeco Control

Product name	GTIN (EAN)	IP	Luminaire integration	I [mm]
DALIECO SWARM ADAPTER	4052899955646	IP20	0...+50	71
Product name	b [mm]	h [mm]	No.	
DALIECO SWARM ADAPTER	30	11	45	1

Product features

- 868 MHz radio adapter for wireless synchronization of DALIeco control units
- Bidirectional transmission of motion signals and central on/off commands
- Digital radio coding of up to seven zones and seven group addresses
- Transmitter range: up to 50 m
- VDE certified system
- Direct connection and supply via DALIeco control unit

Areas of application

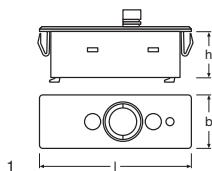

- Offices
- Corridors

Product benefits

- Simple configuration via screwdriver

DALIeco LS/PD LI NP

DALIeco light and presence sensors

Product name	GTIN (EAN)						
DALIeco LS/PD LI NP	4052899914636	5	7	80 ¹⁾	20...800	IP20	Luminaire integration
Product name							
DALIeco LS/PD LI NP	-20...+50	Gray	48	15	17	25	1

1) Approximately

Product features

- Light and presence sensor
- Presence detection via passive IR element
- Function indicator with two-color LED
- Integrated infrared remote control receiver
- Halogen-free polycarbonate plastic housing
- Connection via polarity reversal protected 4p4c socket (RJ10)

Areas of application

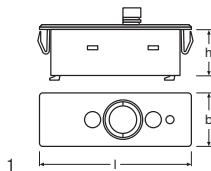

- Corridors
- Office luminaires
- Classrooms
- Ceiling installation via LS/PD CI KIT or LS/PD AP KIT possible

Product benefits

- VDE/VDE EMC certified system
- V(λ) corrected light sensor element
- Individual activation/deactivation of light and presence sensor via remote control
- Presence detection angle adjustable between 40...90° via integrated shutters

DALIeco LS/PD LI

Sensors for light management systems

Product name	GTIN (EAN)						Ceiling integration / Luminaire integration
DALIeco LS/PD LI	4008321988652	5	7	80 ¹⁾	20...800 ²⁾	IP20	
Product name							
DALIeco LS/PD LI	-20...+50	Gray	48	15	17	25	1

1) Approximately

2) Approximately, measured at the sensor

Product features

- Light and presence sensor
- Presence detection via passive IR element
- Function indicator with two-color LED
- Integrated infrared remote control receiver
- Integrated pushbutton for automatic startup/deactivation of infrared receiver
- Halogen-free polycarbonate plastic housing

Areas of application

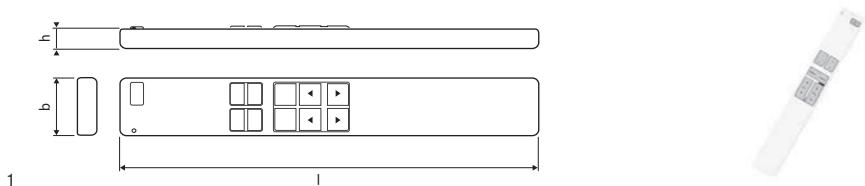

- Office luminaires
- Ceiling installation via LS/PD CI KIT possible

Product benefits

- VDE/VDE EMC certified system
- V(L) corrected light sensor element
- Individual activation/deactivation of light and presence sensor via remote control
- Presence detection angle adjustable between 40...90° via integrated shutters

User Remote

User interfaces for light management systems

Product name	GTIN (EAN)		COLOR					No.
User Remote	4008321826435	10	White	230	33	10	10	1

Product features

- Remote control for the DALIeco light control system
- Digital IR transmission
- Independent dimming and switching of two light groups
- Central switching of two light groups
- Store and recall of four light scenes
- Temporary deactivation of presence detection (holiday function)
- Supply via two included button cells type CR2032

Areas of application

- Office luminaires
- Industry

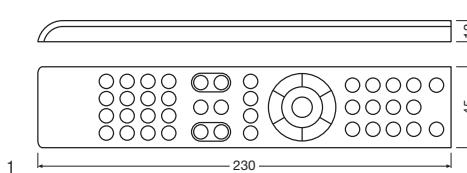

Product benefits

- Enables manual override via resume function
- Independent control of up to 15 systems thanks to adaptable IR coding

DALIeco Remote PC KIT

User interfaces for light management systems

Product name	GTIN (EAN)		COLOR					No.
DALIECO Remote PC KIT	4052899195967	10	Black	230	45	13	10	1

Product features

- Remote control for configuration and startup of DALIeco light control system
- Digital IR transmission
- LED indicator for operation and programming mode and signal transmission
- Interface for PC connection
- Supply via two included button cells type CR2032

Areas of application

- Offices
- Industry

Product benefits

- Clearly structured and labeled control elements

Easy-to-use light management with Bluetooth® interface for smartphone control

DALI ACU BT and DALIeco BT

One DALI channel for controlling standard or Tunable White LED drivers or any other DALI ECG, plug-and-play start-up and comfortable smartphone control with a free-of-charge app. Modern, state-of-the-art control for professional lighting has never been easier.

Flexible

Following the successful OSRAM toolbox approach, installation and planning of these two energy-efficient systems is extremely flexible. Components can be mounted directly into the luminaire, a false ceiling (DALIeco BT) or directly behind a classic pushbutton in a flush-mounted device box (DALI ACU BT).

Powerful

Up to 32 ECGs, four light and motion sensors and an unlimited number of pushbuttons can be connected.

Intelligent

Automatic detection of connected devices and self-calibrating differentiation of natural daylight and artificial light facilitates dynamic light control and energy saving with the use of light sensors.

Expandable and installation-friendly

All components are simply interconnected via DALI. Sensors and pushbutton couplers are directly powered via DALI and do not need additional mains supply.

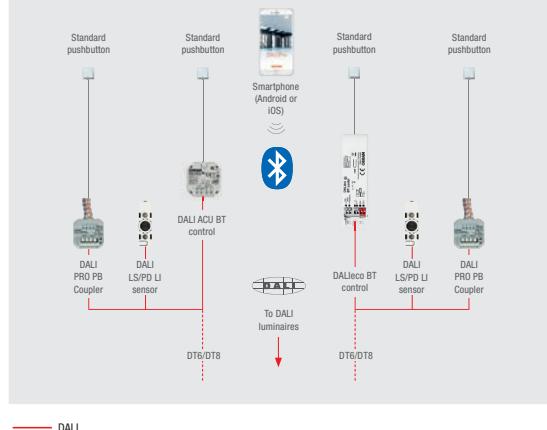

Easy light management

Intuitive user control of light levels and color temperatures, storage of individual scenes and manual override of automatic light control at any time via smartphone in combination with classic ON/OFF or dimming control by standard pushbuttons.

System overview

DALI ACU BT control/DALIeco BT control

Applications

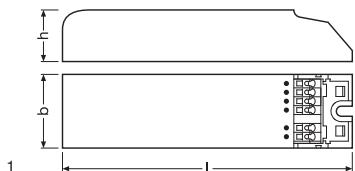

- Individual lighting and energy-saving light control at office workplaces
- Conference and meeting rooms
- Entrance areas
- Control of backlighting in signage or ambient lighting applications
- Presence-dependent lighting in corridors, staircases and sanitary rooms

For more details, go to
www.osram.com/btcontrol

DALIeco BT CONTROL

Control units for light management systems

	Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS		IP
	DALIECO BT CONTROL	4052899988781	230	50 / 60	DALI	1	15	IP20
	Product name		T _a		-20...+60	108	31	
	DALIECO BT CONTROL	Luminaire integration / Independent mounting				21	25	

Product features

- Light control with app connection via Bluetooth®
- One DALI broadcast output channel
- Daylight-dependent regulation and presence-dependent control of light
- Connection of up to 4 OSRAM DALI sensors
- Operation via standard pushbutton
- Outputs with electronical reversible overtemperature, short-circuit, overload protection
- Adjustment of all settings via smartphone

Areas of application

- Offices
- Meeting rooms
- Corridors

Equipment/Accessories

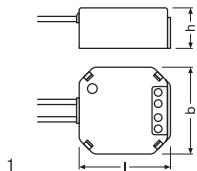

- Suitable for up to 32 electronic control gears
- Free app for iOS and Android available at the app store
- Ceiling or independent installation via ECO CI KIT possible

Product benefits

- Intuitive manual dimming, switching and changing of color temperature
- Simplified startup thanks to predefined operation modes
- Firmware update over-the-air via Bluetooth® possible

DALI ACU BT

Control units for light management systems

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	IP	m
DALI ACU BT CON	4052899544819	220...240	50 / 60	DALI	1	IP20	15
Product name		T _a	l [mm]	b [mm]	h [mm]		
DALI ACU BT CON	Luminaire integration / Integrated in flush device box	-20...+60	49	48	22	60	1

Product features

- Light control with app connection via Bluetooth®
- One DALI broadcast output channel
- Operation via standard pushbutton
- Combinable with OSRAM DALI presence- and motion detectors
- Length of the DALI control cable: up to 300 m
- Length of the pushbutton cable: up to 50 m

Product benefits

- Control of standard white or Tunable White light acc. to DALI device type 8 (DT8)
- Intuitive manual dimming and switching
- Basic functionality without configuration thanks to applied pre-settings
- Integrated DALI supply
- Simple creation of scenes via app

Areas of application

- Offices
- Conference rooms
- Training rooms
- Shop lighting

Equipment/Accessories

- Suitable for up to 32 electronic control gears
- Free app for iOS and Android available at the app store

LUXeye® – the smart way of controlling light

LUXeye® from OSRAM is an innovative, easy and robust light management system that makes your light smart. It has never been easier to connect light with a smartphone.

Simplicity is the core of the system

LUXeye® is designed to adjust itself automatically and start operating immediately after mains switch-on.

General basic functions, such as light level and delay time, can be easily adjusted with a screwdriver. This quick and easy way of light management saves time and requires no extra commissioning tools.

For full flexibility, all functions can be modified with the LUXeye® app for customization and analysis. A smart device can adapt every parameter of each individual controller. An integrated wizard supports you on site.

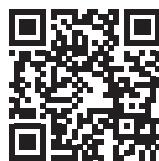

LUXeye® can be controlled either via smart device or traditionally with a standard wall switch. It is more than just an energy-saving tool, it is also highly flexible and convenient because you can control your light wirelessly from your desk.

LUXeye® products make your light smart and are:

- Easy to install
- Easy to use
- Easy to maintain

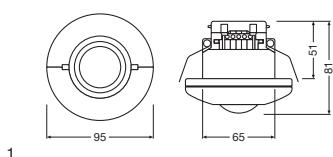

The LUXeye® apps are available at the App Store or the Google Play Store. The app for controlling is called OSRAM BT Control and the app for commissioning is called OSRAM BT Config. Both apps have been optimized for smartphones using the operating systems iOS (version 8 or higher) and Android (version 4.4 or higher).

For more details, go to
www.osram.com/luxeye

LUXeye® Sense DALI BT

Light management systems

1

Product name	GTIN (EAN)	V	Hz	CONTROL	Δt [m]	$\Delta \theta$ [°]	Lx	IP	IP20	Ceiling integration
LUXeye Sense DALI BT	4052899957411	220...240	50...60	DALI	5	110	20...5000 ¹⁾			

Product name	T _a	COLOR	d [mm]	h [mm]	lumen output	LED No.
LUXeye Sense DALI BT	0...+55	White	95	81	12	1

1) Approximately, measured at the sensor

Product features

- One DALI broadcast output channel
- Daylight-dependent regulation and presence-dependent control of light
- Operation via standard pushbutton
- Outputs with electronical reversible short-circuit and overload protection
- Change of delay time with screwdriver directly at the sensor
- Change of lighting intensity with screwdriver directly at the sensor
- Halogen-free polycarbonate plastic housing
- Controller with integrated light and presence sensor, DALI output channel
- Presence detection via passive IR element
- Light control with app connection via Bluetooth®
- Light control via smartphone
- Adjustment of all settings via smartphone
- Function indicator with three-color LED
- Various shutters included for different detection areas

Product benefits

- Automatic start of light regulation after power-on (out of the box function)
- Basic functionality without configuration thanks to applied pre-settings
- Easy and fast customization of important parameters via screwdriver
- Predefined and customizable configurations for all applications
- Password protection for user app and configuration app access
- Easy report sharing via e-mail

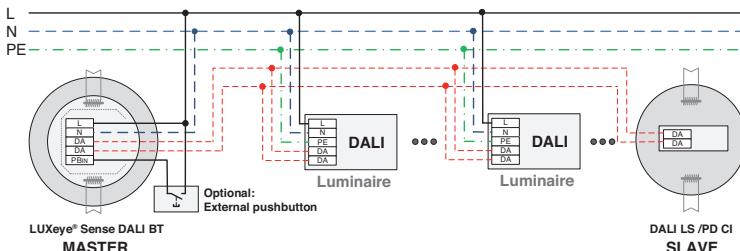

Areas of application

- Offices
- Conference rooms
- Training rooms
- Surface mounting via LUXeye® Sense CM KIT

Equipment/Accessories

- Suitable for up to 20 electronic control gears
- Free app for iOS and Android

Wiring diagram

LUXeye® Sense 10A BT

Light management systems

1

Product name	GTIN (EAN)	V	Hz	A m	Lx	Max Load[A]	IP	Ceiling integration
LUXeye Sense 10A BT	405289957428	220...240	50...60	5	110	20...5000 ¹⁾	10	IP20

Product name	T _a	COLOR	d [mm]	h [mm]	Box No.
LUXeye Sense 10A BT	0...+55	White	95	81	12

1) Approximately, measured at the sensor

Product features

- 10 A output relay for ohmic, inductive and capacitive load
- Daylight-dependent switching and presence-dependent control of light
- Operation via standard pushbutton
- Outputs with electronical reversible short-circuit and overload protection
- Change of delay time with screwdriver directly at the sensor
- Change of switch-off level with screwdriver directly at the sensor
- Halogen-free polycarbonate plastic housing
- Controller with integrated light and presence sensor, relay, Bluetooth® interface
- Presence detection via passive IR element
- Light control via smartphone
- Adjustment of all settings via smartphone
- Function indicator with three-color LED
- Various shutters included for different detection areas

Product benefits

- Automatic start of light regulation after power-on (out of the box function)
- Basic functionality without configuration thanks to applied pre-settings
- Easy and fast customization of important parameters via screwdriver
- Predefined and customizable configurations for all applications
- Password protection for user app and configuration app access
- Easy report sharing via e-mail

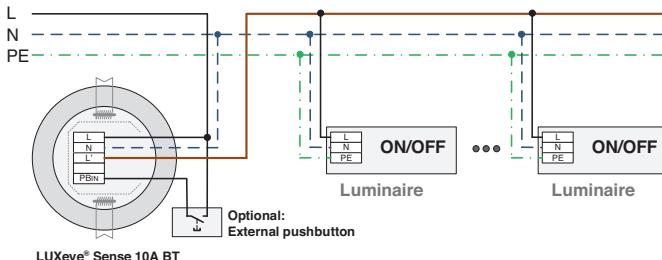

Areas of application

- Offices
- Conference rooms
- Training rooms
- Surface mounting via LUXeye® Sense CM KIT

Equipment/Accessories

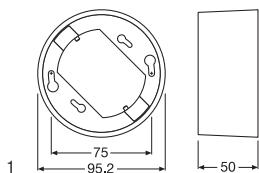

- Free app for iOS and Android
- Suitable for 10 A R/L/C load similar to 10 A fuse (B)

Wiring diagram

LUXeye® Sense CM KIT

Light management systems

Produkt-bezeichnung	GTIN (EAN)		COLOR	d [mm]	h [mm]		
LUXeye Sense CM KIT	4052899988729	On-top ceiling mounting	White	95.2	50	24	1

Product features

- Ceiling installation adapter

Areas of application

- Offices
- Conference rooms
- Training rooms

Equipment/Accessories

- Suitable for LUXeye® Sense DALI BT and LUXeye® Sense 10A BT

PCU/MCU

Simple manual dimming solutions

Installed in a flush-mounted box and connected to the AC power supply, a DALI PCU or DALI MCU can control up to 25 luminaires with the integrated DALI supply. Parallel connection enables the number of luminaires per group to be increased to 100 and up to four control points can be provided.

DALI PCUs or DALI MCUs connected to one another synchronize automatically; in other words, the control point can be changed at any time without the risk of side effects such as sudden changes in brightness. The DALI PCU allows controlling DALI control gears via standard pushbuttons, the digital rotary dimmer DALI MCU has tactile detents so brightness can be fine-tuned in individual steps as required.

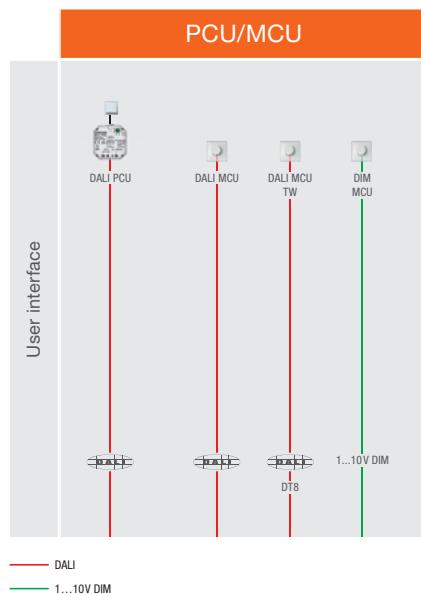

In addition, the DALI MCU TW allows a manual control of the color temperature if connected to Tunable White luminaires equipped with LED drivers compliant with DALI device type 8 (DT8).

Thanks to its integrated switch, the analog DIM MCU rotary dimmer enables up to ten single-lamp 1...10 V ECGs or five 2-lamp 1...10 V ECGs to be controlled directly from one control point. If an external power relay is used, up to one hundred 1...10 V ECGs can be controlled.

The white cover can be removed from the DALI MCU, DALI MCU TW and from the DIM MCU and replaced with commercially available covers.

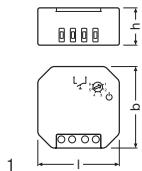

Applications

- Single luminaires
- Conference rooms
- Partitioned rooms
- Living rooms

DALI PCU

Light management systems

Product name	GTIN (EAN)	V	CONTROL	No. of OUTPUTS	W SYSTEM	IP	
DALI PCU	4052899955622	230	DALI	1	2	IP20	
DALI PCU	0...+40	48	48	22	60	1	Integrated in flush device box

Product features

- Up to four DALI PCUs can be connected in parallel to set up multiple control points
- Automatic synchronization between the control points
- Combinable with standard presence and motion detectors with mains contact
- Behavior after power failure configurable
- Length of the DALI control cable: up to 300 m

Product benefits

- Intuitive manual dimming and switching
- Integrated DALI supply
- Individual setting of minimal brightness level

Areas of application

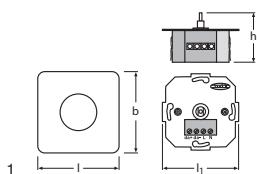

- Conference rooms
- Restaurants
- Shop lighting

Equipment/Accessories

- Suitable for up to 25 electronic control gears
- Flexible expansion via DALI repeaters or further DALI PCUs

DALI MCU

Light management systems

Product name	GTIN (EAN)	V	CONTROL	No. of OUTPUTS	W SYSTEM	IP		T _a
DALI MCU	4008321189721	230	DALI	1	2	IP20	Integrated in flush device box	0...+50
Product name	COLOR	I [mm]	b [mm]	h [mm]	I ₁ [mm]			No.
DALI MCU	White	80	80	50	70	15	1	

Product features

- Up to 4 DALI MCUs can be connected in parallel to set up multiple control points
- Automatic synchronization between the control points
- Cover and rotary switch in neutral white
- Length of the DALI control cable: up to 300 m

Product benefits

- Intuitive manual dimming and switching
- Individual setting of minimal brightness level

Areas of application

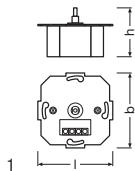

- Conference rooms
- Restaurants
- Shop lighting

Equipment/Accessories

- Suitable for up to 25 electronic control gears
- Flexible expansion via DALI repeaters or further DALI MCUs
- Cover and rotary knob included

DALI MCU Tunable White

Light management systems

Product name	GTIN (EAN)	V	CONTROL	No. of OUTPUTS	IP		T _a
DALI MCU TW	4052899465916	230	DALI	1	IP20	Integrated in flush device box	0...+50
Product name	COLOR	I [mm]	b [mm]	h [mm]	■	■	
DALI MCU TW	White	80	80	50	15	1	

Product features

- Up to 4 DALI MCUs can be connected in parallel to set up multiple control points
- Automatic synchronization between the control points
- Cover and rotary switch in neutral white
- Length of the DALI control cable: up to 300 m

Product benefits

- Intuitive manual dimming, switching and changing of color temperature
- Individual setting of minimal brightness level
- Individual setting of color temperature range

Areas of application

- Conference rooms
- Restaurants
- Shop lighting
- Private homes

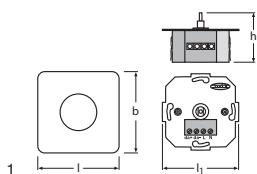

Equipment/Accessories

- Suitable for up to 25 electronic control gears
- Cover and rotary knob included

DIM MCU

Light management systems

Product name	GTIN (EAN)	V	CONTROL	No. of OUTPUTS	Max Load [A]	IP		T _a
DIM MCU	4050300347424	230	1...10	1	6	IP20	Integrated in flush device box	0...+50
Product name	COLOR							No.
DIM MCU	Cream white	80	80	40	70	100	1	

Product features

- Switching load contact: 250 V/6 A
(10 1-lamp or 5 2-lamp ECGs)
- Cover and rotary knob in cream white

Areas of application

- Conference rooms
- Restaurants
- Shop lighting

Product benefits

- Intuitive manual dimming and switching
- Individual setting of minimal brightness level

Equipment/Accessories

- Suitable for up to 50 electronic control gears
(external load contact required)
- Flexible expansion via external load contact and via signal amplifier DIM SA
- Cover and rotary knob included

Stand-alone sensors

The latest state-of-the-art technology

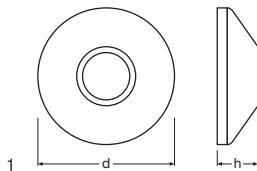

Stand-alone sensors with integrated control for daylight-dependent and motion/presence-dependent lighting provide the basis for energy saving. The incoming daylight is measured and, if necessary, supplemented with artificial light. The lighting system is only switched on if persons are present in the room. Using sensors can therefore achieve energy savings of up to 70 %.

OSRAM provides multiple different stand-alone sensors with integrated control functionality. The tables on pages 4.102 to 4.106 provide an overview of our stand-alone sensors by detection area, technology and mounting type.

HIGH BAY

Stand-alone motion sensors with switching contact

Product name	GTIN (EAN)	V	Hz	A [h/m]	[m] 18 ¹⁾	A [°]	Max Load [A]	W SYSTEM
HIGH BAY	4008321410078	120...277	50...60	13	18 ¹⁾	100 ²⁾	5	0.60
Product name	IP	On-top ceiling mounting	COLOR	d [mm]	h [mm]	20	1	No.
HIGH BAY	IP20	On-top ceiling mounting	White	116	40			

1) Maximum diameter

2) Approximately

Product features

- Motion sensor with switching contact
- 3 to 10 m: detection of motion by people
- 3 to 13 m: detection of vehicle movement (e.g. forklift truck)
- Adjustable switch-off delay: 30 s to 20 min
- Maximum power consumption in stand-by mode: 0.25 W

Areas of application

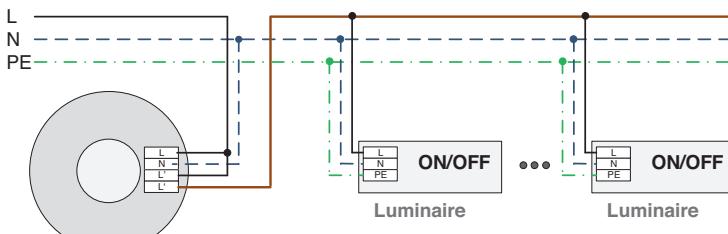

- Suitable for high installation heights
- Industry
- Production halls

Equipment/Accessories

- Suitable for up to 15 electronic control gears
- Installation by means of mounting adapter possible

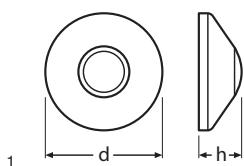

Product benefits

- Energy savings of up to 35 % (compared to manual switching)

DUO	IP20		Luminaire integration / On-top ceiling mounting / Clip-on lamp	White	58	71	47	20
								1

¹⁾ Maximum diameter²⁾ Approximately**Product features**

- Light and presence sensor with switching contact
- Daylight detection
- Presence detection
- Combined daylight and presence detection
- All functions selectable via rotary switch
- Adjustable switch-off delay: 1...60 min
- Maximum power consumption in stand-by mode: 0.7 W

Areas of application

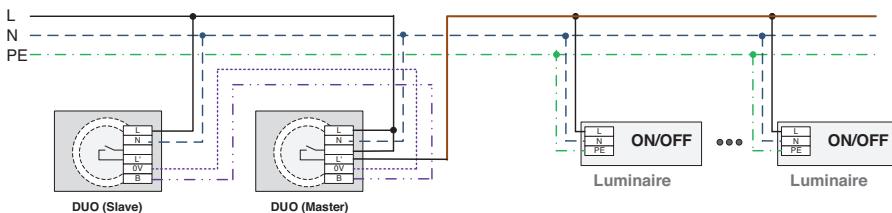

- Individual offices
- Open-plan offices
- Waiting rooms

Equipment/Accessories

- Suitable for up to 30 electronic control gears

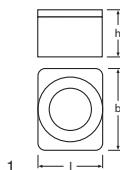

Product benefits

- Energy savings of up to 45 % (compared to manual switching)
- Multiple sensors can be networked

Wiring diagram

DIM MULTI

Stand-alone motion/daylight sensors with 1...10 V dimming interface

Product name	GTIN (EAN)	V	Hz	CONTROL		
DIM MULTI	4050300554471	220...240	50...60	1...10	5	12 ¹⁾
Product name	IP			COLOR		
DIM MULTI	IP20	Luminaires integration / On-top ceiling mounting / Clip-on lamp	White	58	71	42
					b [mm]	20
					h [mm]	1

1) Maximum diameter

2) Approximately

Product features

- 1...10 V light and presence sensor
- Combined daylight and presence detection
- All functions selectable via rotary switch
- Adjustable switch-off delay: 1...30 min

Areas of application

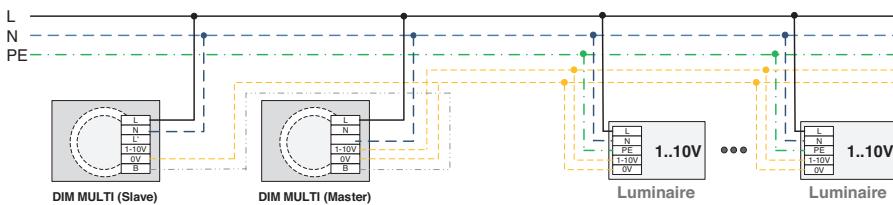

- Individual offices
- Open-plan offices
- Common areas

Product benefits

- Energy savings of up to 70 % (compared to CCG + T8 lamp, without sensors)
- Daylight-dependent control with automatic shutdown in adequate daylight
- Compensates for 100 % of the incoming daylight
- Multiple sensors can be networked

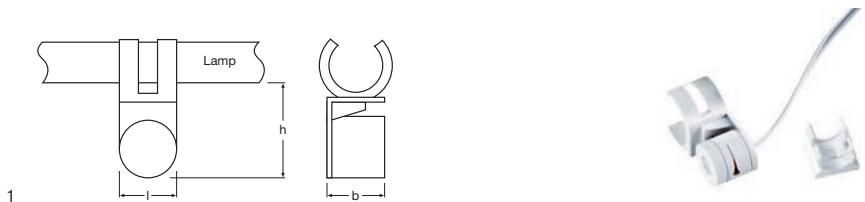

Equipment/Accessories

- Suitable for up to 30 electronic control gears

Wiring diagram

DIM PICO

Stand-alone daylight sensors with 1...10 V dimming interface

Product name	GTIN (EAN)				
DIM PICO	4050300554457	1...10	4	50 ¹⁾	IP20
DIM PICO	White	21	21	31	20 1

1) Approximately

Product features

- 1...10 V light sensor
- Simple clip-on installation for T8 and T5 lamps
- Cable length: 700 mm

Areas of application

- Individual luminaires

Equipment/Accessories

- Suitable for up to 10 electronic control gears

Product benefits

- Energy savings of up to 30 % (compared to CCG + T8 lamp, without sensors)
- Compensates for 50 % of the incoming daylight
- Direct connection to the 1...10 V interface
- Simple setting of the set point via aperture

DIM MICO

Stand-alone daylight sensors with 1...10 V dimming interface

Product name	GTIN (EAN)	CONTROL	A [m]	Lx	IP

DIM MICO	Gray	59	28	40	20	1

1) Approximately

Product features

- 1...10 V light sensor
- Simple clip-on installation for T8 and T5 lamps
- Cable length: 700 mm

Product benefits

- Energy savings of up to 40 % (compared to CCG + T8 lamp, without sensors)
- Compensates for 100 % of the incoming daylight
- Direct connection to the 1...10 V interface
- Simple setting of the set point via aperture

Areas of application

- Strip lighting in single and open-plan offices
- Strip lighting in factory halls

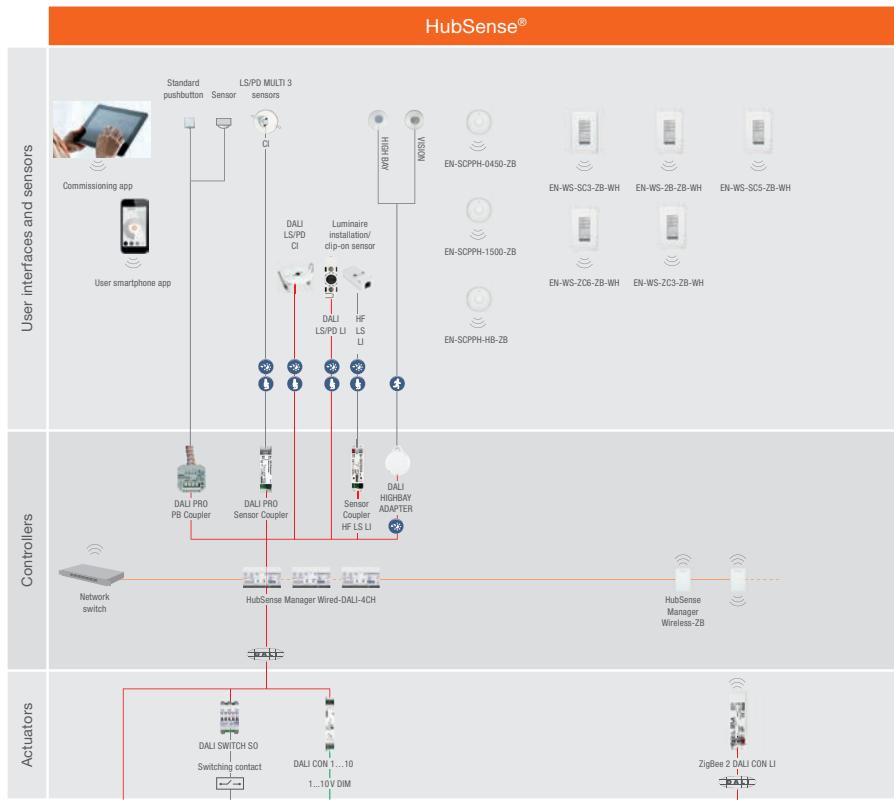

Equipment/Accessories

- Suitable for up to 100 electronic control gears
- Suitable for up to 16 signal amplifiers

HubSense®

The agile lighting control solution.

- Presence detection
- Motion detection
- Daylight detection

- DALI
- 1...10V DIM
- Ethernet
- Switching contact

The new HubSense® from OSRAM is a flexible, scalable and brandable lighting control system that fits to any building size. Thanks to the scalability of the system architecture and the lean portfolio, HubSense® provides the perfect control solution for new buildings or existing buildings undergoing renovation.

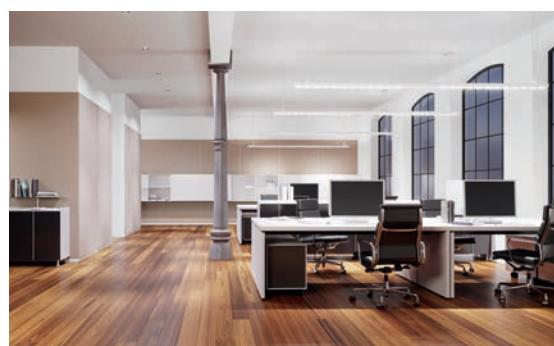

Flexibility is one of the key elements of a lighting control system. Being compatible with DALI and ZigBee, the de facto standards in the professional lighting control world, HubSense® now enables any type of application, no matter what constraints are found in the building layout.

The new commissioning software will drastically reduce the commissioning time thanks to the innovative commissioning experience. A project can be easily realized by adding preconfigured room profiles one after the other in the software. Proximity technology will help to address the devices installed, minimizing the time and the effort. An optional test procedure will then ensure that the system will work properly.

The different software packages of Basic and Advanced give multiple options to realize a project. Based on the project needs, the HubSense® can be flexibly adapted by choosing only the mandatory functionality in order to tailor the solution to expectations.

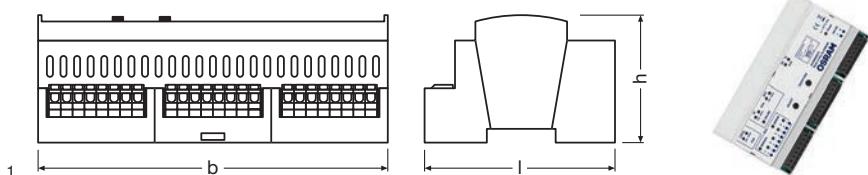

Any end user will be able to interact with his own environment by the simple touch of a finger. The HubSense® End User App will allow full control and personalization of the working environment, enhancing working life.

DALI components, page 4.60 ff.
For the entire Wireless portfolio, see
Wireless components, page 4.82 ff.*

HubSense® Manager Wired-DALI-4CH

Controllers

Product name	GTIN (EAN)	CONTROL	W SYSTEM	l [mm]	b [mm]	h [mm]	10	No.
HubSense Manager Wired-DALI-4CH	4052899989771	DALI	22	160	90	63	10	1

Product features

- DALI controller connected via network
- Daylight-dependent regulation and presence-dependent control of light
- Intelligent scheduling, task-related lighting
- Preconfigured room lighting profiles

Areas of application

- Offices
- Healthcare
- Public buildings
- Educational sector

Product benefits

- Suitable for projects with up to 1,000 controllable light points
- Worldwide access and possibility of remote maintenance via Internet
- Initial software provided together with the hardware
- Upgradable software packages via licensing mechanism (see www.osram.com)

HubSense® Manager Wireless-ZB

Controllers

Product name	GTIN (EAN)	CONTROL	W SYSTEM	l [mm]	b [mm]	h [mm]	BOX	NO.
HubSense Manager Wireless-ZB	4052899989764	ZigBee HA	4	72	20	118	10	1

Product features

- Connected via network, wireless controller
- Daylight-dependent regulation and presence-dependent control of light
- Intelligent scheduling, task-related lighting
- Preconfigured room lighting profiles

Areas of application

- Offices
- Healthcare
- Public buildings
- Educational sector

Product benefits

- Suitable for projects with up to 1,000 controllable light points
- Worldwide access and possibility of remote maintenance via Internet
- Initial software provided together with the hardware
- Upgradable software packages via licensing mechanism (see www.osram.com)

DALI PROFESSIONAL

A flexible light management system for large rooms and multiroom solutions

The DALI PROFESSIONAL system with its 4 DALI lines (256 DALI ECGs) is suitable for complex applications in room and floor control, daylight-dependent regulation, RGB control, TW control and dynamic lighting. With LAN interconnectivity, you can connect up to 4 controllers, so in total 1024 DALI ECGs can be controlled.

Configuration and setup are easy to achieve with a Windows-based PC software and a USB or LAN port. Plug-and-play settings are preconfigured for instant use without any setup.

The system is operated with standard pushbuttons, which are connected to a DALI PRO Pushbutton Coupler. Furthermore, the DALI PRO Sensor Coupler integrates all light and occupancy sensors from the LS/PD MULTI 3 family. In total, a maximum of 50 couplers can be attached. A smartphone app is available as an attractive and functional input device. Using the DALI HIGHBAY ADAPTER and HIGH BAY sensor, daylight-dependent light control and motion control is possible up to an installation height of 13 m.

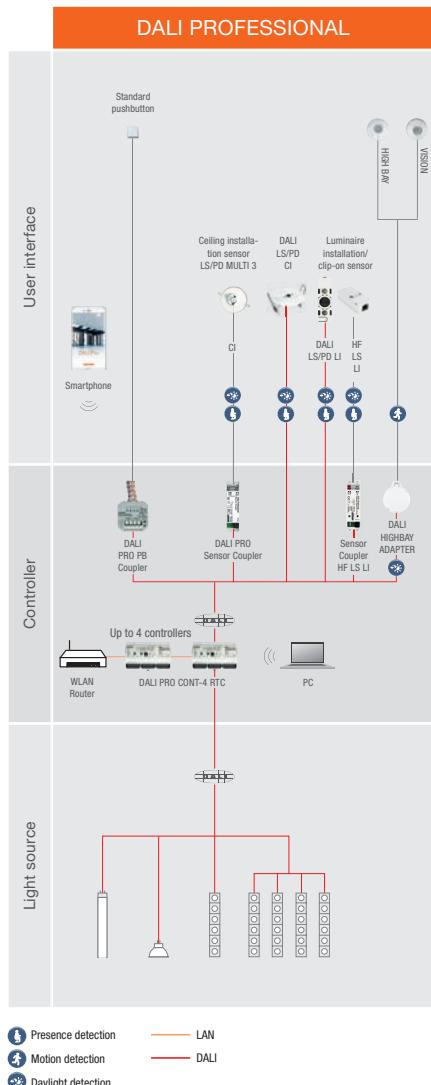

Applications

- Offices
- Retail outlets
- Storage areas
- Production and assembly facilities

The latest software can be found here:
www.osram.com/ds-tools

System overview

New: RGB sequencer

- Freely configurable color sequences for dynamic light with adjustable stopping times and cross-fading times
- Up to 100 sequences are programmable
- Up to 50 color scenes per sequence
- Easy color selection via color wheel

New: Time-of-day-dependent color temperature adjustment (Human Centric Lighting)

- Profiles with time-of-day-dependent light value and color temperature adjustment are freely configurable
- Integrated astro function with adjusted sunrise and sundown times for any time of the year
- Can be interrupted any time (starting triggers light and color temperature value according to the current time of day)
- Combinable with timer function and presence detector
- Up to 50 different scenes per profile
- Up to 100 profiles per project

New: App features at a glance

- Comfortable switching and dimming of illumination with status display
- Clearly arranged through grouping of rooms
- Access restriction with individual clearance of each control element per user
- Activate/override daylight control
- Selection of static lighting scenes and dynamic sequences
- Control element for colored light (RGB)
- Control element for color temperature adjustment (TW)

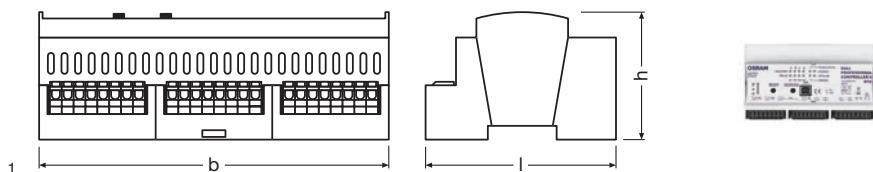

DALI Pro Control

DALI PRO CONT-4 RTC

Controllers for light management systems

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	W SYSTEM	IP
DALI PRO Cont-4 RTC	4008321710871	100...240	50 / 60	DALI	4	20	IP20
Product name	DIN rail mounting	0...+40	T _a	I [mm]	b [mm]	h [mm]	
DALI PRO Cont-4 RTC				90	160	62	10
							1

Product features

- Interconnection of up to 4 DALI PROFESSIONAL control units
- Configuration via LAN/WLAN/USB
- RGB color sequences
- Time-of-day-dependent color temperature adjustment (human centric lighting)
- Controller for 4 DALI lines
- Up to 50 pushbutton/sensor couplers can be integrated
- Integrated DALI supply
- 4 freely programmable switchover relays; load contact: 4 x 5 A
- Daylight-dependent and/or presence-dependent or manual control
- Up to 4 x 16 groups can be controlled
- Integrated clock for event control
- Weekly scheduler
- Connection via push-in terminals
- Control of lighting scenes and sequences (recall/store)
- Housing for series installation
- Length of the DALI control cable: up to 300 m

Product benefits

- Easy and intuitive control via app
- Control of up to 1024 DALI ECGs via LAN interconnectivity
- Plug and Play preconfigured for instant use without any startup procedure
- Mains voltage interruption buffer battery
- All the luminaires in the system can be dimmed or switched
- Simple creation of scenes and sequences
- Switching and dimming of up to 256 DALI ECGs per DALI PROFESSIONAL control unit
- A setpoint for daylight-dependent control can be stored by double-clicking
- Sensor integration in DALI
- Remote access/remote maintenance

Areas of application

- Room control, floor control, daylight-dependent control
- Connection of light and presence sensors in DALI systems
- Conference rooms
- Offices: Individual and group workplaces
- Production and assembly facilities
- Suitable for indoor applications
- Large luminaire groups
- Industry
- Corridors
- Strip lighting
- Logistics centers
- Classrooms
- Sports halls
- Training rooms

Equipment/Accessories

- Free smartphone app for iOS and Android
- Suitable for up to 256 electronic control gears with DALI interfaces
- Graphic configuration software with Windows user interface

OSRAM – your KNX lighting partner

Lighting represents one of the largest domains of KNX applications. For your projects, OSRAM offers a variety of solutions (source: BSRIA 2016).

OSRAM delivers KNX lighting solutions for your needs

1 Cost-efficient lighting

1 Use cost-efficient DALI devices in your project

- Fast integration of dimmable DALI devices and DALI sensors
- Luminaire information available via KNX (e.g. lamp status)

2 Use smart lighting in your KNX project to improve the light experience for you

- Control color and Tunable White DALI devices with KNX (e.g. HCL/TW with DT8)
- Retrieve real-time luminaire information in your KNX environment (e.g. operating hours, max. temperature power metering)
- Direct control lighting and more via smartphone/tablet

3 Connect your light to the Internet of Things (IoT)

- Light and KNX solutions will have connectivity to the cloud
- Cloud integration gives you, for example, the benefits of multi-building benchmarking, space optimization and further applications beyond lighting
- OSRAM will also be your partner for KNX IoT solutions, providing secure cloud access and further services

Connectivity is one of the key elements of smart building solutions

OSRAM: Your lighting partner for more than 110 years

ENCELIUM®

The holistic light management system for intelligent buildings

ENCELLIUM® by OSRAM is a comprehensive light management system which facilitates energy saving in a very practical and versatile manner. The heart of the system, the innovative Polaris 3D™ software, permits remote access to provide comprehensive control of the entire lighting system.

Thanks to the scalability of the system architecture, ENCELLIUM® can be used for buildings of any size and can easily be integrated in existing building management systems. In this way, you can change and optimize your lighting with just a few clicks of your mouse and you can prepare your building for the future.

Flexibility is one of the core characteristics of a light management system. Because it is compatible with DALI and ZigBee, and therefore with state-of-the-art lighting technologies, the ENCELLIUM® system now allows any type of application no matter which constraints can be found in a project.

All ENCELLIUM® light management components, including planning and commissioning, are constituents of the comprehensive OSRAM solution.

ENCELLIUM® – more flexibility, more control and more energy savings.

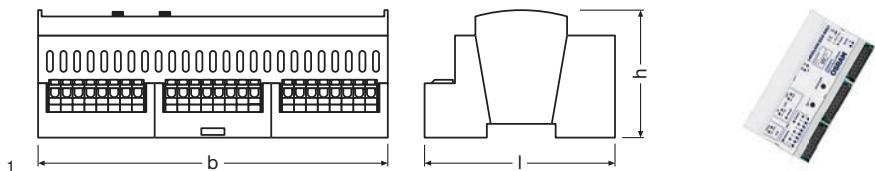

Winner – Controls Product of the Year –
ENCELLIUM® Wireless

ECU DALI

Controllers

Product name	GTIN (EAN)	CONTROL	W SYSTEM	l [mm]	b [mm]	h [mm]	10	No.
DALI ECU	4052899016842	DALI	22	90	160	63		1

Product features

- Individual control
- Daylight-dependent regulation and presence-dependent control of light
- Intelligent scheduling, task-related lighting, variable load distribution
- Realtime light control, analysis of energy consumption and display of lamp failures

Areas of application

- Offices
- Healthcare
- Public buildings
- Educational sector

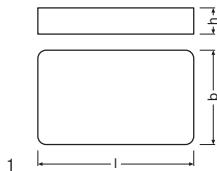

Product benefits

- Energy savings of up to 75 % (compared to CCG + T8 lamp without sensors)
- DALI-based light management system integrable into building management systems
- Worldwide web access and possibility of remote maintenance

EN-WM-ZB-P3D

Controllers

- Intelligent scheduling, task-related lighting, variable load distribution
- Realtime light control, analysis of energy consumption and display of lamp failures

Areas of application

- Offices
- Healthcare
- Public buildings
- Educational sector

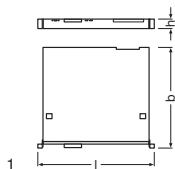

Product benefits

- Energy savings of up to 75 % (compared to CCG + T8 lamp without sensors)
- DALI-based light management system integrable into building management systems
- Worldwide web access and possibility of remote maintenance

Light is easy

Build your own lighting system with the **OSRAM Lighting Designer**. Find the ideal components for your specific application and create the perfect system solution.

Light is OSRAM

OSRAM

DALI components

Non-system-specific DALI components and sensors

DALI sensors and DALI couplers transmit information according to presence, movement and light value on the DALI line. With the DALI pushbutton coupler, the contact signal is transferred from conventional pushbuttons and switches to the DALI system. These devices can be used in many OSRAM control systems as well as in third-party manufacturers' systems. For details, please see the table with the supported systems below.

This results in a significant simplification of the installation as sensor signals on the DALI line are also transmitted and, therefore, no additional wiring is required. Particularly in case of strip lights that are electrically connected via mounting rail contacts, an optimum integration of the sensor system is possible via DALI without having to install an additional line with differing isolation requirements.

To check if an OSRAM DALI sensor or coupler can be used with a specific standard DALI control unit, please refer to the compatibility list of the respective manufacturer.

More information:
www.osram.com/lms

Additional non-system-specific components complement the DALI functionality:

- DALI REPEATER – System expansion without additional DALI address
- DALI CON 1...10 V – Integration of 1...10 V control gears into DALI
- DALI SWITCH – Integration of switchable devices into DALI

* DALI pushbutton coupler not compatible.

What is DALI and how does it work?

DALI – Digital Addressable Lighting Interface – is a (non-proprietary) interface standard for digital dimmable electronic drivers, offering greater functionality and greater ease of use. Per DALI line, up to 64 DALI drivers can be controlled with a high degree of flexibility via a two-wire control line individually or jointly and in up to 16 groups. The lighting is switched and dimmed via control line. In other words, there is no need for any relays.

DALI is the standard interface for professional lighting solutions. OSRAM offers a wide range of DALI drivers.

The DALI line is protected against polarity reversal and can be routed together with the power supply, for example, in a five-core sheathed cable. The control line simply has to be rated for line voltage (basic insulation). There is no need for a special cable.

Requirements to be met by the DALI line

When choosing a cable, make sure that the voltage drop on the line does not exceed 2V at 250mA. The maximum permitted distance between the controller and the connected DALI driver is 300 m.

The following table is used as a basis for finding the cable cross-section.

Cable length:	< 100 m	100–150 m	100–300 m
Min. cable cross-section:	0.5 mm ²	0.75 mm ²	1.5 mm ²

DALI input devices (sensors/couplers)

OSRAM has a wide range of DALI input devices (sensors and couplers) for multiple application areas.

OSRAM DALI sensors are grouped by:

- Luminaire integration
- Ceiling mounting/integration

Simple planning

DALI is the main standard to dim luminaires. The same wiring can be used for OSRAM DALI sensors. OSRAM DALI sensors are compatible with all our DALI controllers which support light or motion detection. OSRAM DALI sensors can also be used with controllers of our partners.

DALI sensors are using different addresses to DALI drivers. Up to 64 addresses for input devices (sensors and couplers) per DALI line are possible.

Simple installation

All our sensors are protected against polarity reversal to minimize installation failures. The DALI cabling should be rated for line voltage (by DALI standard) so it can be routed together with line voltage (e.g. a five-core sheathed cable). There is no need for a special cable.

For an overview of the different OSRAM DALI sensors, see pages 4.102 ff.

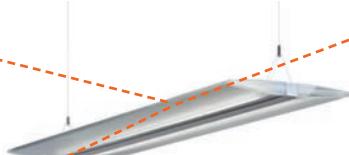

DALI sensors for luminaire integration

DALI LS/PD LI

Very compact DALI light and presence detector with integrated shutter

Luminaire

LS/PD DALI LI UF

Ultraflat light and presence detector

DALI Sensor Coupler HF LS LI

Sensor coupler with integrated power supply for high-frequency detection + HF sensor

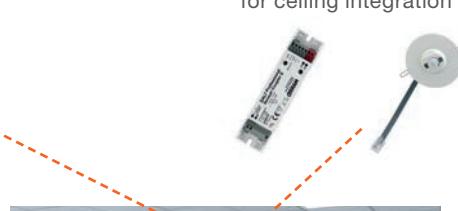

HF LS LI

Light and presence detector with high-frequency detection technology, not susceptible to heat. Optimized for IP-rated luminaires.

DALI sensors for ceiling integration

DALI LS/PD CI

DALI light and presence detector for ceiling integration

DALI Sensor Coupler +

LS/PD Multi 3 CI + ECO CI KIT

Minaturized light and presence detector for ceiling integration

DALI sensors for ceiling/trunking system mounting

DALI HIGHBAY ADAPTER +

HIGH BAY sensor

DALI light and presence detector for high mounting heights of up to 13 m.

DALI HIGHBAY ADAPTER +

VISION sensor

DALI light and presence detector for wide detection areas.

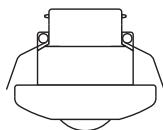

Sensor couplers to integrate third-party sensors

DALI Sensor Coupler E +

third-party sensor

Universal DALI interface for standard 230V or 24V motion detectors.

LS/PD DALI LI UF

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	No. of OUTPUTS	IP	Luminaire integration	T _a
LS/PD DALI LI UF	4052899984608	DALI	2	IP20	0...+50	
Product name	COLOR	I [mm]	b [mm]	h [mm]	10	1
LS/PD DALI LI UF	White	50.2	20.7	16.5		

Product features

- Direct connection to DALI
- Light and presence sensor for luminaire installation
- Presence detection via passive IR element
- Light sensor operating range: 10...1000 lx (measured at sensor)
- Function indication via integrated LED
- Mounting height: 2...4 m

Areas of application

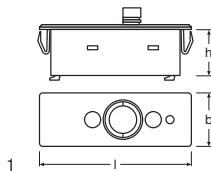

- Installation in industry and office luminaires

Product benefits

- Extremely low profile
- Presence detection range can be restricted by snap-on shutters

DALI LS/PD LI

Sensors for light management systems

Product name	GTIN (EAN)						
DALI LS/PDLI	4052899043954	5	6	80	20...800	IP20	Ceiling integration / Luminaire integration
Product name							
DALI LS/PDLI	0...+50	Gray	48	15	17	25	1

Product features

- Direct connection to DALI
- Light and presence sensor for luminaire installation
- Presence detection via passive IR element
- Light sensor operating range: 20...800 lx (measured at sensor)
- Function indicator with two-color LED
- Mounting height: 2...5 m

Product benefits

- Small housing design
- Presence detection angle adjustable between 40...90° via integrated shutters
- Can be addressed via DALI
- Compact housing for luminaire installation
- Daylight-dependent control with automatic shutdown in adequate daylight
- Slim housing design and flexible mounting concept
- Power supply from DALI
- DALI-based light management system integrable into building management systems
- Multiple sensors can be networked
- Sensor integration in DALI

Areas of application

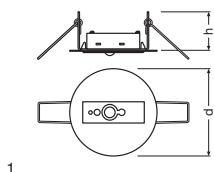

- Installation in industry and office luminaires
- Ceiling installation via LS/PD CI KIT or LS/PD AP KIT possible
- Classrooms
- Conference rooms
- Corridors
- Individual offices
- Suspended luminaires
- Suitable for indoor applications
- Open-plan offices

Equipment/Accessories

- Suitable for many OSRAM DALI control systems
- Attachable mounting frame for luminaire mounting from inside and outside

DALI LS/PD CI

Sensors for light management systems

1

Product name	GTIN (EAN)						
DALI LS/PD CI	4052899930292	5	6	40...90	20...800	IP20	Ceiling integration
Product name							
DALI LS/PD CI	0...+50	55	80	10	1		

Product features

- Mounting height: 2...5 m
- Presence detection via passive IR element
- Light sensor operating range: 20...800 lx (measured at sensor)
- Daylight-dependent regulation and presence-dependent control of light
- Direct connection to DALI
- Function indicator with two-color LED
- Ceiling installation adapter

Areas of application

- Classrooms
- Conference rooms
- Corridors
- Individual offices
- Open-plan offices
- Restaurants
- Shop lighting
- Suitable for indoor applications

Product benefits

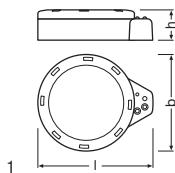

- Can be addressed via DALI
- Daylight-dependent control with automatic shutdown in adequate daylight
- Multiple sensors can be networked
- Simple installation
- Sensor integration in DALI
- Power supply from DALI
- Presence detection angle adjustable between 40...90° via integrated shutters
- DALI-based light management system integrable into building management systems

Equipment/Accessories

- Suitable for many OSRAM DALI control systems

DALI HIGHBAY ADAPTER

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	Lx [m]	Lx	IP	
DALI HIGHBAY ADAPTER	4008321774132	DALI	13	20...800 ¹⁾	IP20	On-top ceiling mounting
Product name	T _a	I [mm]	b [mm]	h [mm]		
DALI HIGHBAY ADAPTER	0...+50	139	118	37	20	1

1) Approximately, measured at the sensor

Product features

- DALI adapter for HIGH BAY and VISION sensors
- Direct connection to DALI
- Connection via push-in terminals
- Light sensor operating range: 20...800 lx (measured at sensor)
- Integrated light sensor
- Suitable for through-wiring
- Suitable for daylight-dependent control
- Light regulation for mounting heights of up to 13 m
- Power supply for coupler from DALI
- Integration into building management systems

Product benefits

- Sensor integration in DALI
- Embedding of HIGH BAY and VISION motion sensors into DALI
- Extended terminal section enables mains looping
- Daylight-dependent control with automatic shutdown in aquatic daylight
- DALI-based light management system integrable into building management systems
- Flexible addressing via DALI

Areas of application

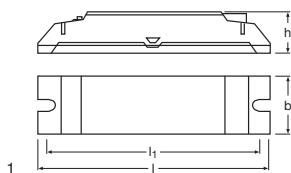

- Industry
- Production halls
- Sports halls
- Logistics centers
- Areas with high ceilings
- Connection of light and presence sensors in DALI systems
- Suitable for indoor installations
- Production and assembly facilities
- Open-plan offices, corridors and storage rooms
- Corridors
- Strip lighting in factory halls

Equipment/Accessories

- Blind cover included
- Suitable for many OSRAM DALI control systems

DALI PRO Sensor Coupler

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	No. of OUTPUTS	IP	Luminaire integration / Ceiling integration	T _a
DALI PRO Sensor Coupler	4008321379269	DALI	1	IP20		0...+50
Product name		I [mm]	b [mm]	h [mm]		
DALI PRO Sensor Coupler	118	30	21	110	25	1

Product benefits

- Power supply from DALI

Areas of application

- Connection of light and presence sensors in DALI systems
- Ceiling or independent installation via ECO CI KIT possible

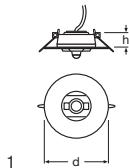

Equipment/Accessories

- Suitable for all light and presence sensors from the MULTI 3 range
- Suitable for many OSRAM DALI control systems

LS/PD MULTI 3 CI

Sensors for light management systems

Product name	GTIN (EAN)					On-top ceiling mounting / Ceiling integration
LS/PD MULTI 3 CI	4008321916648	4	6	80 ¹⁾	20...600 ²⁾	IP20
Product name						
LS/PD MULTI 3 CI	0...+50	White	25	50	10	1

1) Approximately

2) Approximately, measured at the sensor

Product features

- Ceiling installation sensor with moveable sensor head
- Connection via four-pole screw terminal or modular 4c4p connector

Product benefits

- Particularly small construction

Areas of application

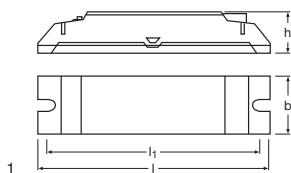

- Offices
- Corridors
- Classrooms
- Training rooms
- Stairways
- Sanitary areas

Equipment/Accessories

- Surface mounting in connection with SENSOR KIT
- Suitable for MULTileco, DIM MULTileco and DALI MULTileco control units
- Suitable for DALI PROFESSIONAL Sensor Coupler

DALI Sensor Coupler HF LS LI

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	No. of OUTPUTS	IP	Luminaire integration / Ceiling integration	T _a
DALI Sensor Coupler HF LS LI	4052899141728	DALI	1	IP20	Luminaire integration / Ceiling integration	0...+50
Product name	I [mm]	b [mm]	h [mm]	l ₁ [mm]	25	1
DALI Sensor Coupler HF LS LI	118	30	21	110		

Product features

- Mounting height: 2...13 m
- Combined daylight and motion detection
- Suitable for daylight-dependent control
- Presence detection via active radar sensor element
- Light sensor operating range: 20...800 lx (measured at sensor)

Product benefits

- Sensor integration in DALI
- Small housing design

Areas of application

- Connection of light and presence sensors in DALI systems
- Ceiling or independent installation via ECO CI KIT possible
- Luminaire and ceiling integration
- Installation in industry and office luminaires
- Installation in IP protected luminaires possible
- Areas with high ceilings

Equipment/Accessories

- Separate installation possible with ECO CI KIT
- Suitable for many OSRAM DALI control systems

HF LS LI

Control units for light management systems

Product name	GTIN (EAN)						
HF LS LI	4052899921481	8	35...80	20...800 ¹⁾	IP20	Luminaire attachment / Luminaire integration	-20...+50
Product name	COLOR						
HF LS LI	White	56	28	21	25	1	

1) Approximately, measured at the sensor

Product features

- Light and presence sensor for luminaire installation or attachment
- Presence detection via active radar sensor element
- Function indicator with two-color LED
- Motion detection range adjustable
- Mounting height: 2...13 m
- Light sensor operating range: 20...800 lx (measured at sensor)
- Integrated infrared remote control receiver
- Connection via polarity reversal protected 4p4c socket (RJ10)

Product benefits

- Individual activation/deactivation of light and presence sensor via remote control
- V(λ) corrected light sensor element

Areas of application

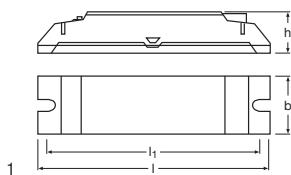

- Installation in IP protected luminaires possible
- Corridor lighting control in logistics centers and factory halls
- Areas with high ceilings

Equipment/Accessories

- Suitable for DALIeco Control unit
- Suitable for DALI Sensor Coupler HF LS LI

DALI Sensor Coupler E

Sensors for light management systems

Product name	GTIN (EAN)	CONTROL	No. of OUTPUTS	IP	Luminaire integration / Ceiling integration	T _a
DALI Sensor Coupler E	4052899230491	DALI	1	IP20		-20...+50
Product name		I [mm]	b [mm]	h [mm]		
DALI Sensor Coupler E	118	30	21	110	25	1

Product features

- Suitable for daylight-dependent control

Product benefits

- Small housing design

Areas of application

- Connection of light and presence sensors in DALI systems
- Ceiling or independent installation via ECO CI KIT possible
- Suitable for external light and presence sensors
- Installation in industry and office luminaires
- Corridors
- Warehouses

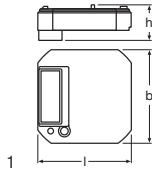

Equipment/Accessories

- Separate installation possible with ECO CI KIT
- Suitable for many OSRAM DALI control systems

DALI PRO PB Coupler

User interfaces for light management systems

Product name	GTIN (EAN)	CONTROL	No. of OUTPUTS	IP		T _a
DALI PRO PB Coupler	4008321496461	DALI	1	IP20	Integrated in flush device box	0...+50
Product name		I [mm]	b [mm]	h [mm]		No.
DALI PRO PB Coupler	42	42	20	20	1	

Product features

- DALI pushbutton coupler
- 4 floating inputs

Product benefits

- Power supply from DALI
- Standard pushbuttons/switches can be used

Areas of application

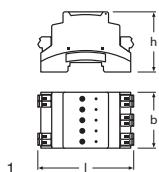

- Classrooms
- Conference rooms
- Suitable for installation in flush-type boxes
- Production and assembly facilities
- Individual offices

Equipment/Accessories

- Suitable for many OSRAM DALI control systems

DALI Switch SO

Actuators for light management systems

Product name	GTIN (EAN)	V	CONTROL	No. of OUTPUTS	Max Load [A]	IP	
DALI SWITCH SO	4008321533364	24	DALI	3	6	IP20	DIN rail mounting
Product name	T _a	I [mm]	b [mm]	h [mm]		IP	
DALI SWITCH SO	0...+45	96	54	62	8	1	IP20

Product features

- DALI-controlled switch output for non-dimmable lamps, QT, OT, PT, HT control gears
- 3 independent relay contacts
- Load capacity of switching contact: 6 A ohmic load
- Supply voltage: 24 V DC
- Floating contacts

Product benefits

- Can be addressed via DALI

Areas of application

- Industry
- Suitable for use in combination with all POWERTRONIC® control gears

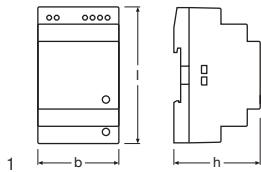

Equipment/Accessories

- Suitable for many OSRAM DALI control systems
- 24 V supply required (e.g. PS 30)

Power Supply PS 30

Power supplies

Product name	GTIN (EAN)	V	Hz	IP	DIN rail mounting	T _a
POWER SUPPLY PS 30	4052899553880	100...240	50...60	IP20	-	-20...+55
Product name	I [mA]	b [mm]	h [mm]	200	1	No.
POWER SUPPLY PS 30	90	36	58			

Product features

- Output voltage: 24 V DC
- Output current: 1.3 A

Areas of application

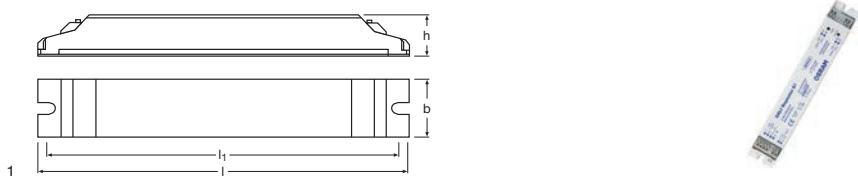

- Wide range of applications

Product benefits

- Large input voltage range

DALI REP LI

Signal repeaters for LMS

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	W SYSTEM	IP	Luminaire integration
DALI REP LI	4008321292599	230	50 / 60	DALI	1	4	IP20	
Product name	T _a	l [mm]	b [mm]	h [mm]	h [mm]			
DALI REP LI	0...+50	189	30	21	180	25	1	

Product features

- Expansion of DALI systems by 64 DALI control gears each time
- Extends the DALI line by 300 m
- Touch DIM® control of 64 DALI control gears
- Maximum power input: 4 W

Areas of application

- Device for luminaire installation

Equipment/Accessories

- Independent installation in connection with LMS CI BOX

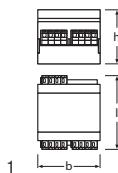

Product benefits

- The DALI control gears connected to the repeater operate as a group
- Can be addressed via DALI
- Cascadable

DALI REP SO

Signal repeaters for LMS

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	W SYSTEM	IP
DALI REP SO	4008321301093	230	50 / 60	DALI	1	5	IP20
Product name	DIN rail mounting	T _a	I [mm]	b [mm]	h [mm]	16	1
DALI REP SO		0...+50	96	72	62		

Product features

- Expansion of DALI systems by 64 DALI control gears each time
- Extends the DALI line by 300 m
- Touch DIM® control of 64 DALI control gears
- Maximum power consumption in standby mode: 1 W

Areas of application

- Large luminaire groups

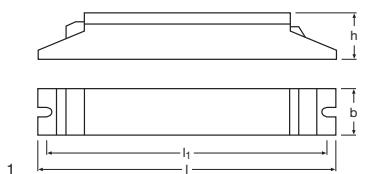

Product benefits

- The DALI control gears connected to the repeater operate as a group
- Disconnection of ECG standby power via integrated load contact
- Can be addressed via DALI
- Cascadable

DALI CON 1...10 LI

Signal converters DALI to 1...10 V

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	Max. Load [A]	IP	Luminaire integration
DALI CON LI	4050300638973	220...240	50...60	DALI / 1...10	1	5	IP20	
Product name	T _a	I [mm]	b [mm]	h [mm]	l [mm]	IP	No.	
DALI CON LI	0...+50	190	30	27	180	40	1	

Product features

- Load capacity of the signal output: max. 100 mA
- 0...10 V max. 5 mA active
- Switchable characteristic: linear/logarithmic
- Touch DIM® control of 1...10 V ECGs

Product benefits

- Can be used purely as a switching actuator

Areas of application

- Device for luminaire installation

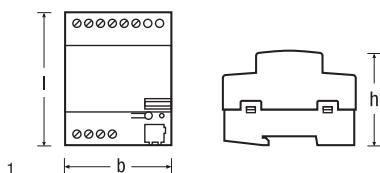

Equipment/Accessories

- Suitable for up to 100 electronic control gears
- Suitable for up to 33 signal amplifiers DIM SA

DALI CON 1...10 SO

Signal converters DALI to 1...10 V

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	Max Load [A]	IP
DALI CON SO	4050300639802	220...240	50...60	DALI / 1...10	1	5	IP20
Product name		T _a	I [mm]	b [mm]	h [mm]		
DALI CON SO	DIN rail mounting	0...+45	72	64	90	16	1

Product features

- Load capacity of the signal output: max. 100 mA
- 0...10 V max. 5 mA active
- Switchable characteristic: linear/logarithmic
- Load capacity of switching contact: 5 A
- Touch DIM® control of 1...10 V ECGs

Areas of application

- Common areas

Equipment/Accessories

- Suitable for up to 100 electronic control gears
- Suitable for up to 33 signal amplifiers DIM SA

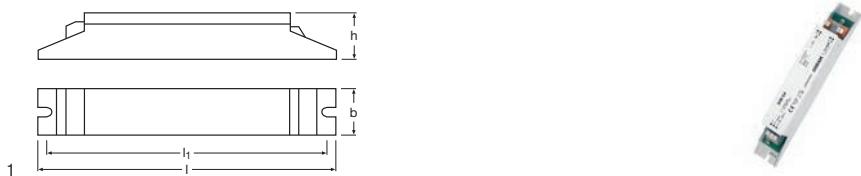

Product benefits

- Flexible addressing via DALI
- Can be used purely as a switching actuator

DIM SA

Signal repeaters for LMS

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of OUTPUTS	W SYSTEM	IP	Luminaire integration
DIM SA	4008321097095	220...240	50...60	1...10	1	2	IP20	
Product name	T _a	l [mm]	b [mm]	l [mm]	h [mm]	40	1	
DIM SA	0...+50	189	30	30	180			

Product features

- Signal amplifier for 1...10 V controllers and sensors
- Load capacity of the signal output: max. 100 mA

Product benefits

- Supports large luminaire groups and long control lines
- Cascadable

Areas of application

- Device for luminaire installation

Equipment/Accessories

- Suitable for up to 100 electronic control gears
- Suitable for up to 33 signal amplifiers DIM SA

Wireless components

ZigBee is the most popular industrial wireless mesh networking standard for connecting sensors and control systems in the professional lighting market. ZigBee is an open, global, packet-based protocol designed to provide an easy-to-use architecture for secure, reliable, low-power wireless networks. ZigBee is a low-data-rate wireless networking standard that can eliminate the costly and time-consuming wiring in professional control applications. All types of control equipment can be placed anywhere and still communicate with the rest of the system. It can also be moved, since the network doesn't care about the physical location of a sensor, wallswitch or actuator. The ZigBee standard enhances the IEEE 802.15.4 standard by providing a simple networking layer and standard application profiles that can be used to create interoperable multi-vendor consumer electronics solutions.

ZigBee is one of the most reliable global control/sensor network standards due to its scalability and flexibility. It has been designed to provide the following features:

- Low power consumption, simple to implement
- Batteries that last from many months to years
- Active (transmit/receive) or sleep statuses that simplify the communication between the nodes
- Mains-powered equipment with extremely low standby consumption

Low total cost

(device, installation, maintenance)

Low cost to the user means low device cost, low installation cost and low maintenance effort. ZigBee devices allow batteries to last up to years using primary cells without any chargers, which means low cost and easy installation. ZigBee's simplicity allows inherent configuration and redundancy of network devices and provides low maintenance.

High density of nodes per network

ZigBee's use of the IEEE 802.15.4 PHY and MAC allows networks to handle any number of devices. This attribute is critical for massive sensor arrays and control networks.

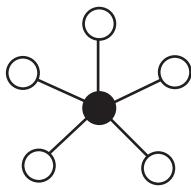

Wireless communication

All wireless communication systems have the following components: Transmitter, receiver, antennas, connection path between the transmitter and the receiver. In short, the transmitter feeds a signal of encoded data modulated into RF waves into the antenna. The antenna radiates the signal through the air where it is picked up by the antenna of the receiver. The receiver demodulates the RF waves back into the encoded data stream sent by the transmitter.

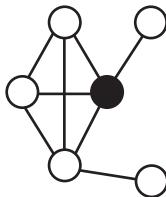

Wireless network topologies

This section discusses the network topologies supported by the IEEE 802.15.4 and ZigBee specifications. The topology of a network describes how the nodes are connected, either physically or logically. The physical topology is a geometrical shape resulting from the physical links from node to node, as shown in the figure below. The logical topology maps the flow of data between the nodes.

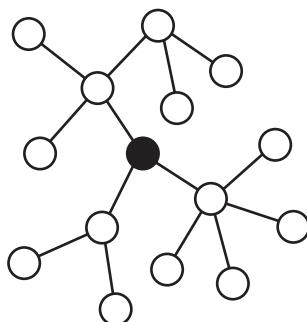

ZigBee network topology

Star

Mesh

Cluster tree

IEEE 802.15.4 supports star and peer-to-peer topologies. The ZigBee specification supports star and two kinds of peer-to-peer topologies (mesh and cluster tree).

ZigBee-compliant devices are sometimes specified as supporting point-to-point and point-to-multipoint topologies.

All OSRAM wireless devices communicate together on a “mesh network.” This means that all wireless nodes are interconnected together with more than one communication pathway connected to each node. Wireless control modules (actuators) work to extend the mesh network allowing communication to the wireless managers through them, while devices such as wireless sensors and wall stations are end devices and do not allow communication through them.

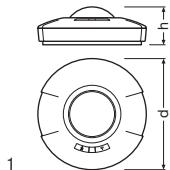

Wireless sensors

The wireless sensors are an integral part of the ENCELIUM® energy management system and of the HubSense® platform. Both offer passive infrared (PIR) occupancy sensing as well as daylight sensing. They are available for detection areas from 40 square meters (EN-SCPPH-0450-ZB – version with standard range) to 140 square meters (EN-SCPPH-1500-ZB – version with extended range) for standard installation heights and for detection areas of up to 260 square meters for high-bay installation with heights of up to 12 meters (HB – High Bay).

These award-winning wireless sensors are battery-powered and currently the smallest wireless presence sensors on the market. The sensors operate on a mesh network based on ZigBee standards. The sensors offer three tool-less mounting options for easy installation. They also offer options to mask parts of the detection area to maximize control flexibility. In combination with ENCELIUM® or the HubSense® platform, these sensors allow to gain considerable energy savings from presence detection as well as daylight harvesting. The software allows you to map the sensor to any zone and set the time-out to any level.

EN-SCPPH-0450-ZB

Sensors

Product name	GTIN (EAN)						
EN-SCPPH-0450-ZB	4052899957343	3.60	110	0...1000	IP20	On-top ceiling mounting	0...+40
Product name							
EN-SCPPH-0450-ZB	86	29	10	1			

Product features

- Presence detection via passive IR element
- Light sensor operating range: 0...1,000 lx
- Daylight-dependent regulation and presence-dependent control of light
- Integrated ZigBee Home Automation connectivity
- Battery-powered

Areas of application

- Ceiling surface mounting

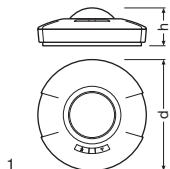

Product benefits

- Multiple sensors can be networked
- Simple installation

EN-SCPPH-1500-ZB

Sensors

Product name	GTIN (EAN)				
EN-SCPPH-1500-ZB	4052899989337				
Product name					
EN-SCPPH-1500-ZB	On-top ceiling mounting				

Product features

- Presence detection via passive IR element
- Light sensor operating range: 0...1,000 lx
- Daylight-dependent regulation and presence-dependent control of light
- Integrated ZigBee Home Automation connectivity
- Battery-powered

Areas of application

- Ceiling surface mounting
- Wide range of applications
- Indoor parking areas

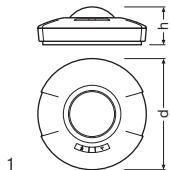

Product benefits

- Multiple sensors can be networked
- Simple installation

EN-SCPPH-HB-ZB

Sensors

Product name	GTIN (EAN)		12		75		0...1000		IP20
Product name			T _a		86		29		10
EN-SCPPH-HB-ZB	On-top ceiling mounting	0...+40							1

Product features

- Presence detection via passive IR element
- Light sensor operating range: 0...1,000 lx
- Daylight-dependent regulation and presence-dependent control of light
- Integrated ZigBee Home Automation connectivity
- Battery-powered

Areas of application

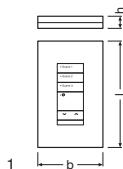

- Ceiling surface mounting
- Suitable for high installation heights
- Warehouses

Product benefits

- Multiple sensors can be networked
- Simple installation

EN-WS-2B-ZB-WH

User interfaces

Product name	GTIN (EAN)	IP	Surface mounting	T _a	I [mm]	b [mm]	h [mm]	IP	No.
EN-WS-2B-ZB-WH	4052899989290	IP20	Surface mounting	-10...+40	70	13	114	20	1

Product features

- Single-zone controller
- Standardized ZigBee Home Automation protocols for wireless communication
- Wireless technology
- Surface-mounted unit powered by four AAA alkaline batteries
- Lifetime of battery: up to 10 years

Areas of application

- New installations or retrofit of existing installations

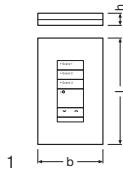

Product benefits

- Easy installation and versatile application
- No wiring required

EN-WS-ZC3-ZB-WH

User interfaces

Product name	GTIN (EAN)	IP	Surface mounting	T _a	I [mm]	b [mm]	h [mm]	IP	No.
EN-WS-ZC3-ZB-WH	4052899989306	IP20		-10...+40	70	13	114	20	1

Product features

- 3-zone controller
- Standardized ZigBee Home Automation protocols for wireless communication
- Wireless technology
- Surface-mounted unit powered by four AAA alkaline batteries
- Lifetime of battery: up to 10 years

Areas of application

- New installations or retrofit of existing installations

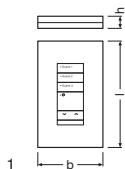

Product benefits

- Easy installation and versatile application
- No wiring required

EN-WS-ZC6-ZB-WH

User interfaces

Product name	GTIN (EAN)	IP	Surface mounting	T _a	I [mm]	b [mm]	h [mm]	20	1
EN-WS-ZC6-ZB-WH	4052899989320	IP20	Surface mounting	-10...+40	70	13	114	20	1

Product features

- 6-zone controller
- Standardized ZigBee Home Automation protocols for wireless communication
- Wireless technology
- Surface-mounted unit powered by four AAA alkaline batteries
- Lifetime of battery: up to 10 years

Areas of application

- New installations or retrofit of existing installations

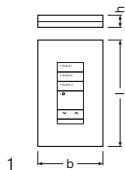

Product benefits

- Easy installation and versatile application
- No wiring required

EN-WS-SC3-ZB-WH

User interfaces

Product name	GTIN (EAN)	IP	Surface mounting	T _a	I [mm]	b [mm]	h [mm]	IP	No.
EN-WS-SC3-ZB-WH	4052899957367	IP20	Surface mounting	-10...+40	70	13	114	20	1

Product features

- Multi-scene control with switching and dimming options
- Standardized ZigBee Home Automation protocols for wireless communication
- Wireless technology
- Surface-mounted unit powered by four AAA alkaline batteries
- Lifetime of battery: up to 10 years

Areas of application

- New installations or retrofit of existing installations

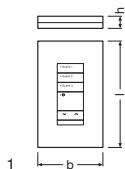

Product benefits

- Easy installation and versatile application
- No wiring required

EN-WS-SC5-ZB-WH

User interfaces

Product name	GTIN (EAN)	IP	Surface mounting	T _a	I [mm]	b [mm]	h [mm]	Qty.
EN-WS-SC5-ZB-WH	4052899989313	IP20		-10...+40	70	13	114	20

Product features

- 5-scene controller
- Standardized ZigBee Home Automation protocols for wireless communication
- Wireless technology
- Surface-mounted unit powered by four AAA alkaline batteries
- Lifetime of battery: up to 10 years

Areas of application

- New installations or retrofit of existing installations

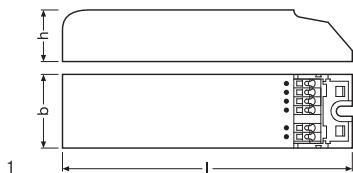

Product benefits

- Easy installation and versatile application
- No wiring required

ZigBee DALI CON LI

Signal converters for LMS

Product name	GTIN (EAN)	V	Hz	CONTROL	No. of outputs	m	IP
ZIGBEE DALI CON LI	4052899988804	230	50 / 60	DALI	1	15	IP20
Product name		T _a	[l [mm]]	b [mm]	[h [mm]]		
ZIGBEE DALI CON LI	Luminaire integration / Independent mounting	-20...+60	108	30	21	25	1

Product features

- Integrated ZigBee transceiver module
- DALI interface for addressed or broadcast operation
- OSRAM DALI light and presence sensor connectible
- Standard pushbutton interface
- Outputs with electronical reversible overtemperature, short-circuit, overload protection

Product benefits

- Bidirectional ZigBee – DALI communication
- Prepared for ZigBee 3.0 standard
- Firmware update over the air possible

Areas of application

- Offices
- Meeting rooms
- Training rooms
- Corridors

Equipment/Accessories

- Suitable for up to 8 DALI gears in broadcast mode
- Suitable for up to 2 DALI gears in addressed mode
- Ceiling or independent installation via ECO CI KIT possible

LMS components

OSRAM LMS accessory components

Expand, connect and install light management systems – all from a single source with non-system-specific components from OSRAM.

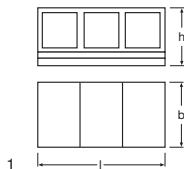

These accessories, perfectly matched to OSRAM products in terms of quality and compatibility, make installing and connecting innovative light management systems extremely simple. OSRAM rounds off its offering with non-system-specific components.

Y-CONNECTOR

Branching for light management systems

Product name	GTIN (EAN)	IP	l [mm]	b [mm]	h [mm]		No.
Y-CONNECTOR	4050300803135	IP20	34	18	16	25	1

Product features

- Passive distributor
- Connections: 3 x modular 4p4c socket
- Type of installation: Adhesive pad mounting on smooth surfaces

Product benefits

- For parallel connection of sensors to a MULTileco, MULTI 3 or DALIeco system
- Enables synchronization and connection of multiple EASY system components

Areas of application

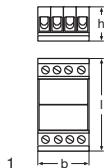

- Suitable for all OSRAM components with modular 4p4c connector system

Equipment/Accessories

- 2 connecting cables included, modular 4p4c connector on both ends, length 2.1 m

Y-CONNECTOR SCREW

Branching for light management systems

Product name	GTIN (EAN)	IP	l [mm]	b [mm]	h [mm]		No.
Y-CONNECTOR SCREW	4008321916686	IP20	40	20	16	25	1

Product features

- Passive distributor
- Connection via 2 x four-pole screw terminal or modular 2 x 4p4c connector
- Type of installation: Adhesive pad mounting on smooth surfaces

Product benefits

- For parallel connection of sensors to a MULTileco, MULTI 3 or DALIeco system
- Enables synchronization and connection of multiple EASY system components

Areas of application

- Suitable for all OSRAM components with modular 4p4c connector system

Equipment/Accessories

- 2 connecting cables included, modular 4p4c connector on both ends, length 2.1 m

4p4c connection cables

Product name	GTIN (EAN)		
4P4C CONNECTION CABLE 25CM	4008321660145	250	50

4P4C CONNECTION CABLE 200CM	4008321660190	2000	50

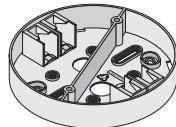

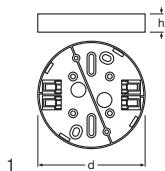

Product features

- Cable for modular 4p4c connection
- Pack contains 50 pieces

Areas of application

- Suitable for all OSRAM components with modular 4p4c connector system

Mounting adapters

Product name	GTIN (EAN)		COLOR	d [mm]	h [mm]		
Mounting adapter	4008321480798	On-top ceiling mounting	White	116	19	20	1

Product features

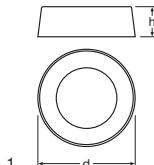

- Two separate wiring areas for input and output side

Areas of application

- Adapter for surface-mounted sensor elements with 116 mm diameter

SENSOR KIT

Mounting adapters for surface mounting of LMS sensors

Product name	GTIN (EAN)		COLOR	d [mm]	h [mm]		
SENSOR KIT	4008321916662	On-top ceiling mounting	White	80	25	10	1

Product features

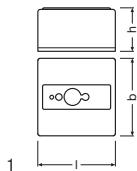

- Material: Plastic

Areas of application

- Adapter for surface-mounted sensor elements with 50 mm diameter

LS/PD AP KIT

Mounting kits

Product name	GTIN (EAN)	Icon	Color	l [mm]	b [mm]	h [mm]	Icon	No.

Areas of application

- Offices
- Classrooms
- Conference rooms
- Corridors
- Stairways

Product features

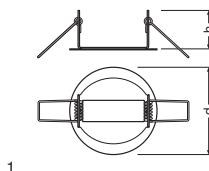

- Ceiling installation adapter

Equipment/Accessories

- Suitable for DALIeco LS/PD LI, DALI LS/PD LI and LS/PD LI Analog sensors

LS/PD CI KIT

Mounting kits

Product name	GTIN (EAN)	Icon	h [mm]	d [mm]	Icon	No.
LS/PD CI KIT	4052899920293	Ceiling integration	36	80	10	1

Product features

- Ceiling installation adapter
- Adapter ring and spring holder made of metal

Product benefits

- Simple ceiling recessed mounting

Areas of application

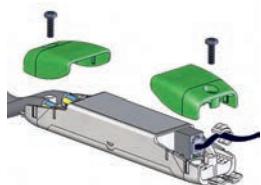

- Offices
- Classrooms
- Conference rooms
- Corridors
- Stairways

Equipment/Accessories

- Suitable for DALIeco LS/PD LI, DALI LS/PD LI and LS/PD LI analog sensors

ECO CI KIT

Mounting kits for independent installation of LMS control units

Product name	GTIN (EAN)		
ECO CI Kit	4008321392091	Ceiling integration	100

Product features

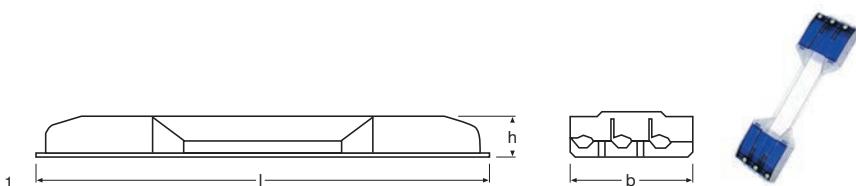

- Cable clamp kit for independent mounting

Areas of application

- OSRAM controllers with dimensions
118 mm x 30 mm x 21 mm

LMS CI BOX

Mounting kits for independent installation of LMS control units

Product name	GTIN (EAN)		l [mm]	b [mm]	h [mm]	
LMS CI BOX	4008321083692	Ceiling integration	261	71	27	40 1

Product features

- Cable clamp housing for independent mounting

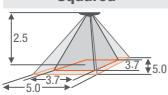

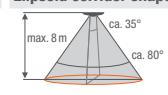

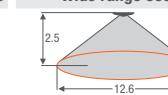

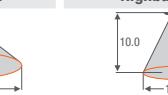

Areas of application

- OSRAM controllers with dimensions
189 mm x 30 mm x 21 mm

Case study

In the new OSRAM factory
in Plovdiv, Bulgaria, LED
components manufactured
in-house provide contemporary
industrial lighting

Industrial lighting has to meet high demands: The quality of light must create a professional, safe and fatigue-free working environment for employees. User-friendly operation and demand-based control are also extremely important. Economic savings are also crucial, especially in production facilities, which often provide low natural daylight and where shifts are worked around the clock. The lighting needs to be energy-efficient, durable and robust to keep electricity, maintenance and downtime costs to a minimum.

Therefore, perfectly matched LED modules and drivers are used in the new plant. In production and in the warehouse, PrevaLED® Linear Slim LED modules ensure very homogeneous light in combination with OPTOTRONIC® Intelligent DALI 80 drivers. In the offices, the PrevaLED® Linear Value LED modules, which can be put together to create seamless strips of light and are controlled by OTi DALI 50, provide very uniform, shadow-free illumination. All PrevaLED® LED modules are much more durable, and, thanks to a luminous efficacy of up to 160 lm/W, significantly more efficient than conventional T5 and T8 fluorescent lamps. The Touch DIM® function of the DALI wide-range drivers reduces energy consumption even further. Not only does Touch DIM® allow simple control via pushbuttons and sensors, but also automatic shutdown if there is sufficient residual light. The lighting concept in the plant is completed by recessed LED luminaires with PrevaLED® Cube in combination with OT 20 DALI in the sanitary facilities, and the large OSRAM lettering on the roof of the plant, evenly backlit by BackLED XL Plus LED strips.

Electronic control gears from OSRAM – for energy-efficient lighting

High reliability today and in the future

ECGs from OSRAM fulfill all requirements for the operation of conventional light sources (fluorescent, metal halide and low-voltage halogen lamps). In small or large projects, OSRAM ECGs save both time and money, offering high reliability even in thermally critical conditions. As standard, we also offer three-year and five-year guarantees, see next page.

Your benefits

- Compliance with current regulations and, in certain cases, conformity with planned regulations
- Very high energy efficiency in lighting solutions
- The use of standard protocols
- State-of-the-art technology
- OSRAM's proven quality, reliability and guarantee
- ECGs from a single source
- Maximum reliability in system operation
- Only one point of contact in all matters relating to lighting

New: ECG Replacement Finder

Replacing defective ballasts with modern ECGs from our extensive product portfolio has just become easier. Find your required device quickly and without effort, simply by searching and filtering with our new online tool – the ideal support during renovation, modernization or maintenance work, see next page.

Quality as part of a system – from one source

OSRAM's guarantee for electronic control gears and selected light sources – extract from guarantee terms and conditions

Electronic control gears

Guarantee Level 1

OSRAM guarantee

OSRAM offers a full 3-year guarantee on products from the series:

HALOTRONIC® PARROT

Electronic control gears

Guarantee Level 2

OSRAM guarantee

OSRAM offers a full 5-year guarantee on products from the series:

QUICKTRONIC® DALI dimmable
 QUICKTRONIC® 1...10 V dimmable
 QUICKTRONIC® INTELLIGENT
 QUICKTRONIC® PROFESSIONAL
 QUICKTRONIC® FIT
 POWERTRONIC® (PTi, PT0, PT-FIT)
 HALOTRONIC® PROFESSIONAL (HTi, HTL, HTM, HTN)

The guarantee starts with commissioning of the corresponding electronic control gears (ECGs) from OSRAM and ends no later than 42 months after the OSRAM product was manufactured.

The guarantee starts with commissioning of the corresponding electronic control gears (ECGs) from OSRAM and ends no later than 66 months after the OSRAM product was manufactured.

Registration is **not** required.

For each product from the above-specified series that fails due to a material or manufacturing defect, a replacement or credit note will be provided as part of the guarantee service.

Registration is **not** required.

For each product from the above-specified series that fails due to a material or manufacturing defect, a replacement or credit note will be provided as part of the guarantee service.

The full conditions and details of guarantee level 1 can be found on the Internet at www.osram.com/system-guarantee

The full conditions and details of guarantee level 2 can be found on the Internet at www.osram.com/system-guarantee

QUICKTRONIC®

QUICKTRONIC® INTELLIGENT dimmable QTi (DALI)...DIM

QTi dimmable – DALI or 1...10V interface

The current generation of dimmable QUICKTRONIC® INTELLIGENT control gears with DALI (Digital Addressable Lighting Interface) or 1...10V interface (QTi DALI/DIM):

- Automatic lamp detection by intelligent multilamp operation and use of a large number of different lamps
 - Flexible luminaires and reduction of number of ECG types

Highest level of energy efficiency.

Particularly low standby consumption for OSRAM DALI ECGs.

- Energy Efficiency Index EEI = A1 BAT
- Very low standby consumption:
 - QTi DALI 1x, 2x: 0.2 W
(AC and DC operation)
 - QTi DALI 3x, 4x: < 0.5 W
(AC and DC operation)
- Switching and dimming has no influence on lamp lifespan
- Optimum preheating at any dimming setting
- Dimming range: 1...100 % luminous flux

Outstanding flexibility and quality.

Amalgam and longlife lamps.

- Dimming to 1 % with T5/T5 CONSTANT, T5 Energy Saver and T5 XT Longlife lamps
- Large number of additional ECG/lamp combinations (OSRAM DULUX® L...HE, XT)
- Up to 100,000 h service life at $T_c = 65^\circ\text{C}$, at max. 10 % failure
- Suitable for luminaires with protection class I

- Optimized lamp hot start within 0.5 s
- OSRAM CFL and T5 CONSTANT lamps: dimming in outdoor applications possible
- Maximum efficiency of OSRAM dimming ECGs of up to 94 % thanks to high-efficiency components and temperature-dependent cut-off. For dimmer settings > 80 % disconnection of electrode heating
 - Additional energy savings of up to 4 W (depending on type)

- Corridor function for direct connection of the ECG to standard motion sensors (or free configuration)

- Touch DIM® operation for up to 20 DALI ECGs

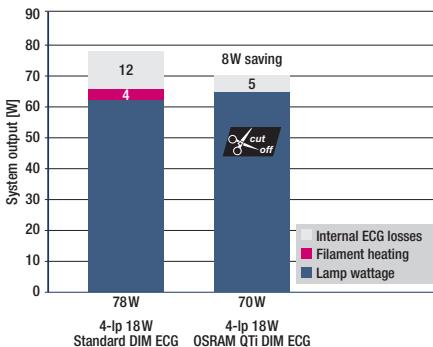

- Fit for SMART GRID for feedback of mains power input and lamp operating hours

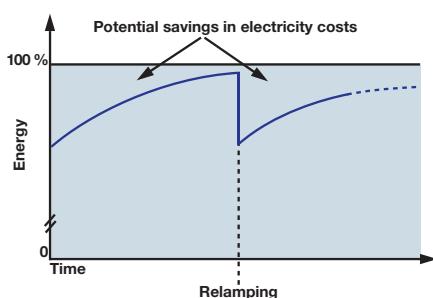

- Fit for emergency function (configurable automatic detection of emergency light operation via ECG)

QTi DIM electronic control gears from OSRAM are renowned for their optimized system efficiency

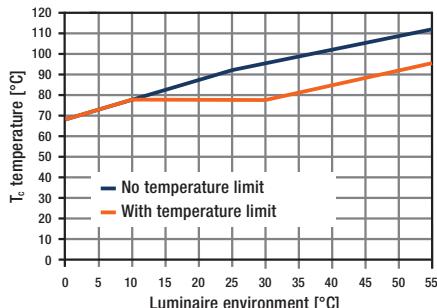

Adjustment of the planning factor (0.8) thanks to the use of dimmable ECGs saves an additional 10% in electricity costs

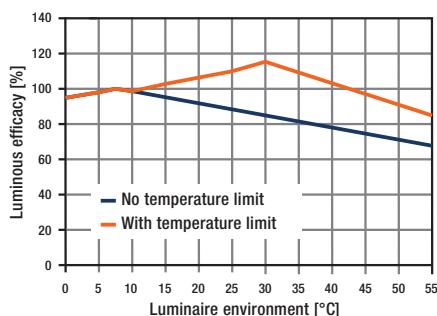

With a 2x HO 49 W luminaire, at an electricity price of 0.10 €/kWh, 20 € are additionally saved over its lamp lifespan merely with the planning factor adjustment (0.8): 10% of 110W x 18,000 h x 0.10 €/kWh = 20 €/luminaire in 4 years. This adjustment can be made via the building management system or a light sensor.

Temperature modification regulation with QTi DALI ECG

- Effective temperature protection via intelligent power reduction at high T_c temperatures
→ Simplifies safety accreditation for hot luminaires

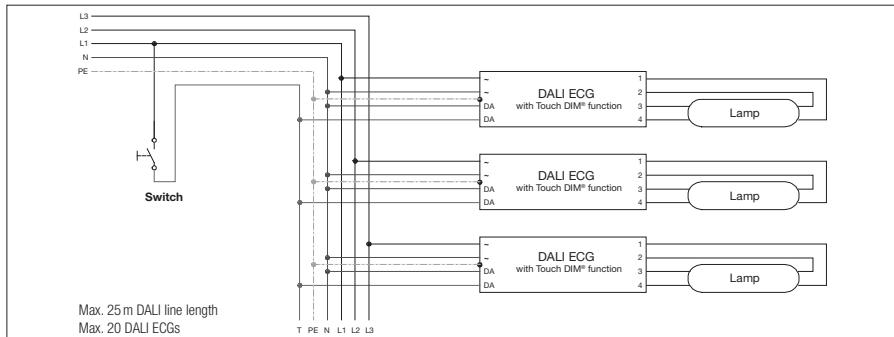

The benefits are a significant increase of luminous efficacy (lm/W) of hot luminaires and reduced thermal load for luminaire components

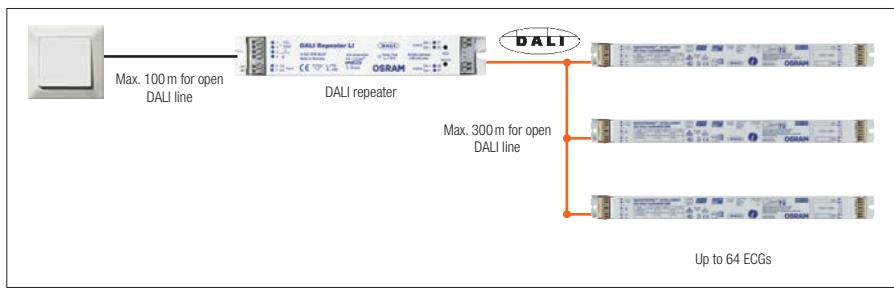

- End of Life (EoL) disconnection in line with Test 2 (asymmetric power test)
- DALI standard in accordance with IEC 60929 and IEC 62386

QTi DALI DIM – DALI or Touch DIM® in one unit

- Touch DIM® – dimming without dimmers via the direct connection of standard pushbuttons or standard motion sensors

- Operation of up to 64 DALI ECGs via repeaters

OSRAM always has the right control gear for you

For T5/Ø 16 mm and T8/Ø 26 mm fluorescent lamps

QUICKTRONIC® INTELLIGENT QTi

Thanks to intelligent lamp detection, over 50 % fewer ECG types and greater flexibility for lighting systems. Up to three lighting levels provided with only one luminaire.

- Up to 100,000 h lifespan*
- Suitable for luminaires with protection class I and II

QUICKTRONIC® PROFESSIONAL QTP5

- 2nd generation (GII) of the durable preheat start ECG (up to 100,000 h)*
- Also for protection class II luminaires

QUICKTRONIC® PROFESSIONAL QTP-OPTIMAL

- For T5, T8 and DULUX® lamps
- 3rd generation of the durable preheat start QTP ECG (up to 100,000 h)*
- Also for protection class II luminaires
- Only 4 ECG types instead of 16, giving greater flexibility in luminaire production and warehousing as well as simplified assembly due to uniform geometry and wiring

QUICKTRONIC® QTP-FC, QTP-M and QT-M

- The compact control units for filigree T5 ring lamps

* At 10 % failure and T_c max -10 °C, ** At 10 % failure

QUICKTRONIC® QT-FIT 5/8

- The reliable preheat start ECG (up to 50,000 h)**
- For T5 or T8 lamps
- Especially energy-saving together with motion sensors

QUICKTRONIC® QT-FIT8

- The reliable preheat start ECG (up to 50,000 h)**
- Especially energy-saving together with motion sensors

QUICKTRONIC® QTz8

- For T8 lamps
- Simple ECG for semi-professional applications

For compact fluorescent lamps

QUICKTRONIC® MULTIWATT-QTP-M and QT-M

The universal hot restrike ECGs for up to 18 different lamps (OSRAM DULUX® L, F, D/E, T/E, ...) from 18 to 42 W

QUICKTRONIC® PROFESSIONAL QTP-DL

For OSRAM DULUX® L and F from 18 to 55 W and QTP-D/E, T/E for OSRAM DULUX® T/E, D/E and S/E from 9 to 42 W

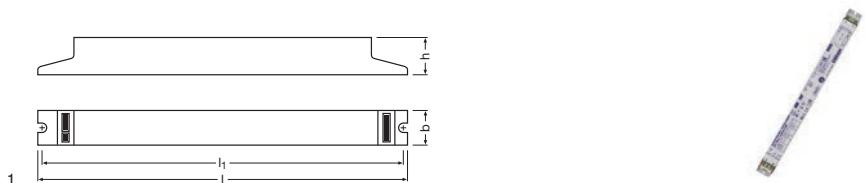

QUICKTRONIC® ECONOMIC

The electronic alternative to the LLCG – for OSRAM DULUX® S/E, D/E, T/E, T5, T8 from 4 to 26 W

QUICKTRONIC® INTELLIGENT DALI DIM

ECG dimmable for T5/16 mm lamps

Product features

- Corridor function for direct connection of ECG to common motion sensor
- Corridor function with pre-programmed light program
- Touch DIM® function for free parameterization of light value and turn-on time
- Fit for SMART GRID for feedback of consumed mains power and lamp operating hours
- Fit for emergency function for automatic detection of emergency lighting by ECG
- Very low standby power consumption: < 0.2W (A1 BAT)
- Lifetime: > 100,000 h (for T = 65 °C at T₀)
- Very high number of switching cycles: up to 300,000
- Dimming range: 1...100% (3...100% with compact fluorescent lamp)
- POWER2LAMP function for optimal matching of ECG power to lamp during lamp lifetime
- Line frequency: 0Hz, 50...60Hz, rectified AC

Product benefits

- Easy integration into luminaires thanks to same dimensions as DALI GI ECG
- Touch DIM® function for easy and inexpensive dimming of several ECGs
- Same luminous flux with direct and alternating current
- Dimming of amalgam lamps without flickering or reduced lifespan
- Automatic restart after lamp replacement

DALI product features

- Control via the DALI interface
- Compliance with DALI Version-1 and IEC 60929
- Control input protected against overvoltage and polarity reversal (OSRAM ECG)

Touch DIM® and Touch DIM® Sensor function

- Manual dimming without controller and with standard switches
- Including memory function (double-click) and soft start

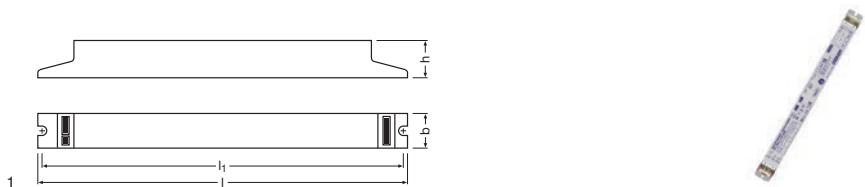

Areas of application

- Suitable for use in emergency lighting systems according to EN 50172/DIN VDE 0108-100
- Installation in emergency lighting systems according to IEC 61347-2-3, appendix J
- Industry
- Open-plan offices, corridors and storage rooms
- Public buildings
- Sports halls and factories
- Strip lighting
- Shop lighting
- Suitable for luminaires of protection class I

Product features

- Control via 1...10V interface
- Supply voltage: 220...240V
- Line frequency: 0Hz 50Hz 60Hz
- Line voltage: 198...264V
- Dimming range: 1...100% luminous flux
- Lamp start: within 0.6 s
- Lifetime: > 100,000 h (for T = 65 °C at T_c)
- Automatic shutdown of defective lamps and at end of life (EoL T_c 2)
- Energy Efficiency Index EEI: A1 BAT
- Overtemperature protection: Thermal management at high T_c temperatures
- Safety according to EN 61347-2-3
- Lamp operation according to EN 60929
- RI suppression according to EN 55015:2006+A1:2007+A2:2009/CISPR 15
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547

Areas of application

- Suitable for emergency installations
- Industry
- Open-plan offices, corridors and storage rooms
- Public buildings
- Suitable for luminaires of protection class I

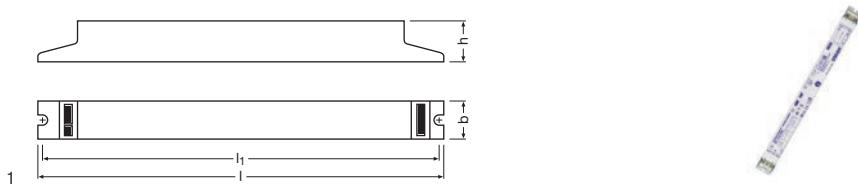

Product benefits

- Same luminous flux with direct and alternating current
- Perfect lamp start for applications with motion sensors
- Dimming of amalgam lamps without flickering or reduced lifespan
- Very high efficiency thanks to cut-off technology
- Automatic restart after lamp replacement
- ECGs comply with MINERGIE standard due to very low standby consumption
- Configurable emergency power characteristics

QTI 2X35/49/80 GII	176...276	45...70	425	30	21	415	20	1

Product features

- Supply voltage: 220...240V
- Line voltage: 198...264V
- Line frequency: 0Hz 50Hz 60Hz
- Lamp start with optimum filament preheating
- Lifetime: > 100,000 h (for T = 65 °C at T_d)
- Energy Efficiency Index EEE: A2 BAT
- Automatic shutdown of defective lamps and at end of life (EoL T_d)
- Safety according to EN 61347-2-3
- Lamp operation according to EN 60929

Areas of application

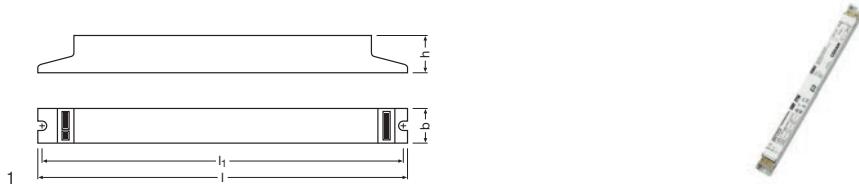

- Emergency lighting systems according to EN 50172/DIN VDE 0108-100
- Industry
- Open-plan offices, corridors and storage rooms
- Public buildings
- Sports halls and factories
- Strip lighting
- Suitable for emergency lighting (DC operation)
- Modernization of existing systems
- Suitable for luminaires of protection classes I and II

Product benefits

- Long lamp life
- No adverse effect from frequent on/off switching
- Automatic restart after lamp replacement
- Perfect lamp start for applications with motion sensors
- VDE/VDE EMC certified system
- Very high energy efficiency due to cut-off technology

QTP-OPTIMAL 2X54...58	176...276	40...50	360	30	21	350	20 1

Product features

- Supply voltage: 220...240V
- Line voltage: 198...264V
- Line frequency: 0Hz 50Hz 60Hz
- Lamp start with optimum filament preheating
- Lifetime: up to 100,000 h (for T = 65 °C at T_c, max. 10 % failure rate)
- Energy Efficiency Index EEI: A2 BAT
- Automatic shutdown of defective lamps and at end of life (EoL T.2)
- Safety according to EN 61347-2-3
- Lamp operation according to EN 60929

Product benefits

- Long lamp life
- No adverse effect from frequent on/off switching

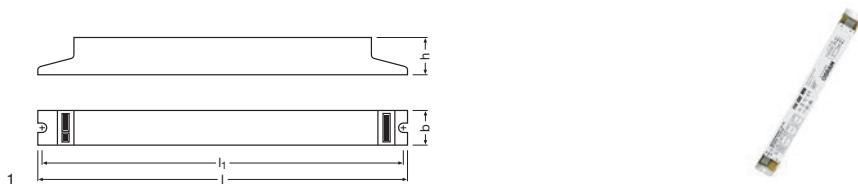

- Automatic restart after lamp replacement
- Perfect lamp start for applications with motion sensors
- VDE/VDE EMC certified system
- Very high energy efficiency due to cut-off technology

Areas of application

- Emergency lighting systems according to EN 50172/DIN VDE 0108-100
- Industry
- Open-plan offices, corridors and storage rooms
- Public buildings
- Sports halls and factories
- Strip lighting
- Suitable for emergency lighting (DC operation)
- Modernization of existing systems
- Suitable for luminaires of protection classes I and II

1) Minimum voltage for lamp ignition: 198 V

Product features

- Supply voltage: 220...240V
- Line voltage: 198...264V
- Line frequency: 0Hz 50Hz 60Hz
- Lamp start with optimum filament preheating
- Energy Efficiency Index EEI: A2 BAT
- Automatic shutdown of defective lamps and at end of life (EoL T.2)
- Lamp operation according to EN 60929
- Safety according to EN 61347-2-3

Product benefits

- Long lamp life
- No adverse effect from frequent on/off switching
- Automatic restart after lamp replacement
- Perfect lamp start for applications with motion sensors
- VDE/VDE EMC certified system
- Very high energy efficiency due to cut-off technology

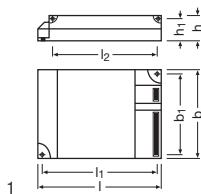

Areas of application

- Emergency lighting systems according to EN 50172/DIN VDE 0108-100
- Open-plan offices, corridors and storage rooms
- Public buildings
- Suitable for luminaires of protection classes I and II

1) Optional cable clamp, see page 5.61

2) Approximately

3) Minimum voltage for lamp ignition: 198V

Product features

- Supply voltage: 220...240V
- Line voltage: 198...264V
- Line frequency: 0Hz 50Hz 60Hz
- Lamp start with optimum filament preheating
- Energy Efficiency Index EEI: A2
- Automatic shutdown of defective lamps and at end of life (EoL T₂)
- Lamp operation according to EN 60929
- Safety according to EN 61347-2-3

Product benefits

- Long lamp life
- No adverse effect from frequent on/off switching
- Automatic restart after lamp replacement
- Perfect lamp start for applications with motion sensors
- Separate installations thanks to optional cable clamp for K2 and K3 casings
- VDE/VDE EMC certified system

Areas of application

- Emergency lighting systems according to EN 50172/DIN VDE 0108-100
- Public buildings
- Sports halls and factories
- Suitable for luminaires of protection class I

POWERTRONIC®

Electronic control gears for optimum operation of HCl®, HQI® and NAV® lamps

POWERTRONIC® ECGs have a wide variety of uses. Their low weight and small volume increase the scope for luminaire design and system planning.

POWERTRONIC® ECGs make the economical light from metal halide lamps even more comfortable and reliable by constantly monitoring lamp starts and lamp operation and by reliably disconnecting the lamps when appropriate.

POWERTRONIC® ECGs can be used in the following applications:

For outdoor lighting:

PTo 3DIM: Robust HID ECG – lightning-proof to 10kV, vibration-tested (EN 60598), approved for luminaires with protection classes I and II, 3 control options:

- DALI-1 control or
- StepDIM (2-step switching) or
- AstroDIM (dimming via integrated timer control)

For indoor lighting, with strain relief for separate mounting:

PTi I: Reliable technology for long system life

PT-FIT I: For standard applications

For luminaire installation:

PTi S: Reliable technology for long system life

PT-FIT S: For standard applications

Accessories

EBN-OS inrush current limiter for more installation flexibility

Areas of application

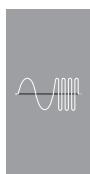

- Retail spaces/store windows
- Foyers/entrance halls
- Production facilities/industrial plants
- Public buildings
- Art galleries/museums/exhibition spaces
- Streets/parks/outdoor facilities (PTo)

Comfort

- Flicker-free light
- Greater color stability and less scatter in the color locus
- No flashing of old or faulty lamps

Improved cost efficiency with POWERTRONIC® ECGs compared to standard control gears

- Energy efficiency class A2
- Up to 15 % higher system efficiency
- Up to 20 % better luminous flux maintenance and less scatter of luminous flux
- Up to 30 % longer lamp life

Safety

- Reliable switch-off of aging or faulty lamps for greater system safety and reliability
- Integrated ignition time restriction prevents attempts to ignite faulty or old lamps, thus preventing lamp cycling and radio interference

Guarantee

OSRAM provides customers with its long-running 5-year guarantee for PT ECGs.*

1) At 230V_{AC}**Product features**

- 3DIM functionality (StepDIM/AstroDIM/DALI)
- Energy Efficiency Index EEI: A2
- Lightning protection: up to 10 kV
- Supply voltage: 220...240 V
- Line frequency: 50...60 Hz
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547
- RI suppression according to EN 55015
- Safety according to EN 61347-2-12
- Luminous flux factor 1 compared with CCG operation
- Not suitable for DC operation

Product benefits

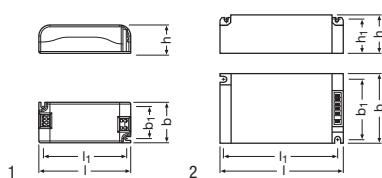

- Energy savings of up to 30 % (compared to CCG operation) thanks to 3DIM (except PTo 35)
- High surge protection: up to 3 kV (L-N)/4 kV (L/N-PE)
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)
- Excellent thermal behavior for very high limit temperatures T_c and T_a

Areas of application

- Suitable for luminaires of protection classes I and II
- Suitable for outdoor applications in luminaires with IP > 54

POWERTRONIC® INTELLIGENT PTi S

ECG for HID lamps, for installation in luminaires

PT-FIT 70/220...240 I	1.5	172	83	33	163	20	1

1) At 230V_{AC}**Product features**

- Energy Efficiency Index EEI: A2
- Supply voltage: 220...240V
- Line frequency: 50...60Hz
- RI suppression according to EN 55015/CISPR 15
- Safety according to EN 61347-2-12
- Line harmonics according to EN 61000-3-2
- Immunity according to EN 61547

Product benefits

- ECG with ergonomic strain relief for correct installation in suspended ceilings
- Optimized cost/benefit factor
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)

Areas of application

- Shop lighting
- Health and fitness areas
(in luminaires with protection class IP66 or higher)
- Effect and accent lighting

EBN-OS

Inrush current limiter for POWERTRONIC® ECG

Product name	GTIN (EAN)	W SYSTEM	T _a	I [mm]	b [mm]	h [mm]	100
EBN-OS	4006584548019	0.6	-10...+40	58	18	88	

Product features

- Retrofit for DIN rail according to DIN EN 60417 (formerly DIN EN 50022)
- Operating frequency: 50...60Hz
- Maximum continuous load: 16A
- Limitation time: 70 ms
- Number of switching cycles: up to 10,000

Product benefits

- Increases maximum number of ECGs per automatic cutout by factor 2.5
- Flexible use depending on the size of the installation
- Simple installation

Areas of application

- Suitable for use in combination with all POWERTRONIC® control gears and selected OPTOTRONIC® LED drivers

HALOTRONIC®

Electronic transformers and dimmers for optimum operation of low-voltage halogen lamps

HALOTRONIC® is primarily intended for:

- Recessed ceiling luminaires with strain relief
- Display spots
- Domestic luminaires (integrated and surface-mounted furniture luminaires)

Versions

HTi DALI 105 DIM can be integrated into DALI lighting systems and are also dimmable via pushbutton with Touch DIM®. Daylight/motion-dependent operation is possible with the DALIeco or DALI PROFESSIONAL system. Suitable for use in emergency power installations.

For more information on DALI, see page 3.06 ff; for usable components, see page 4.60 ff.

HALOTRONIC® LONG (HTL) is available in 105 W and 225 W versions for convenient separate mounting:

- 2 terminal pairs on the primary side for looping from unit to unit
- 3 large terminal pairs on the secondary side for connecting up to 3 luminaires in parallel

Featuring long lifespans with simultaneously high thermal load capacity, suitable for use in emergency power installations.

HALOTRONIC® MOUSE® HTM is available in three wattages as a compact standard unit with strain relief for shallow suspended ceilings. The electronic transformer from OSRAM – successfully used in millions of applications.

HALOTRONIC® NANO (HTN) in combination with miniaturized low-voltage halogen lamps is ideal for particularly tight spaces. Excellent thermal behavior despite the extremely small size.

ET-PARROT® is a cost-effective alternative to conventional transformers in the 70–105 W range.

Prescribed dimmer for HALOTRONIC®

HTL 105/230-240

HTL 225/230-240

HTM 70/230-240

HTM 105/230-240

HTM 150/230-240

HTN 75/230-240 I

ET-PARROT® 70/220-240 I

ET-PARROT® 105/220-240 I

With trailing-edge phase dimmer

With trailing-edge phase dimmer or leading-edge phase dimmer for inductive loads

Dimmers for ohmic loads are not suitable.

HTi DALI 315 DIM as a trailing-edge phase dimmer enables all listed electronic transformers to be integrated into a DALI system and can alternatively be operated by pushbutton. Daylight/motion-dependent operation is possible with the DALIeco or DALI PROFESSIONAL system. Also suitable for high-voltage lamps and high-voltage LED lamps.

Application

- Accent lighting
- Decorative lighting
- Foyers/reception areas
- Hallways/corridors
- Stores and exhibition spaces
- Single offices and conference rooms
- Domestic areas

Comfort

- Weighing around 80 % less and taking up 40 % less space than standard transformers, HALOTRONIC® electronic transformers give much greater scope for planning halogen-based lighting systems
- All devices have secure strain relief and fixing options
- Dimmable
- Electronically reversible cutout protects against short-circuits, overloads and overtemperature

Economy

- Protective lamp operation throughout the entire partial-load range for long lamp life
- No additional fusing measures required for ready-to-connect device
- Approx. 60 % lower power loss compared to standard transformers
- Energy efficiency $\geq 91\%$ in compliance with ErP directive 2012/1194/EC

Safety

- All transformers are VDE/IMQ-tested
- Suitable for mounting on wooden surfaces
- All transformers have VV
- Suitable without additional measures for luminaires with protection classes II and III and for luminaires with V and VV or W and WW designation
- Complies with international, European and German standards for safety and EMC

Guarantee

OSRAM provides customers with unique guarantees (for guarantee details, see page 5.03)*:

- 5-year guarantee for OSRAM HALOTRONIC® PROFESSIONAL electronic transformers
- 5-year guarantee for OSRAM HALOTRONIC® DIMMER in connection with HALOTRONIC® transformers
- 3-year guarantee for OSRAM HALOTRONIC® PARROT electronic transformers

* For conditions and details, go to www.osram.com/cb/services/guarantees/multilevel-guarantees/index.jsp

HALOTRONIC® HTi

Dimmable electronic transformers for low-voltage halogen lamps

Product name	GTIN (EAN)	W	A	UV min...max.	λ	kHz ECG	V_{OUT}

1) Minimum

2) Approximately

3) 105W / 35W

Product features

- DALI transformer for low-voltage halogen lamps
- Electrical isolation between the primary side and the secondary side
- Short-circuit protection, overload protection, overtemperature protection: electronically reversible
- Energy efficiency: $\geq 91\%$ (according to ErP regulation 2012/1194/EC)
- Device fits also for special applications where dimming below 1 % is required

Areas of application

- Effect and accent lighting
- Living rooms
- Object lighting
- Conference rooms
- Restaurants
- Recessed and surface-mounted ceiling luminaires
- Shop lighting
- Event rooms

Product benefits

- Very low power consumption thanks to high efficiency
- Through-wiring possible on the primary side
- Large temperature range
- Protective operation throughout the entire partial-load range for long lamp life

HALOTRONIC® PROFESSIONAL HTL

Electronic transformers for low-voltage halogen lamps

1) 3...200VA LED lamp power

2) Depends on the lamp type (please see www.osram.com/dim)**Product features**

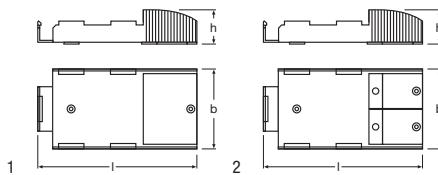

- DALI trailing-edge phase dimmer
- Dimming of high-voltage halogen and incandescent lamps
- Dimming of many common dimmable line-voltage LED lamps
- Dimming of electronic transformers
- Standby power consumption: < 0.5W
- DALI/Touch DIM® control signal
- Short-circuit protection, overload protection, overtemperature protection: electronically reversible
- RI suppression according to EN 55015 (A1:2007)
- Line harmonics according to EN 61000-3-2
- Safety according to EN 61347
- Immunity according to EN 61547
- Device fits also for special applications where dimming below 1 % is required

Equipment/Accessories

- Suitable for all OSRAM HALOTRONIC® and ET-PARROT® ECGs
- Suitable for all dimmable OSRAM line-voltage LED lamps

ECG mountings – cable clamps

Product name	GTIN (EAN)	l [mm]	b [mm]	h [mm]		No.
CABLE CLAMP K2	4008321190727	147	71	33	10	1
CABLE CLAMP QT-K3	4008321190741	168	84	37	10	1

Product features

- Suitable for various cable types with outer diameters of min. 7 mm to max. 11 mm

Product benefits

- Separate installations thanks to optional cable clamp for K2 and K3 casings

Areas of application

- Suitable for indoor installations

Light is energy-efficient

The best solution to replace your defective control gear. Search – filter – find.
Search our new **ECG Replacement Finder**.

Light is OSRAM

OSRAM

Light is performance

Deliver the full potential of your project – from calculating product lengths to programming lighting sequences. Use our free professional software and tools to support your OSRAM components.

Light is OSRAM

OSRAM

Installation and operating instructions

1. Residual currents/residual current detector

Problem

For ECGs with protective earth (PE), both the high short-duration inrush current and the small leakage current from the interference suppression capacitors in the ECGs can trigger the residual current detector.

Solution

- Distribute luminaires across 3 phases and use 3-phase circuit breakers
- Use surge-current-resistant, short-delay circuit breakers
- If permissible, use 30 mA RCDs

2. Capacity for automatic cutouts

In a choke/starter circuit, lamps ignite at staggered intervals; in an ECG circuit, all the fluorescent lamps ignite simultaneously. On switch-on at peak voltage, the storage capacitors of electronic control gears cause a high but very brief current pulse. In this case, the simultaneous charging of these capacitors in ECG operation can mean a higher system switch-on current than with a choke/starter circuit. This reduces the maximum number of luminaires permitted per automatic line protection unit (see tables on the following pages).

For example, the maximum number of luminaires permitted on a 10A automatic system is reduced from 15 luminaires with 2 x 58 W lamps with conventional control gear in a twin circuit to 8 luminaires in an ECG circuit. In the case of PTo, the maximum permitted number of luminaires on a 10A cutout is reduced to 7 PTo 50W. OSRAM offers an EBN inrush current limiter for POWERTRONIC® devices.

The EBN-OS restricts the switch-on current, which means that a larger number

of ECGs can be connected to an automatic cutout (see table on page 5.103).

When using the values given in the tables, please note the following:

- In ECG operation, the load data relates to switching on at peak voltage
- Circuit breaker type and characteristics:
The specified load from fluorescent lamps and the associated control gears applies to circuit breakers of Type 5 SL and 5 SX with B characteristics. If the above circuit breaker types with C characteristics are used, the number of permitted luminaires for ECG operation can be increased by 70 % (please observe VDE-0100-410 in particular)
- Circuit breaker design:
The specified loading is for single-pole circuit breakers. When multi-pole circuit breakers (2-pole, 3-pole) are used, the number of permitted luminaires is reduced by 20 %.
- Lamp switch-on:
The specified load applies:
 - To the joint, group-wise starting of the relevant number of luminaires in “choke operation”
 - To the maximum permissible number of luminaires switched together (with one switching operation) in ECG operation
- Circuit impedance:
The specified load applies with reference to a line impedance of 800 mΩ (corresponding to a 15 m long cable with a diameter of 1.5 mm from the distribution board to the first luminaire and a further distance of 20 m to the middle of the circuit; at a line impedance of 400 mΩ, the permitted values are reduced by 10 %, and by 20 % at a line impedance of 200 mΩ)

Inrush currents for ECGs measured at $U_N = 230\text{ V}_{\text{AC}}$

3. ECGs in 3-phase operation

Overvoltage/undervoltage/no neutral conductor

1. Check whether the line voltage is within the application range of the ECG (AC/DC range from 198 V to 254 V for example).
2. The mains connection should only be made to the fixture terminal. For luminaires or luminaire groups in 3-phase circuits.
3. Make absolutely sure that the neutral conductor is correctly connected to all ECG luminaires and that it is making proper contact.
4. Cables should only be connected or disconnected when no voltage is present.
5. For 3 x 230/240V supply networks in triangular circuit arrangements, protection by way of common disconnection of the phase conductor is necessary.

Important

- In new systems, the loads must not be connected when the insulation resistance is measured with 500V DC, as, according to VDE 0100-600 Section 9, the test voltage is also applied between the neutral conductor (N) and all 3 external lines (L1, L2, L3). In existing systems, it is sufficient to conduct an insulation test between the external conductors (L1, L2, L3) and protective earth (PE) without disconnecting from the network. The neutral conductor (N) and protective earth (PE) must not be electrically connected in any way while this is being done. For this insulation measurement (500 V = to Θ), the neutral conductor disconnection terminal may only be opened after the line voltage has been disconnected.
- Make sure that the N conductor is correctly connected before putting the equipment into operation.
- During operation of the lighting system, do not disconnect the N conductor under any circumstances.

The diagram above shows the wiring for luminaires or luminaire groups in 3-phase circuits and with a common neutral conductor. If the common neutral conductor is interrupted in a 3-phase star configuration and voltage is present, then luminaires or groups of luminaires operated with electronic control gear may be exposed to unacceptably high voltages and the ECG itself may be destroyed.

1) The lamps must be ignited at over 198V however

2) If POWERTRONIC® is switched on from cold, it takes 1 to 2 minutes for the lamp to reach 70% of the luminous flux

5. Power factor/compensation

The power factor λ for an electrical load is the ratio of the effective power ($P_{\text{eff}} = \text{voltage} \times \text{effective current}$) to the apparent power ($P_{\text{app}} = \text{voltage} \times \text{current}$). This value is affected both by the phase displacement $\cos \varphi$ between the current and the voltage and by the current distortion ε .

$$\lambda = \frac{P_{\text{eff}}}{P_{\text{app}}} = \varepsilon \cdot \cos \varphi$$

In contrast to CCGs (inductive, 50 Hz), there is hardly any phase displacement ($\cos \varphi = 0.95$) with ECGs (high frequency), so compensation is not required.

However, distortion in the sine-wave current supply occurs during the operation of electronic control gears. Generally speaking, these distortions are classified by integer multiples of the line frequency (harmonics).

The harmonic content of the line current is strictly controlled by national and international standards (IEC 61000-3-2).

OSRAM ECGs have integrated active electronic harmonic filters for this purpose, which ensure a value for ε of more than 0.95 and therefore a power factor λ greater than 0.9 (exceptions are indicated).

6. Permissible cable lengths

QUICKTRONIC®

When ECGs are used in luminaires, the cables, if correctly routed within the luminaires, produce little interference. When ECGs are used in Master/Slave circuits, the maximum permissible cable length between the ECG and the lamp must not be exceeded. For more detailed information, see the technical application guides at www.osram.com/oem-download

POWERTRONIC®

The maximum cable lengths between the lamp and POWERTRONIC® depend on the type of cable and how it is routed. The following maximum cable lengths can be used as guidelines:

	Max. cable length for AC operation
PTo 35/220-240	1.5m
PTo 50/220-240 3DIM	1.5m
PTo 70/220-240 3DIM	1.5m
PTo 100/220-240 3DIM	1.5m
PTo 150/220-240 3DIM	1.5m
PTo 250/220-240 3DIM	1.5m
PTi 20/220-240 I	1.5m
PTi 35/220-240 S MINI	0.5m
PTi 35/220-240 S/I	1.5m
PTi 50/220-240 S	1.5m
PTi 70/220-240 S/I	1.5m
PTi 150/220-240 S/I	1.5m
PT-FIT 35/220-240 S/I	1.5m
PT-FIT 50/220-240 S	1.5m
PT-FIT 70/220-240 S/I	1.5m

HALOTRONIC®

The maximum 12 V cable length must be less than 2 m to comply with radio interference limit values. This means that luminaires can be installed within a radius of 4 m around HALOTRONIC®. The recommended minimum cross-section is 1 mm².

Cable routing

The supply cable should not be routed alongside the HALOTRONIC® casing nor alongside the high-frequency 12 V secondary cable. This avoids high-frequency interference on the supply cable.

Instruments for measuring secondary voltage

An instrument for measuring the secondary voltage must be a true RMS meter and have a bandwidth greater than or equal to 250 kHz (-3 dB). Any other instrument will give false readings.

7. DALI ECGs with Touch DIM®/corridor function should not be operated on open DALI lines

Due to an increasing number of questions about DALI installations where no DALI controller is (yet) connected, we recommend you short-circuit the (currently) open DALI lines in the sub-distribution cabinet to avoid unwanted switching/unsynchronized dimming.

Recommendation

In DALI installations where no DALI controller is (yet) connected, short-circuit the open DALI lines in the sub-distribution cabinet (also applies to installations where Touch DIM®/corridor mode operation is planned).

Reason

To avoid unwanted switching/unsynchronized dimming caused by electrical distortions/coupling into open DALI lines.

Technical background

Even low induced voltages can trigger the DALI Touch DIM® mode on the DALI input connector of the electronic control gear and therefore cause different and unsynchronized dimming levels. This antenna effect is dependent on the length and location of the open DALI line. With open DALI lines of more than 10 m, we recommend short-circuiting the DALI line.

Reset in cases of error

If the DALI ECGs have already been triggered incorrectly, do the following:

1. Disconnect the mains power to the DALI ECGs and connect a DALI control unit (e.g. OSRAM DALI Repeater or OSRAM DALI MCU)
2. Reconnect the power: The DALI ECGs will detect the signal and switch back to DALI mode again
3. Interrupt the mains power again and disconnect the DALI control unit
4. Short-circuit the DALI line
5. Connect up the power again

Applies **only** to DALI ECGs with Touch DIM®/corridor function.

8. Faults in infrared control/transmission systems

Fluorescent lamps have an emission in the wavelength range which is also used for infrared transmission and which can be affected by the lamp. Since the IR receivers used are largely non-selective, interference may occur in the IR system. The operating frequency of the ECGs is between 20 and 120 kHz. The light emitted from the fluorescent lamp is modulated at twice the operating frequency. Interference is produced by signals in the same frequency range.

Exception: Interference is not expected with POWERTRONIC® and HALOTRONIC®.

IR remote control

Systems operating at a sufficiently high carrier frequency (400 to 1,500 kHz) are unlikely to suffer interference.

Sound transmission

Up to now, the carrier signal frequency for sound transmission has been 95 kHz and higher, which has led to serious disturbance from the 3rd, 5th and 7th harmonics of the ECG operating frequency (20 to 120 kHz in normal operation and up to 100 kHz with dimming). Headphone manufacturers have adopted higher frequencies such as 2.3 MHz and 2.8 MHz. Simultaneous interpreting systems also operate in the 95 kHz to 250 kHz range, so it is best not to use the first six transmission channels, particularly channel 1, of the 32 available channels since these are likewise affected by the harmonics of the basic ECG frequencies.

High-frequency ripple control

The carrier frequencies used are around 120 kHz. Transmission can be adversely affected by radio interference suppression capacitors, which are included in all ECGs and other electronic loads, such as the power supplies of PCs.

Paging systems

Generally, only HF paging systems (operating in the MHz range) should be used. If inductive paging systems are used (25 to 40 kHz), reliable operation is not possible.

Electronic merchandise security systems

In many shops nowadays, merchandise such as DVDs, hi-fi equipment and clothing is protected against theft by electronic security systems.

These systems typically operate with resonance frequencies in the kHz range (e.g. a pulse is emitted which causes an amorphous metal in the security tag to resonate; one of the largest suppliers uses a security system that operates at 58 kHz).

In unfavorable conditions, these systems may suffer from interference if the operating frequency is between 30 kHz and 150 kHz. Such interference can be eliminated by increasing the distance between the luminaire and the transmitting/receiving system and by using luminaires with metallic louvers.

9. Dimming mode

- QUICKTRONIC® units that can be dimmed have the letters ...DIM in their references. They are dimmed via the 1...10 V interface (QTi-...DIM) or via the DALI interface (QTi DALI ... DIM) or via Touch DIM® (also with QTi DALI ... DIM), see page 5.04 ff. For special technical data, such as wiring and associated control components, please refer to the technical guide for QUICKTRONIC® DALI/DIM. Allow new lamps to burn in for 100 hours at 100 % luminous flux since only after this time will they exhibit stable values. A Master/Slave circuit (one ECG for two separate luminaires with wiring) is not permitted for dimmable ECGs.
- POWERTRONIC® PT0 3DIM units enable metal halide lamps with ceramic burners and also sodium vapor lamps to be dimmed. Dimming is performed via the DALI interface, StepDIM 2-stage phase control or autonomously via the internal AstroDIM control system of the ECG. Details on dimming HID lamps can be found in “Technical information on power reduction for high-intensity discharge lamps” (www.osram.com).
- HALOTRONIC® can be controlled with various dimmers (see page 5.54) or dimmer modules (see page 5.60). Since the interface between the dimmer and the electronic transformer is not standardized, there may be malfunctions in individual cases.

10. Luminaires with ECGs

The following general points apply to luminaires with electronic control gears:

- The temperature limits of the ECGs regarding ambient temperature and measuring point temperature on the ECG must not be exceeded (see 11. Ambient and ECG temperatures).
- The maximum permissible radio interference suppression values (EN 55015) must not be exceeded. Make sure the protective conductor and the function earth are correctly connected. Running the lamp cables and the protective conductor together (e.g. NYM cables) may lead to problems due to high-frequency interference.
- After being installed or replaced, the lamps must be burned in at full load for 100 hours to stabilize the discharge process.

11. Ambient and ECG temperatures

The temperature ranges specified for the relevant control gear must be maintained to enable the ECG to operate reliably. Generally speaking, lower operating temperatures can extend the life of ECGs. When ECGs are built into luminaires, the measuring point temperature T_c on the casing is the crucial parameter. The maximum permissible value specified for the ECG concerned must not be exceeded.

12. ECGs for outdoor luminaires

ECGs for high-intensity discharge lamps (PTo) have been designed specifically for outdoor applications. They are specially equipped for such applications; for example, they are protected against moisture, AC voltage peaks and vibrations (wind load, rail vehicles).

When using ECGs in outdoor luminaires, it must be remembered that the ECG may be exposed to humidity.

1. For luminaires of protection class 5 (protected against water jets, IP65 for example), standard ECGs can be used since moisture cannot penetrate this type of luminaire, so there is little chance of ECG corrosion. In individual cases, the use of supplementary protective measures must be considered.
2. For luminaires of protection class 3 (protected against splash water, IP43 for example), it is likely that water droplets will penetrate and thus cause corrosion and failure of unprotected standard ECGs. In cases of doubt (e.g. bollard luminaires, outdoor displays), additional protective measures should be taken.

13. Wiring of ECGs

Parallel connection of HALOTRONIC® is not permitted on the secondary side. Lamp-side switching or dimming is not permitted.

14. Lifespan and reliability of ECGs

The failure rate of electronic components depends not only on the component specification and quality but also very considerably on the operating temperature. OSRAM ECGs are designed so that, at the maximum permissible ECG temperature (T_c max.), a failure rate of fewer than 2 per thousand ECGs per 1,000 hours of operation can be expected. This corresponds to an ECG life of up to 50,000 hours at an ECG failure rate percentage of 10 %. In practice, it can be assumed that, at a temperature 10 °C less than the maximum permitted temperature (T_c), the life of an ECG is doubled.

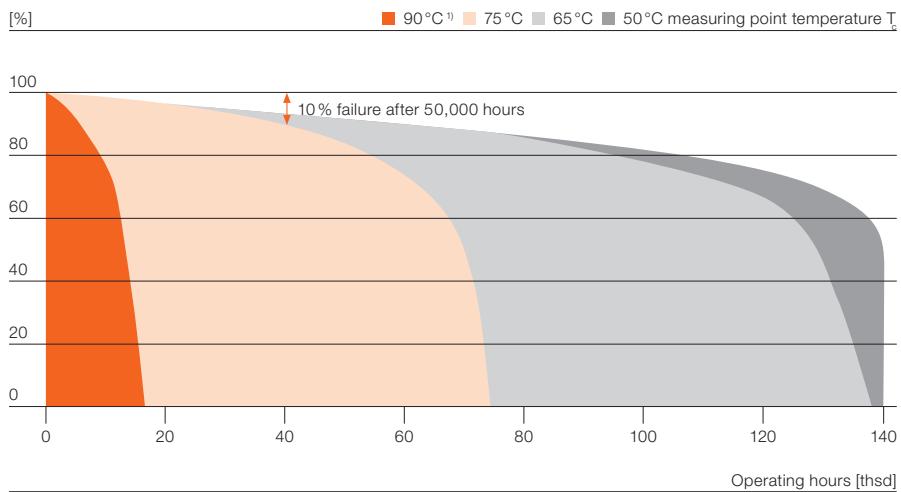

The following have different lifespans:

1. Up to 30,000 hours for QUICKTRONIC® QT-ECO, HTM MOUSE® and HTN at a failure rate of 10 %
2. Up to 60,000 hours for POWERTRONIC® PTo at a failure rate of 8 %; up to 50,000 hours for POWERTRONIC® PTi at a failure rate of 10 %; up to 30,000 hours for POWERTRONIC® PT-FIT at a failure rate of 10 %

Special applications, such as operation in corrosive atmospheres, strong vibrations, impermissible voltage conditions etc., may necessitate further protection measures.

Functional ECGs

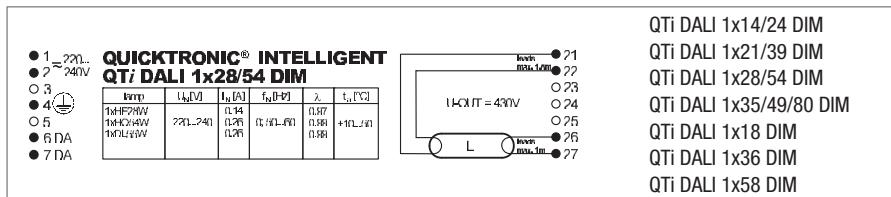

10 °C lower measuring point temperatures almost double the lifetime of the ECG²⁾

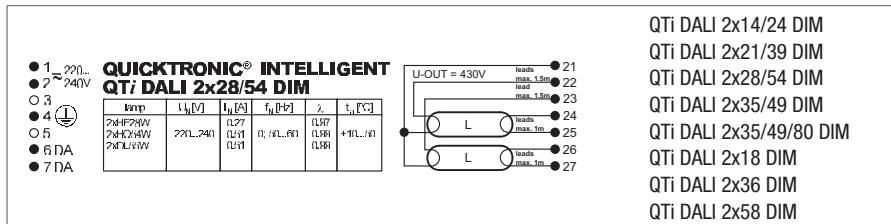

- 1) If the maximum permissible temperature at the T_c point is exceeded, the failure rate may increase dramatically.

- 2) For detailed information, please refer to the product data sheet.

Case study

Individual lighting and control solutions promote employee well-being

Siemens headquarters –
Munich, Germany

The completely redesigned Siemens headquarters in Munich offer an inspiring working environment with variable space and usage concepts on a floor area of 45,000 square meters.

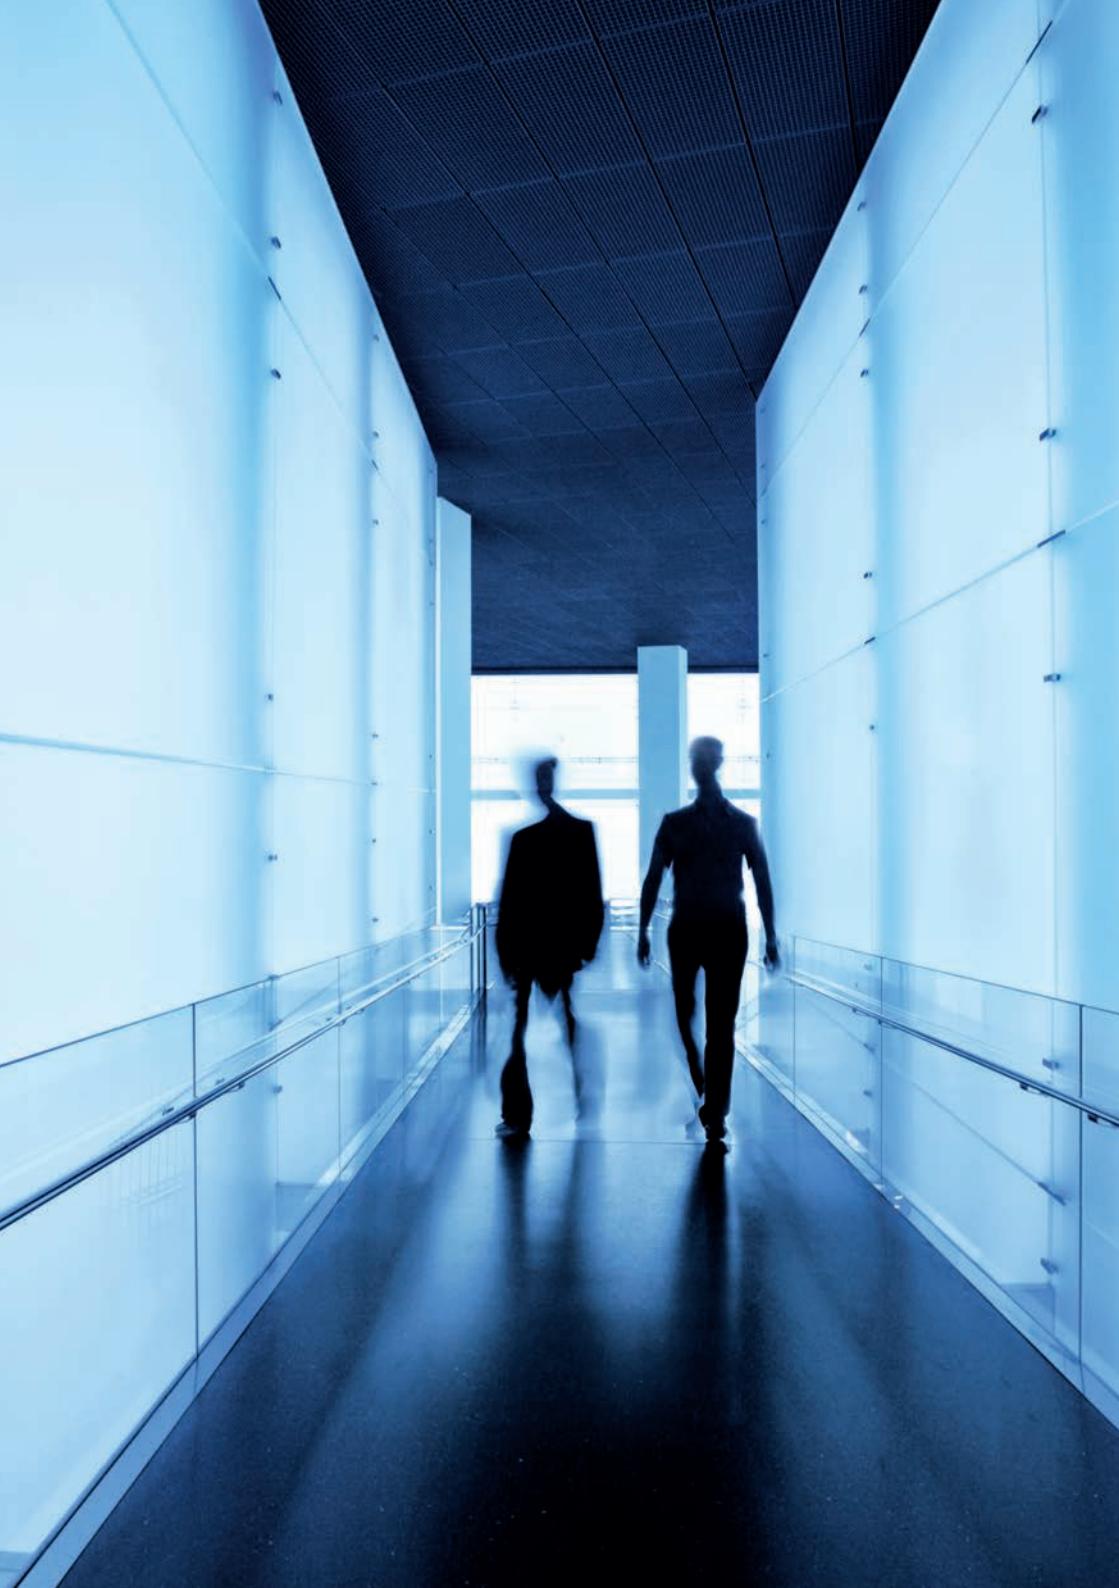

The high requirements placed on lighting in terms of energy efficiency and flexibility provide ideal conditions in all parts of the building; with individual lighting concepts optimizing visibility and promoting the well-being of approximately 1,200 employees.

All LED luminaires are equipped with DALI LED drivers for maximum energy savings and can be controlled and monitored via the central building control system. With the help of daylight and presence sensors in the building, the lights can be used and dimmed based on demand, thereby saving even more energy.

In the meeting rooms of the historic Palais Ludwig Ferdinand, LINEARlight FLEX® LED modules create special visual accents. The flexible LED modules provide indirect lighting in the coves surrounding the central meeting rooms.

Glossary of the most important lighting terms

As with any technical or scientific discipline, lighting technology has its own special terms and concepts for defining the characteristics of light sources and fixtures and for standardizing the units of measurement.

The most important terms are described here.

Luminous flux Φ

Unit of measurement: lumen [lm]

Luminous flux Φ is all the radiated power emitted by a light source evaluated with the spectral sensitivity of the eye and the photometric radiation equivalent k_m .

Luminous intensity I

Unit of measurement: candela [cd]

Generally speaking, a light source emits its luminous flux Φ in different directions and at different intensities.

Luminous intensity is the luminous flux radiated in a particular direction (solid angle Ω).

Illuminance E

Unit of measurement: lux [lx]

Illuminance E is the ratio between the luminous flux and the area being illuminated.

An illuminance of 1 lx occurs when a luminous flux of 1 lm is evenly distributed over an area of 1 m².

Luminance L

Unit of measurement:
candela per square meter [cd/m²]

The luminance L of a light source or an illuminated area is a measure of the impression of brightness.

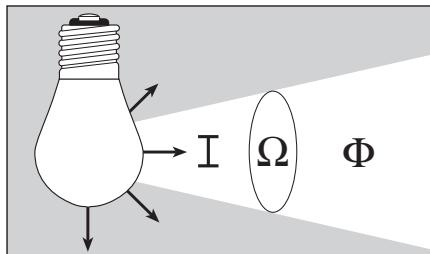

Luminous efficacy η

Unit of measurement:
lumen per watt [lm/W]

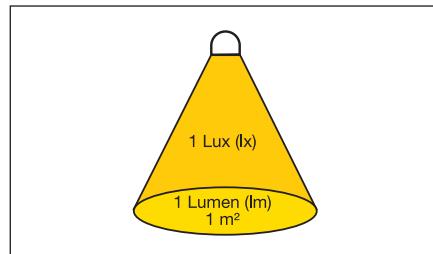

Luminous efficacy η indicates the efficiency with which the electrical power consumed is converted into light.

Light and radiation

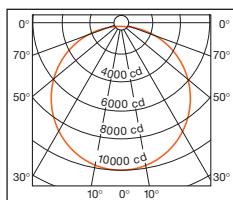

Light is taken to mean the electromagnetic radiation that the human eye perceives as brightness, in other words that part of the spectrum that can be seen. This is the radiation between 380 and 780 nm, a tiny fraction of the known spectrum of electromagnetic radiation.

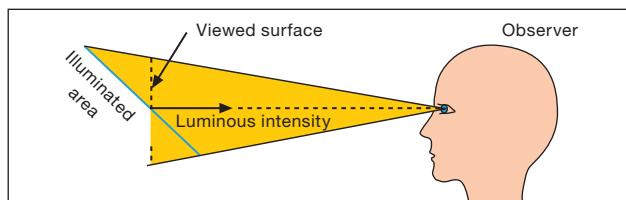

Luminous intensity I is a measure of the luminous flux Φ emitted in a solid angle Ω .

Illuminance E

Polar diagram

Luminance L

The most important photometric formulae:

Luminous intensity [cd]	I
Illuminance [lx]	E

Luminous flux [lm] Solid angle Ω [sr]	
Luminous flux falling on area [lm] Illuminated area [m ²]	

Luminance [cd/m ²]	L
Luminous efficacy [lm/W]	η

Luminous intensity [cd] Viewed luminous area [m ²]	
Generated luminous flux [lm] Electrical power consumed [W]	

Color temperature

Unit of measurement: Kelvin [K]

The color temperature of a light source is defined in comparison with a “black body radiator” and plotted on what is known as the “Planckian curve”. The higher the temperature of this “black body radiator”, the greater the blue component in the spectrum and the smaller the red component. A light source with a warm white light, for example, has a color temperature of 2,700 K, whereas a daylight light source has a color temperature of 6,000 K.

Light color

The light color of a light source can be neatly defined in terms of color temperature. There are three main categories here:

Warm White <3,300 K

Cool White 3,300–5,300 K

Daylight >5,300 K

Despite having the same light color, light sources may have very different color rendering properties owing to the spectral composition of their light.

Color rendering

As a rule, artificial light should enable the human eye to perceive colors correctly, as it would in natural daylight. Obviously, this depends to some extent on the location and purpose for which light is required.

The criterion here is the color rendering property of a light source. This is expressed as a “general color rendering index” (R_a).

The color rendering index is a measure of the correspondence between the color of an object (its “self-luminous color”) and its appearance under a reference light source. To determine the R_a values, eight

test colors defined in accordance with DIN 6169 are illuminated with the reference light source and the light source under test. The smaller the discrepancy, the better the color rendering property of the lamp being tested.

A light source with an R_a value of 100 displays all colors exactly as they appear under the reference light source. The lower the R_a value, the worse the colors are rendered.

Luminaire efficiency

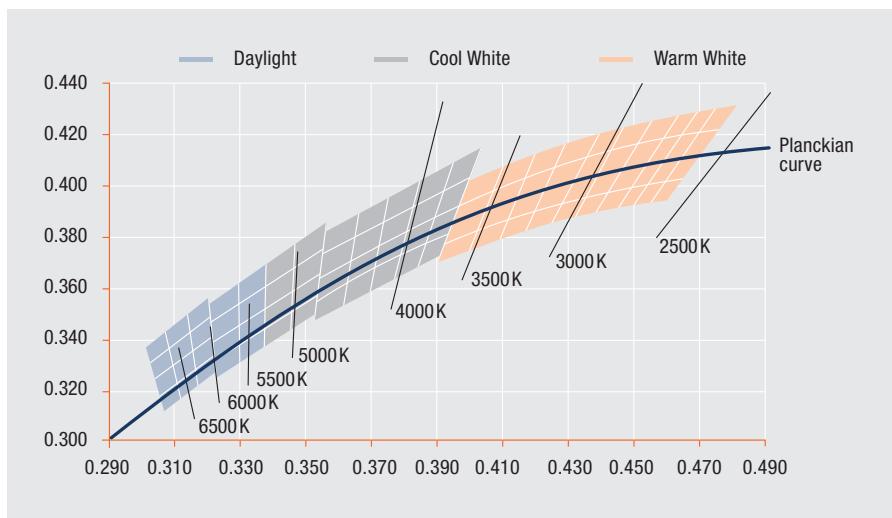

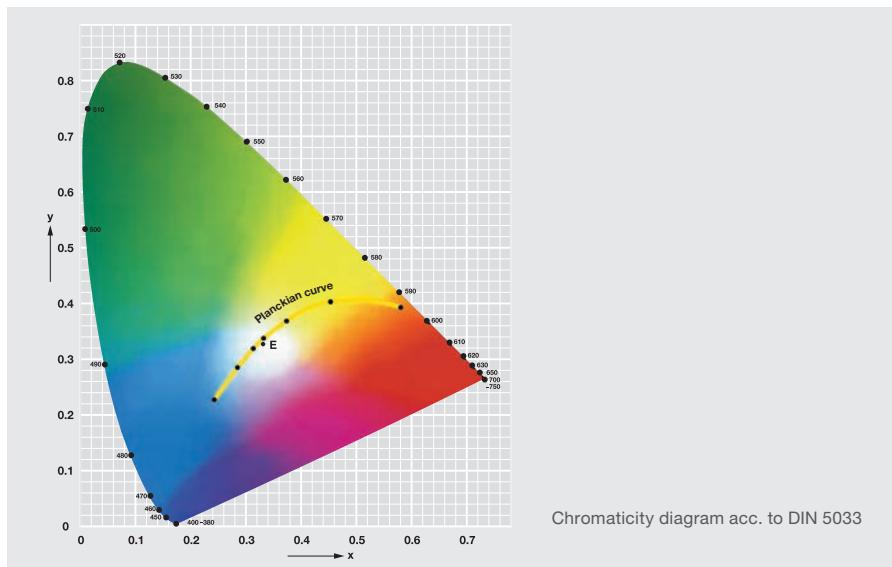

Luminaire efficiency (also known as light output ratio) is an important criterion in gauging the energy efficiency of a luminaire. This is the ratio between the luminous flux emitted by the luminaire and the luminous flux of the light source installed in the luminaire.

Average life

The average life of a light source is an average of the lives of individual lamps operated under standard conditions (50 % failure = average rated life).

Service life

Service life is a simple practical measure of the economical life of a light source. It is the number of hours of operation after which the system luminous flux (i.e. the product of the relative luminous flux and the relative proportion of light sources still in operation) is around 80 % of the initial value.

Simple and correct disposal of lighting products

EU directive 2012/19/EU on waste electrical and electronic equipment (WEEE) relates, among other things, to luminaires, discharge lamps and LED lamps.

Starters, control gears and light-emitting diodes are classed as luminaire components and as such are part of the luminaire disposal process.

All OSRAM products that need to be disposed of under the WEEE directive are labeled with the symbol shown here.

All manufacturers, importers and initial distributors must register with their relevant national authority. Products from non-registered manufacturers may no longer be marketed.

There are individual regulations governing the disposal of lighting products in the member states of the EU and also in Norway and Switzerland. For more information, please contact your local OSRAM office.

The primary objectives of the WEEE directive are to reduce the load on the environment, safeguard valuable resources and protect the environment and public health.

All consumers (commercial and domestic) are obliged to return old affected lighting products for separate disposal. Collection points have been set up for this.

The latest information from OSRAM can be found on our Sustainability pages: www.osram-group.com/en/sustainability/environmental/recycling or at any relevant national authorities.

General notes

Standard packs

General

All OSRAM articles are GTIN (EAN) coded in their various packaging formats. The GTIN (EAN) numbers listed in this catalog normally relate to the smallest packaging unit unless otherwise indicated.

Technical data is in accordance with EN European Standard and IEC (International Electrotechnical Commission).

Unless otherwise indicated, all products are designed for a mains voltage of 220–240V.

For CE labeling, see notes on the following page.

Sales and shipments are based on the OSRAM Conditions of Supply and Payment valid on the contract date.

Technical data and dimensions are subject to the customary small tolerances.

Subject to technical modification and availability of supplies. The information in this catalog supersedes information in previous catalogs.

® = Registered trademark

Standard packs

There is a surcharge on order quantities different from the standard pack quantities listed in this catalog because standard packs have to be broken open.

There are considerable advantages in ordering original cartons/standard packs:

- Prompt delivery
- No surcharges
- Simple cost-saving handling on receipt
- No time-consuming checks when the goods arrive
- Exact contents description on each stacked carton
- No danger of mistaking one type of lamp for another
- Reduced risk of losses in transit
- Reduced risk of breakage

Types not listed

Available on request.

Surcharge for special designs and functions.

CE labeling for lighting products

Products that fall under the scope of the European directives on low voltage (LVD), electromagnetic compatibility (EMC), radio equipment (RED), restriction of certain hazardous substances (RoHS) and the eco-design of energy-related products (ErP and its applicable implementation measures) must carry the CE label to be sold within the EU. The CE label indicates compliance with the essential requirements of these regulations and ordinances. All relevant OSRAM products for sale on the EU market meet the requirements of the applicable European directives and therefore carry the CE label.

Notes on CE labeling:

1. CE labeling as a requirement for marketing products in Europe

Some EU Regulations (“CE Regulations”) require CE marking of products. In this case, the CE label is a prerequisite for sales within the EU and must therefore be applied before a product can be marketed. By applying the CE label to their products, manufacturers and importers confirm that their products comply with the “essential requirements” of all applicable CE Regulations and that they meet the stated objectives of these directives (electromagnetic compatibility, for example). In many cases, compliance with these “essential requirements” is demonstrated by complying with the relevant harmonized European standards (EN). However, from a legal perspective, a manufacturer may also choose a different pathway to demonstrate compliance and rather use his own technical expertise than applying harmonized standards, for example in case of new technologies when harmonized standards simply do not (yet) exist.

2. The CE label is an administrative mark

The CE label is an administrative mark addressed to the EU customs and market authorities. The CE label indicates to them that at the time of its marketing the labeled product complies with the European directives that (a) apply to the product and (b) require a CE label.

3. CE labeling for inspection

Consumers do not have the right to inspect the CE declarations of the manufacturers. There is one exception, however: For radio products, the CE declaration must be made available with the product, either in printed form or via a download link.

The right to request and inspect CE declarations is reserved exclusively for those market authorities responsible for checking that electrical and electronic products comply with statutory requirements. In Germany, for example, these are the Bundesnetzagentur (Federal Network Agency, responsible in connection with the EMC directive and the RED directive), the Gewerbeaufsichtsämter (Trade Supervision Offices, responsible in connection with the low-voltage directive), the relevant authorities and the Bundesanstalt für Materialforschung und -prüfung (Federal Agency for Material Research and Testing) as the commissioned agency (in connection with the ErP directive).

4. The CE label is not a seal of quality or an approval mark

CE labeling relates solely to compliance with the statutory “essential requirements” contained in certain directives and ordinances. It is therefore not an indicator of the quality of the product. The product features required in the ordinances for implementing the ErP directive are verified by the manufacturers by means of type testing and confirmed with the CE label. As an administrative label required by law, the CE label should not be confused with the approval marks (such as ENEC and VDE marks) issued by independent inspectorates. These inspectorates do not check if a product legitimately carries the CE label.

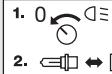

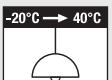

Symbols on our packaging

OSRAM has always focused not only on high product quality but also on the health of the consumers of its products. The European regulations on product safety create the same conditions in all EU member states and standardize the safety

requirements relating to products. The regulations promise greater transparency for the consumer. To meet our obligations arising from these regulations and to inform our customers as well as to visualize product features in a way that can be quickly grasped, we provide information about our products on the products themselves, on the packaging and on the leaflets enclosed with the products. Because there are so many different languages in the EU, we use pictograms.

OSRAM uses the following symbols:

	Open packaging, read instructions	 1. 0 2. 	Switch off headlights before replacing lamp
	Read the enclosed leaflet before use		Can be operated in unshielded luminaires
	Keep away from children		Operate only in shielded luminaires
	Do not throw away with household waste		Limited dimmability
	Use indoors only		Lamp cannot be dimmed
	Disconnect the power supply before relamping	 >200°C	Caution: hot
	Disconnect electronic control gear from the power supply before maintenance work		Wear suitable protective gloves when fitting or removing

	Wear suitable goggles when fitting or removing
	Protect against splashes
	Restriction on burning position: p = horizontal, h = hanging, s = standing, 15 = ±15°
	Must be installed and maintained only by qualified electricians
	IR radiation
	High levels of UV radiation
	UVA-A radiation
	Germicidal lamp
	Radiation hazard: Do not look into the light source
	Operate only with control gear
	Ignition procedure for lamps with built-in ignition
	Ignition procedure for lamps with external igniter
	Dangerous voltage
	Special lamps, not suitable for general lighting in households
	Caution! Hot surface
	See further information on the inside
	Suitable indoor ambient temperature
	Suitable outdoor ambient temperature
	Not suitable for accent lighting
	Do not use tools
	Do not open product
	Intended application: entertainment
	Intended application: medical devices
	Intended application: industry

Symbols in the tables

	Power in W		Operating frequency in Hz		Length l ₁ in mm
	System wattage in W		Operating frequency in kHz		Width b in mm
	Wattage of chain in W		Color temperature in K		Hole spacing b ₁ in mm
	Module wattage in W		Light color		Height h in mm
	Nominal wattage per meter in W		Color		Maximum installation height in m
	Wattage per meter White		Color rendering index		Beam angle in °
	Wattage per meter RGB		Luminous flux in lm		Average period of use/life
	Dimmable		Luminous flux of chain		Output ripple at 100Hz
	Dimming range		Luminous flux of module		Programming interface
	Type of current		Luminous flux per meter		Galvanic isolation
	Voltage in V		Luminous flux per meter White		Protection class
	Input voltage in V		Luminous flux per meter RGB		Type of protection
	Output voltage in V		Luminous efficacy		Control
	DC voltage in V		Luminous intensity in cd		Number of control outputs
	Ignition voltage in kV		Power factor/wavelength		Ambient temperature range in °C
	Current in A		Diameter d in mm		Max. operating temperature at the T _c point in °C
	Rated current in mA		Diameter light emitting surface		Energy efficiency class
	Current Set		Length l in mm		Initial standard deviation of color matching

	No. of LEDs per module
	Number of LEDs per meter
	Number of LED modules per chain
	For lamp/LED module
	Maximum cable length – system in m
	Detection area
	Working range of light sensor in Lx
	Maximum load contact in A
	Type of installation
	Transmitter range in m
	Battery
	Max. TX power
	Advertising interval
	Antenna type
	Multi services support
	Standard pack in pcs.
